

eCourts Project

Phase II

Objectives Accomplishment Report
As per Policy Action Plan Document

eCommittee, Supreme Court of India

INDEX

Deliverables under the E-Courts Project as per Policy Action Document of Phase II

eCourts Project - Phase II – Objectives Accomplishment Report as per Policy Action Plan Document		
1.	Goal Posts to Reach	1 – 7
2.	Implementation Model	7 – 8
3.	Institutional Structure	8
4.	Infrastructure Model	8 – 9
5.	System and Application Software for Court Process	9 – 15
6.	Scanning, Digitization & Digital Preservation of Case Records	15 – 16
7.	Video Conferencing for Courts and Jails	16 – 17
8.	Capacity Building Measures	17 – 18
9.	Judicial Process Re-Engineering	18 – 20
10.	Work Flow and Process Automation Tools & Measures	21 – 22
11.	Judicial Knowledge Management System	22 – 25
12.	Human Resources	25
13.	Services Delivery	25 – 31
14.	Extra Work Done Though not Mentioned in Action Plan	31 – 36
15.	Statistics of Deliverables under Policy Action Plan Document	37
16.	Citizen Charter	38

Annexure – A		
Statistics of performance of the project during Phase II		
17.	eCourts Project – eTransactions recorded on eTaal 1. Electronic Transaction recorded on eCourts Portal & Mobile App.	39
18.	2. Growth of eTransactions (2015 to 2018)	40
19.	3. Top performing Mission Mode Projects in the Country (2018)	41
20.	4. Share of eTransactions of the major Projects in the Country	42
21.	3. Services Offered and Comparison with Top Ten Projects	43 – 44
22.	Annexure – B Progress Made during eCourts Phase – II	45 – 48
23.	E-Filing	49
24.	NSTEP – National Service and Tracking of Electronic Process	50
25.	ePay – eCourts Digital Payment	51
26.	New National Judicial Data Grid – Unique in the World	52
27.	Annexure – C Milestones in Process Re-engineering	
28.	Glimpses of Process – Re-engineering Exercise A) Case Type Uniformity	53
29.	B) Purpose Type Uniformity	54
30.	C) Disposal Type Uniformity	55
31.	D) Grouping Different Case Type Nomenclature under Standard Captions	56

32.	D) Grouping Different Purpose Type Nomenclature under Standard Captions	57
33.	D) Grouping Different Disposal Type Nomenclature under Standard Captions	58
34.	E) National Codification of Case Types	59
35.	F) National Codification of Purpose Types	60
36.	G) National Codification of Disposal Types	61
37.	H) National Codification of Adjournalment Types	62
38.	I) Facility to Map Local Types with National Types is provided in CIS 3.0	63
39.	J) Final Result of Codification of Case Types can be seen on New NJDG	64
40.	J) Final Result of Codification of Purpose Types can be seen on New NJDG	65
41.	K) National Codification of Acts passed by Central and State Govt.	66
42.	L) Repository of 2000 Acts & Rules passed by Central Govt given to all Courts	67
43.	M) Repository of Section info. with Punishment, Fine, Nature of Offence etc.	68
44.	N) Effect of this Process Re-engineering in Actual working of Officers	69
45.	O) Converting Criminal Process Generation in to Logical / Technological form	70
46.	P) Converting Civil Process into Logical / Technological form	71
47.	Q) Creating process Templates by Fetching Data from CIS – Auto-Generations)	72
48.	Actual Secured Generation of process with Unique ID and QR Code	73
49.	Annexure – D Management user, Report Generation and High Court NJDG	
50.	Remote Administration through management users of NJDG	74

51.	Leh-Ladakh – Jammu Kashmir	75
52.	Kupwara – Jammu Kashmir	76
53.	Tinsukhiya – Assam	77
54.	Query Builder – A wonderful tool towards desired reports	78 – 79
55.	17 Help Videos about Remote Administration & Management through NJDG	80
56.	Top 10 having Highest per judge pendency and States having Highest total pendency	81
57.	No. of Court Complexes per District (Top – 9 States)	82
58.	Top 10 States – Highest No. of Courts per District & States having lowest No. of Courts per District	83
59.	Institution Disposal of All States in the year 2017	84
60.	Disposal of National Lok -Adalat – NJDG	85
61.	Data Entry of Parties, Advocates, Mobiles + Mail ID.	86
62.	NJDG – Data Uploading Monitoring Tool	87
63.	New NJDG – Process Re-Engineering & Technology Upgradation	88
64.	New NJDG – Unification & Standardisation of IMP Data Elements	89
65.	Annexure – F Use of Video Conferencing and Statistics	
66.	Use of Video Conferencing under eCourts Project	90
67.	Top Five States in eCourts VC Calls in 2017	91

