In a collaborative effort, the Punjab State Legal Services Authority, Haryana State Legal Services Authority and U.T.(Chandigarh)Legal Services Authority, have launched a project by the name of Victim Care and Support System across all Districts of Punjab, Haryana and Chandigarh. This project aims to provide a comprehensive and accessible system for victims of crime within these regions.

"To help victims reintegrate into their communities and restore a sense of normalcy"

INTRODUCTION

The impact of crime upon a victim is long lasting and the victim is often left with no mechanism to deal with the tragic aftermath. Apart from physical and financial loss, the victims of crime suffer from emotional losses also. Such emotional losses may be in the form of depression, low self-esteem and post-traumatic stress disorder, etc. There is a tremendous increase in crime of every category in our country in the recent past. Therefore, there is need for a victim oriented approach in the legal aid system to ameliorate the conditions of the victim of crime.

The need for a victim-centered approach is important, as it recognizes that victims require dedicated care, emotional support, and practical assistance to rebuild their lives. A legal aid system that is oriented toward the needs of the victim can play a vital role in addressing these gaps, helping to alleviate the psychological, emotional, and financial hardships that crime victims endure. Victim support programs, when integrated into the justice system, can empower individuals to reclaim their lives, reduce the likelihood of re-victimization, and foster a feeling of security and justice.

Victim Care and Assistance

The victim care aims at giving assistance and support which is holistic in nature and goes beyond the criminal justice system. The essence of victim support is improving the quality of life which was put in peril by the incident of crime. It basically serves two objectives-
