

Providing Study Material in Sign Language for Hearing-Impaired Persons

CRC (Composite Regional Centre) Jaipur has taken a significant initiative keeping in mind the special needs of hearing-impaired individuals. **For the first time in Rajasthan**, a **dedicated Indian Sign Language Recording Lab** has been established here. In this lab, various **study materials are being recorded in Indian Sign Language** and made available to persons with hearing disabilities.

The main objective of this initiative is to **overcome the learning challenges faced by children with hearing impairments**. Under this program, **textbooks and other educational content** are being recorded in sign language and provided to the children to enhance their learning experience.

Additionally, **information related to various government schemes and policies**, which was earlier difficult for persons with hearing impairments to understand through written material, is now being recorded in **Indian Sign Language** and made accessible to them.

At present, CRC Jaipur is also conducting a **two-year Diploma Course in Indian Sign Language**, approved by the **Rehabilitation Council of India (RCI)**, New Delhi. Students from **Rajasthan and other states** are learning **specialized skills in sign language** through this program.

As per the **National Education Policy (NEP) 2020**, every child has the right to receive **primary education in their own language**. Considering this, CRC Jaipur has taken this initiative to ensure that **children with hearing impairments are not deprived of their educational rights**.

Under the leadership of **Mr. Neeraj Madhukar, Director of CRC Jaipur**, this initiative is a **major step toward creating an accessible environment** and fulfilling the vision of an **inclusive society**.