68.	Performance of States in VC Duration in 2017	92
69.	Top Five States in eCourts VC Duration in 2017	93
70.	Average No. of VC Calls per Court Complex in 2017	94
71.	No. of eCourts VC Calls in States in 2018	95
72.	eCourts VC call duration in States in 2018	96
73.	Top Five States in VC Duration in 2018	97
74.	Average VC Duration per Court Complex in 2018	98
75.	Country VC Systems – Conference calls in 2018	99
76.	Country VC Systems – Direct calls in 2018	100
77.	eCourts VC – Comparison of duration 2017-2018	101
78.	State wise growth of VC duration in 2017-2018	102
79.	Annexure – F Statistics of Public Video prepared by eCommittee	
80.	Citizen Help Videos made available eCourts Portal	103
81.	Citizen Help Videos in English made available You Tube	104
82.	Citizen Help Videos in Hindi made available You Tube	105
83.	Case Information System Help Videos made available You Tube	106
84.	Citizen Help Videos about eCourts Web Site and Mobile Application	107 – 113
85.	Citizen Help Videos – Most Popular	114
86.	CIS Help Videos for Judicial Officers and Court Staff	115

DELIVERABLES UNDER THE E-COURTS PROJECT AS PER POLICY ACTION

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
1	GOAL POSTS TO REACH		5-8	
✓	Optimum automation of Case work flow	Optimum automation of Case work flow	6	<p>Possible work of automation of work flow is already done and completed in CIS 3.0. Work flow automation was gradually increased from DC CIS 1.0 to 3.0.</p> <p>Further work flow automation can be taken to new heights by High Courts using QR CODE facilities already enables. They may further equip it with QR Code Readers, High Speed Scanners, Hand held devices and WACOM screens. QR Code generation will be key to this automation which is already provided in DC CIS 3.0 and HC CIS 1.0.</p>
✓	Use of Computers by Section of Registry for day to day processes and service delivery	Use of Computers by Section of Registry for day to day processes and service delivery	6	<p>Day to day processes like cause list, daily proceedings, business, disposal and order and judgment uploading is done by Court Staff. Now they are habituated to use CIS. As far Service of process in literal sense is concerned, NSTEP mechanism is enabled for all High Courts and District Courts. Now It is for the High Courts to amend their procedural manuals and introduce digitised or electronic processes to address delays in serving of processes its tracking and transparent record keeping. Training has been already given to all CPCs and three DSAs of each High Court. Learning material is already handed over to High Courts. Some of the High Courts are taking steps for execution of NSTEP, Process templates in local language. Areas where change in procedure may be necessary are pointed out to the High Courts and they were requested to implement this. It is observed that High Courts are positive towards this change.</p>

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	Unified CIS for all Courts	Unified CIS for all Courts	6	<p>In early days of Phase II DC CIS 2.0 migration from MySQL to PostgreSQL was achieved. This was a major shift in technology and with resolute intention FOSS philosophy is further strengthened in CIS 3.0 and related technological advances. Migrating from one version to another for entire country at more than 3500 locations is a challenging task. However, this task was performed twice in phase II of the project. After migration to CIS 2.0, after studying all suggestions, and keeping in mind goal posts like NSTEP, eFiling, ePay, Portfolio Management, mobile application CIS 3.0 is rolled out. After rolling out National Core Version of CIS 3.0 all the District and Taluka Courts completed migration and 18 High Courts also migrated to National Core HC CIS 1.0. Tasks at High Court was more challenging as more autonomy is expected and keeping core part intact was a challenge. All these challenges are successfully met and Country in real sense has unified under one umbrella CIS which is unique thing in the world.</p>
✓	Timely and regular updation of data on NJDG by all the Courts	Timely and regular updation of data on NJDG by all the Courts	6	<p>Data is replicated by Slony tool. It is realtime replication. Monitoring tools are given to the management users of NJDG. Management users can see places from where data is not uploaded and time lag since when data is not uploaded. Many High Courts have taken over management of their own servers and they are taking corrective measures with the help of these tools provided under NJDG. In the State of Goa Cloud is implemented. Using more advanced tools, updation has been happening with electric speed on cloud.</p>

