

Consolidation of metal during
the rainy season -

**Government of Maharashtra.
Public Works and Housing Department,
Govt. Circular No. RDS 1078/(CR-328)-Desk-4
Mantralaya, Bombay - 400 032. D/- 3-11-1978.**

CIRCULAR.

During the Review Meeting held by the Minister (Public Works) at Pune on 9-9-1978 , a suggestion was made that the work of consolidation of metal should be done in the rainy season during which plenty of water is available.

2. After careful consideration of the above suggestion, Government is pleased to direct that when the work of resurfacing of W.B.M. surface and strengthening of crust with W.B.M. Surface are being executed, the Field Officers may undertake such works during dry spells available during the monsoon, to take advantage of water being available in plenty during the rainy season. However, work of providing metalling on new sub grades should not be undertaken during the monsoon.
