

Mr Amit Jain, Technical Architect, iSPIRT Foundation

Mr Amit Jain is an architect of Digital Public Infrastructure (DPI) with over two decades of experience building nation-scale digital platforms that transformed governance, trust, and service delivery in India.

He is currently serving as Technical Architect at iSPIRT Foundation, he contributes to the architecture and strategy of emerging open digital ecosystems and next-generation DPI layers that will underpin India's regulatory, governance, and enterprise innovation stack.

Previously, as Senior Vice President, Product Management at Digital India Corporation, he led DigiLocker's technical evolution and governance — implementing the consent management framework, Entity Locker, verifiable credentials, and ISO 27001 certification, while ensuring scalability, interoperability, and public trust.