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
<input type="checkbox"/>	Discontinuation of Manual Registers	Discontinuation of Manual Registers	6	Provision is made in CIS, already so many registers can be automatically generated in CIS. Practices of keeping books, registers differ from High Court to High Court. Those who have given their requirement in early days of CIS, reports as per their requirements are already provided. Apart from that report generation in PDF has been kept in periphery so that High Courts will be able to create customised reports to cater local needs. Now High Courts are taking decisions to do away with Manual Registers. Some of the High courts have even discontinued insisting statistical reports which they used to call from all Courts after regular intervals. Now it is for the High Courts to prepare desired reports and take decisions to discontinue manual registers. Fresh look on statistical reports in digitised form and extracting actionable information from data and converting the actionable information into execution plan needs to be worked out afresh against the backdrop of ICT. Some of the High Courts like Himachal Pradesh, Karnataka, Punjab, Haryana and Chandigarh, Andhra Pradesh, Madhya Pradesh, Bombay, etc. have already taken such decisions.
<input checked="" type="checkbox"/>	Ideal Central Filing Centre for with sufficient infrastructure	Ideal Central Filing Centre for with sufficient infrastructure	6	At most of the Courts this facility of Central Filing Centre (CFC) is available.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	Judicial Performance assessment through ICT	Judicial Performance assessment through ICT	6	Query Builder gives options to generate such performance assessment reports. CIS Software has provision to record norms according to type of the case and nature of disposal. Mechanism is already provided in Core structure. High Court can prepare desired reports for performance assessment in periphery development. Some of the High Courts have developed their own periphery for performance assessment. Punjab, Haryana, Chandigarh, Madhya Pradesh and Karnataka are some of the examples to demonstrate such periphery development. In the CIS provision is made to calculate norms for judgments and orders in various case types. Once master data is filled in properly norms can be calculated automatically. Some of the High Courts are doing this regularly,
☐	Scanning and Digitization of case record	Scanning and Digitization of case record	8	The Activity has gone out of the Scope of eCourts Project and Funds are transferred by the Government directly to State Governments under 14th finance Commission
☐	Court Record room management automation	Court Record room management automation	8	This is part of digitisation project therefore for component digitisation this activity will also go under 14th Finance Commission. Probably therefore funds are not provided for this activity under eCourts MMP.
☐	Court Libraries Computerization	Court Libraries Computerization	8	As on the date no hardware is provided for computerisation of Libraries in District and Taluka Courts. It requires cloud infrastructure. Therefore Infrastructure and robust connectivity are two prime requirements which are essential to implement this.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	Video Conferencing for all the Courts with Jails	Video Conferencing for all the Courts with Jails	6	Hardware purchased in the First phase and Courts are using it. Funds are allocated in second phase and all High Courts have almost completed the activity of procuring the hardware. Training programmes for use VC are organised for Judicial Officers and Prosecutors at Police Training Centre Gaziyabad. There has been huge increase in use of VC in the year 2017 and in the year 2018 it has gone to sky height. VC usage of eCourtsVC is above all other VC systems provided by NIC.
✓	Legal Offices (DLSA and TLSA) ICT enablement	Legal Offices (DLSA and TLSA) ICT enablement	6	Funds allocated to High Courts and Some of the High Courts have already purchased hardware whereas some of the High Courts are purchasing Hardware like computers, printers, Projectors etc. Most of the High Courts have completed the activity of purchase of hardware item for Legal aid authorities. In CIS modules like Lok-Adalat, Mediation are introduced which mainly are concerned with work of DLSA and TLSC). With the help of these modules, District wise, State wise, National information about mediation, lok adult, legal aid lawyers can be accessed through NJDG.
☐	WAN Connectivity for all the Courts	WAN Connectivity for all the Courts	6	BSNL is doing this connectivity work under supervision of DoJ.
✓	Solar energy for power backup	Solar energy for power backup	6	Funds have been allocated to High Courts for the said activity and some of the High Courts have completed the work.
✓	Mobile based service delivery through SMS and Mobile App. etc.	Mobile based service delivery through SMS and Mobile App. etc.	6	eCourts Services Mobile app is launched. More than 12 lac downloads till the date are registered. SMS Pull and SMS Push are also made operational. Service Count can be seen from the Government portal of etaal.gov.in . Electronic Transaction Count shown on this portal firmly established that records project is amongst the first top five projects in the country and second best project amongst the mission mode projects in the country.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	Change Management	Change Management	6	488 Master Trainers are trained under eCourts Phase-I and Phase-II of the Project. District System Administrators (DSA) are also imparted training of change management. These trainers have further trained officers and staff members. Such Change Management Training are continuously under taken after regular intervals. Change management Training was also given to IIM Bangalore and University of Berkeley, California USA.
☐	Cloud Computing	Applications and databases used by the Courts will be hosted in cloud environment , applications and databases used by the Courts will be hosted on cloud environment facilitated at State Data Centres.	8	Cloud Set up is ready. First Cloud is made operational at Goa. Once WAN connectivity is installed and made operational in other parts of the Country, further things can be started. BSNL is doing the work of WAN Connectivity.
☐	Document Management system for digital archiving/storage/retrieval	Document Management system for digital archiving/storage/retrieval	8	This is further extension of digitisation and as funds are allocated under 14th Finance Commission the activity the activity has remained on paper under the Action Policy Plan.
✓	Business Intelligence Tools enabled management Information System	Business Intelligence Tools enabled management Information System	8	Business Intelligence Tools are developed under New NJDG. After Big Process Re-engineering Exercise and Technological upgradation such tools are developed under new NJDG. India early days of the National judicial data Grid a very few of the reports were able to be generated. However generation of the management reports was limited to the extent of single establishment. Now after implementing uniformity in various nomenclatures and its national coding, generating management report has become easy and with the help of National query builder desired reports can be generated by applying different permutations and combinations.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
<input type="checkbox"/>	Administrative Work Flow Automation	Administrative Work Flow Automation	8	eOffice is given to High Courts and they are told to adopt the same. However it was found that eOffice consists of administrative work flow allocation and its set up is on cloud, therefore it may require funds for the infrastructure of Cloud. This Cloud set up would connect High Courts with District Court and Taluka Courts, therefore, it would require robust connectivity and offline mode in the event of connectivity failure. Once WAN is fully setup this cloud infrastructure can be created for eOffice.
2 IMPLEMENTATION MODEL			11-22	
<input checked="" type="checkbox"/>	PPMS portal will be overhauled and revamped with more useful and MIS like features in order to facilitate both PMU, through a more robust form and than present.	The requirements for resources like manpower of infrastructure may be met from Project Management and Monitoring Budget (Head No. 17) of the eCourts Project	17	PMS is developed by eCommittee for its internal management purposes and it caters optimum needs. PPMS is maintained in FOSS based GNU Cash. Its reports are regularly made available on eCourts Portal.
<input checked="" type="checkbox"/>	Mobile Application for location Courts and Number of Court Complexes	Mobile Application for location of Courts and Number of Court Complexes	18	This facility is provided in eCourts services Mobile Application which is already launched and presently being used by various stake holders.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	Unique Identification Codes to Judicial Officers of the Country	Unique Identification Codes to Judicial Officers of the Country	18	<p>JO Codes gives unique identity to the Judicial Officers. MH00520 is an illustrative JO Code. MH indicates Maharashtra State whereas 520 is unique code of that Officer. Likewise every Judicial Officer is identified in CIS with the help of JO Code. Using JO Code various facilities are given in NJDG, JustIS mobile application.</p> <p>In States like Gujarat while signing every judgement or order JO Code is mentioned invariably. Many States have provided portal wherein Officers are identified on their JO Codes. In many administrative communications JO Code is being mentioned by Court Administration and Officers.</p>
✓	Unique Identification Codes to Court Establishments	Unique Identification Codes to Court Establishments	18	<p>Establishment Codification is completed. Every court establishment is given unique code with the help of which it can be exactly traced in any computer system or database. MHAU01 is one establishment code taken for example. MH denotes State Maharashtra, AU denotes District Aurangabad and 01 denotes District Court Establishment. This is how more than 6500 Court Establishments are given unique codes. Every case in the Country has unique CNR wherein first six digits indicate establishment Code.</p>
✓	Laptops and Printers to Judicial Officers	Laptops and Printers to Judicial Officers	20	<p>Funds are allocated to all High Courts and most of the HCs have purchased infrastructure.</p>
3 INSTITUTIONAL STRUCUTRE			23-29	
4 INFRASTRUCTURE MODEL			30-45	

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	Judicial Service Centre (JSC)-1	JSC cum CFC will be utilised along with other services for the litigants like Case Status Information, certified copies, enquiries etc, only except where it is not feasible for space constraints to have a CFC.	30	These centres are already provisioned along with Common Filing Centre.
✓	Judicial Service Centre (JSC)-2	In New Court Complexes, provision of JSC-cum-CFC with sufficient space and civil/ electrical infrastructure will have to be ensured as primary requirement. The Technical specification of JSC-cum-CFC to be set up will be finalised as per the requirements of Court Complexes of varying number of the Courts.	30	With in the funds made available and prescribed standards, infrastructure is made ready for JSC cum CFC
✓	Computer Server Room (CSR)	As the server infrastructure will not be required at the Court Complexes coming up on Cloud, new Court complexes to be computerised in phase II will have Network Room instead of Computer Server Room	31	With available funds at disposal as per prescribed standards this activity is completed. Cloud infrastructure is successfully implemented in the state of Goa. Therefore, the network room at present is established in South Goa and North Goa which earlier was server room. The when connectivity is in progress in the other parts of the country and after establishing cloud connectivity with the cloud infrastructure, network rooms will be created at such locations.
5	SYSTEM AND APPLICATION SOFTWARE FOR COURT PROCESSES		46-56	
✓	Horizontal and vertical integration of CIS-1	In order to achieve a seamless compatibility of application and data of CIS across all Courts of the Country, the CIS should be horizontally and vertically integrated,	46,48,50	This has been done in DC CIS NC 3.0 and now it is integrated with HC CIS NC 1.0. Now in filing appeals or revision or like cases in High Courts which arise out of pending or disposed litigation in District and Taluka Courts, just by entering CNR No. Or Case Number, all the details of case pending or deposed by District or taluka Court are fetched which avoids duplicity of efforts in making data entry of parties.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	Horizontal and vertical integration of CIS-2	By Horizontal integration CIS of one District will be able to export to or import from case-data from another district Court. e.g. when case is transferred from one Court to another Court Complex, fresh data entry of the case will not be required and the system will be able to effect the transfer with all the case history details etc. intact in the system.	46,48,50	Establishment Transfer facility is made available in CIS 3.0. Using this facility cases can be transferred from one Establishment to another establishment within some seconds. e.g. In Maharashtra Land Acquisition Cases are first registered in District Courts and then those cases are allocated in various Talukas within the District. This entire process is now being done by establishment Transfer. This is how horizontal integration is achieved.
✓	Horizontal and vertical integration of CIS-3	By vertical integration of CIS of Courts of different hierarchy will be able to transmit data to and from each other e.g. a case record of lower court directly being available to appellate court through secured authentication mechanism, likewise an order issued by Higher Court being reflected on lower Court System of the concerned Court. This will require standardisation of data structures, metadata etc. across the CIS for all levels of the Court.	46,48,50	Vertical Integration has been done in DC CIS NC 3.0 and now it is integrated with HC CIS NC 1.0. Now, in filing appeals or revision or like cases in High Courts which arise out of pending or disposed litigation in District and Taluka Courts, just entering CNR No. Or Case Number, all the details of case pending or disposed by District Court are fetched which avoids duplicity of efforts in making data entry of parties and other important data fields. Thus, by using unified CIS in High Courts and District Courts, seamless exchange of information has become possible. Take for example an interim order in pending case of District or Taluka Court is challenged before the High Court. In such a situation with the help of vertical integration, High Court will be in a position to know the exact status of the case pending at the trial court and trial court will also be in a position to know the status of the case pending in the High Court. It will be easy for the High Court to make communication with the trial court through this unified case information system.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	Horizontal and vertical integration of CIS-4	One of the major baseline requirement of Case Information System to be refined and reengineered in Phase II of the project will be its readiness for interoperability with the central layer to be operational in the Integrated Criminal Justice System (ICJS) .	46,48,50	This is achieved in Telangana State. For Integrated Criminal Justice System (ICJS) it is necessary that not only FIR but Final Reports of Investigations are entered in CCTNS software. If such Final Reports (Charge Sheets) are entered this can be achieved to import data in CIS. This is successfully demonstrated in Warangal District of Telangana and replicated further. If this task is completed the same information will not have to be entered twice in the police stations and in the courts. It will be possible for the courts to use the information entered by police at the time of registering first information report or at the time of submitting final report of the investigation.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
<input checked="" type="checkbox"/>	Horizontal and vertical integration of CIS-5	<p>The integration of CIS horizontal and vertical, as mentioned above will only ensure its being communicative with Judiciary. The interoperability compatibility of CIS is able to export transmit the requisite information to the targeted stake holder that is Police , Jails, FSL etc. The information to be shared , with whom to be shared and the information that may to be shared with certain stakeholders will have to be worked out for this aspect of CIS.</p>	<p>46,48,50</p>	<p>This facility is part of joint venture of eCourts and ICJS Project. Requirements from the eCourts is Courts should share data and web services to the ICJS Team and similarly CCTNS has to share data of FIR and charge sheets to ICJS. Thus CIS is able to transmit the requisite information to the targeted stake holders i.e. Police, Jails, FSL etc. In short Police will share FIR No. And Charge Sheet information to the Court and in return Court will give CNR status to the police which will give them current information of that case. For achieving success in interoperability with other agencies like police, jail, official laboratories and other like agencies it is very necessary that the information system they use is silly and dedicatedly used for entering data and data is religiously entered without any exceptions. Once all the organisations are on the same page as far as ICT enablement is concerned, then such into interoperability is possible. However, at present courts are the only organisation where there is uniformity in use of technology, software and data is religiously entered in every district and taluka court situated in the country. The states where information of police can be used for interoperability are working on seamless exchange of information. The experiment at Telangana has given new hopes where thousands of human hours would be saved just by avoiding to enter the same data at two places.</p>

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	Horizontal and vertical integration of CIS-6	New version of CIS will be so developed that it is compatible with Cloud Architecture and takes care of the process reengineering requirements as per on going process reengineering exercise.	46,48, 50	Cloud is successfully deployed at Goa. For the first time in the country Case information software was to be deployed on the cloud infrastructure. The software was built taking into account requirements of the cloud infrastructure and necessary changes were made. After successful testing, cloud infrastructure is deployed in the state of Goa. Software is made cloud compatible. At Goa robust connectivity is available therefore CIS on cloud could be successfully deployed. The moment similar connectivity is available at other places same can be replicated at such places.
✓	CIS for High Courts	In order to ensure uniformity of the Central Processes and data requirements and allowing variances of the local processes and data requirements, a CIS based on Core periphery model is proposed to be deployed for the High Courts also. Case Information System software for Supreme Court is ready and under deployment which built on Open Source Technology Stack. An attempt will be made to enable uniformity of data structures with local variances so that horizontal and vertical integration can be made possible.	51	Process of Standardisation and unification of various key data elements like case types, disposal types, purposes types and adjournment types has been achieved. Every High Court has its own procedure, nomenclature and local practises. The trial courts in each state are using these practices since long. Therefore it was difficult for these courts to give up the nomenclatures which they were using since long. It was a big challenge to allow trial court to continue their local local practises and still to have a uniform structure, so that data of the country can be collected at a single place under a common nomenclature. A big process re-engineering exercise was undertaken and after studying all the varied types currently in use n various parts of the country common nomenclatures were identified and then codification exercise was undertaken. Thus, uniformity of important data elements with liberty to the Staters to use local nomenclatures was achieved.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	Documentation of CIS-1	In order to ensure smooth knowledge transfer and continuity of development and customisation support for the CIS across the Courts, all documentation relating to CIS will be maintained properly.	51	NIC has shared source Code of peripheral modules to all the States. For High Court entire table structure with field description is given. During process of migration knowledge transfer activity was conducted. After knowledge transfer various High courts could deploy their periphery structures and varied pattern of listing in the same unified software. In some States District Courts have implemented Copying Module and Nazarat Module as a part of periphery. Documentation by NIC Pune is ready and once it is approved, it will be shared to all the Courts after framing guidelines by the eCommittee for Core Periphery Distribution.
✓	Documentation of CIS-2	Documentation will involve functionalities Requirement Specification Software Requirement Specifications, Data Flow Diagram, Entity Relationship Diagrams etc. Software development team will have ensure this. This is very vital so as to avoid problems of software customisation and support when the team working on software development change or some officials move on for other positions. There will be documentation of tutorials on coming versions of CIS with audio video content on the same. .	51	Audio video Tutorials relating to basic ICT Training, help videos regarding working with CIS for officers and staff members are uploaded on public platforms, Manuals of Case Management through CIS, separate manuals as per role of the users, ePay Manual, NSTEP Manual, eFiling Manual and Six set of Manuals on CIS prepared by NIC Pune were circulated across the country by the eCommittee. Videos were uploaded on YouTube channel named "Case Information System CIS". NJDG videos for management and remote administration were made available on release portal. Inbuilt help in CIS 3.0 is made available in the software itself. This instant help will be available on screen to the user right at the time of using CIS. From any screen help icon is clicked help is generated relevant to the menu accessed by the user.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	Standardisation, integration and Unification	Meta data and data standards(MDDS). MDDS will be finalised in coordination with DoJ and High Courts.	52	Meta Data fields identified and codified Nationally. Case Type, Disposal Types, Purpose Types and Adjourment Types are something which are exclusively used in CIS and no where else. Therefore it was necessary to achieve unification amongst various types used in different part of the Country. Act Section Codification was there but it was only Act Number and year and it was limited to individual State Legislature or Central Legislation. However it was found that numbers of various Act and year were conflicting and, therefore, there was need to frame schema to achieve goal of National Codification of Acts passed by Centre and States. Now this codification is complete. Codification of Investigation agencies was necessary as information is often needed based on the type of Investigating agency. Delay Reasons codification is also complete. Codes used in CIS are Census Codes for States, Districts, Taluka and villages. For police Stations National codes given by CCTNS and for jails National Codes for prisons given by ePrisons are used All Norms of Government regarding standard meta data element is followed.
✓	Case Type Standardisation and Unification:	Case Type Standardisation and Unification:	52	After collecting case types from all Districts of all the States, and after studying them all to accommodate existing case types some common nomenclature were coined which are not too microscopic yet can accommodate existing case types used the by the Courts in the CIS. There after codification was done. This exercise was done to codify Case Types, Disposal Types, Purpose Types and Adjourment Types. Other Codification was done regarding so many data elements.
6 SCANNING, DIGITIZATION & DIGITAL PRESERVATION OF CASE RECORDS			52-56	

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
<input type="checkbox"/>	High Courts and District Courts	Basic records which has undergone weeding process will be scanned and digitised with given specification of PDF and water marking.	53	This activity is now out of scope of eCourts Project as funds has been directly given by Central Government to State Government under 14th Finance Commission
<input type="checkbox"/>	Document Management System	FOSS DMS, Dspace will be used, minimum necessary data entry, assessing the requirements of meta data for High Courts and District Courts.	54	This activity is now out of scope of eCourts Project as funds has been directly given by Central Government to State Government under 14th Finance Commission
<input type="checkbox"/>	Implementation Model for Scanning and Digitization	As per chapter 2 to ensure seamless integration and inter operability amongst the document repositories of the Courts across the country. Methodology and specification determination.	54	This activity is now out of scope of eCourts Project as funds has been directly given by Central Government to State Government under 14th Finance Commission
<input type="checkbox"/>	Long Term digital Preservation of Case Records - Retrieval/ Preservation/Archival	Porting soft copies in to DMS for day to day use. Technology of storage media Software used to access soft copy of the data Type of file in which soft copies are saved	54	This activity is now out of scope of eCourts Project as funds has been directly given by Central Government to State Government under 14th Finance Commission
<input type="checkbox"/>	Trusted Digital Repositories	The software solutions for digital preservation to address the obsolescence of technology with a very strategic and sophisticated methodology.	55	This activity is now out of scope of eCourts Project as funds has been directly given by Central Government to State Government under 14th Finance Commission
<input type="checkbox"/>	OAIS Framework	Open Archival Information System Framework provides methodology of software solutions for digital preservation .	55	This activity is now out of scope of eCourts Project as funds has been directly given by Central Government to State Government under 14th Finance Commission
7 VIDEO CONFERENCEING FOR COURTS AND JAILS			57-58	

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	Coverage of Court Trail for VC	Extending VC beyond remand - recoding of evidence in sensitive cases, legal aid cases between courts and jails , sensitive cases of child abuse, domestic violence and sexual abuse and similar like cases.	57	The activity is complete and presently being used for recording evidence, remand, meetings, and like purposes.
✓	Type of VC Solutions	Software based VC Solutions with 1MBPS bandwidth VC Sessions to be available for recording whether software based or studio based.	58	Vidyo desktop based software solution is used. Screen recording facility is available in Ubuntu-Linux Operating System customised and provided by eCommittee.
✓	Document Visualizer	Document sharing and viewing facility to be made available.	58	In Vidyo based software solution, screen sharing facility is available wherein documents can be shared to the persons joined in VC.
8 CAPACITY BUILDING MEASURES			59-63	
✓	ICT Training Education	Keeping in view encouraging experience of Phase-I similar training programme will be continued in Phase-II.	59	ICT Training is given in phase I as well as Phase II. Training videos are also uploaded for basic ICT Training.
✓	Computer Training Labs at State Judicial Academies	Full Fledged computer lab to the SJAs Phase II will provide funds for infrastructure keeping view that lab has to cater needs of ICT training of at least 30 Judicial Officers at a time.	60	Funds are allocated to all High Courts and most of the HCs have purchased infrastructure.
✓	VC at State Judicial Academies	Studio based VC Set Up for SJAs	61	Fund are allocated to High Court for this activity
✓	Video Streaming and Webcast Portal	Video Streaming and Webcast Portal	61	With assistance of NIC Video Streaming and Web Casting is made available and various programmes now a days are being web cast or live streaming is done.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
<input type="checkbox"/>	Learning eTools	Learning Management System (LMS) software application for administration, documentation, tracking, reporting and delivery of eLearning education courses or training programme. Trainee should be able to access this system without actually visiting the academy.	62	Learning Management Solutions (LMS) needs to be provided to SJAs.
<input checked="" type="checkbox"/>	Regular Change Management Exercise	Attuning of mindsets to adopt new modes of working. Mindset change and attitudinal orientation	62	Training programmes conducted from time to time.
<input checked="" type="checkbox"/>	ICT Training for electronic evidence	Entire gamut of electronic evidence , its preservation and evidentiary value	63	Six Trainings are organised at National Police Academy Hyderabad
<input checked="" type="checkbox"/>	Post Process re-engineering Change Management	Changed ways of working - Redesigned/renewed court processes deploying new versions of CIS	63	Training is completed for all CPCs and DSAs of all High Courts. In this Training all 24 CPCs, 75 DSAs is complete. These DSAs were asked further train Judicial Officers and Staff members.
9 JUDICIAL PROCESS RE-ENGINEERING			64-67	

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
<input checked="" type="checkbox"/>	1. Automation of Process Serving	Sending process to Courts and Parties through mail.	65	<p>Now Civil and Criminal Process templates provided in CIS are exactly as per format and contents as prescribed in the Code of Civil Procedure and Code of Criminal Procedure . Electronic processes can be generated through CIS 3.0. Every Process generated has unique process ID and with QR Code. After receiving processes with QR Code either with soft copy or hard copy, just by scanning the QR Code current status is made available through mobile app. There is provision of entering mail address either during entering information of witnesses or during generation of processes. Once processes is published mails are automatically sent on the entered mail address. Process generated are secured and cannot be easily edited for its contents.</p> <p>Apart from sending emails, there is dedicated system called NSTEP (National Service and Tracking of Electronic Processes) which electronically transmits digital processes from one Court Establishment to another or from Court to Police Station or Officer. Processes can be allocated to the bailiffs and processes directly appear on the mobile devices of the belief. When bailiff goes for serving the process, he can electronically opt in acknowledgement, he can take photograph, GPS coordinates can be captured and immediately the status of the service is replicated to the main NSTEP portal. This process will help to tackle delay in process serving.</p>
<input type="checkbox"/>	2. No manual Registers	Registers for Institution and Other Registers in eForm.	65	<p>Facilities are made available in CIS to dispense with such Registers. Such reports in the form of Registers can also be prepared by High Courts as per their own requirements under periphery development. Now some of the High Courts have done this whereas others are in processes.</p>

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	3. eFiling	eFiling portal for High Courts and District Courts.	65	eFiling Portal is launched for District Courts and High courts. It caters requirement of the entire Country. It is already successfully tested by majority of the High Courts. Some of the Courts have gone live whereas some are in the process. In the eFiling software, facility of eSigning is provided so that those who do not possess token for making digital signature on pdf documents, will be able to use facility of eFiling using eSign facility. Through eFiling one can easily track development in eFiled cases.
✓	4. Judicial Financial Book Keeping Practice	Latest scientific method of book keeping suitable for Courts is Double Entry System of Book Keeping .	66	Nazarat Module is already given to all High Courts and its source code is already shared to all High Courts long back. In Karnataka Nazarat module used for accounting purposes in the entire State.
☐	5. Administrative Process Automation	File movement, tracking, leave management, personal information management system etc. are need of the day. This needs detailed study and adequate financing. This needs serious consideration.	66	Although directions are given by eCommittee to implement eOffice, it requires Hardware, customisation, training and support. NIC's Cloud infrastructure for eOffice is paid service and funds are required. eOffice requires Cloud set up to connect High Courts with District and Taluka Courts so that file movement, tracking etc. can be easily handled and will minimise delays. . For setting up cloud for each State, funds may be required to be provisioned.
☐	6. Exploring paperless Courts	Will have to be studied using FOSS. Will have to be studied first and will be taken up only if cost effective. Facility for the judge to take notes and emarking.	67	Hardware requirements like WACOM, High Speed Scanners, digitised files, High Speed Bandwidth at local level needs to be provisioned . Once any activity is proposed and when budgetary allocation is absent, it is deemed that it is for future reference and preparedness . Apart from this digitisation activity is separated from the project and funds are released to State Government under 14th Finance Commission. Movement of digitised file will come into play one when digitisation project will be rolled on. However as of now funds are not allocated for District Court Digitization.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
10	WORK FLOW AND PROCESS AUTOMATION TOOLS & MEASURES		64-67	
<input checked="" type="checkbox"/>	1. Office email for Court Officers and Staff	All Court Officials of Class I, II and III will have to be provided official email address. Every High Court will be give Delegated Admin Power.	68-69	As of now emails are created for all Court Establishments, and Judicial Officers, work of giving email IDs to Court staff is in progress. Email creation process has been automised and as a result every mail account creation is approved at three level before it reaches committee. The entire process of approval and verification is done online.
<input type="checkbox"/>	2. Digital Signature for Judicial Officer and Court Staff	Digital Signature for Judicial Officer and Court Staff	69	High Courts are already asked to give digital signature token for its Judicial Officers. Some fo the High Courts have already provided digital signatures token to the Judicial Officers, whereas some of the States are yet to procure such token for making digital singatures. In addition to this, eCommittee is planning to e-Sign Desktop application for all the Judicial Officers which is network based (Connectivity dependent) solution.
<input checked="" type="checkbox"/>	3. Authentication devices for Process Servers	It is required to modernise processing serving methods like PDAs or similar GPS - GPRS devices with camera.	69-70	Mobile Application for NSTEP is launched. It is given to all the High Courts and now funds are allocated to High Courts for purchase of hand held devices. Training programme is arranged to give traning about this application and methodology as to how process will reach to bailiff from one Court to another. All CPCs and three DSAs of each State are given training about use of NSTEP. They were told areas where change in procedure may be necessary. Now High Courts have started generating electronic processes through the Case Information System whereas service through mobile devices will be reality after procurement of such mobile devices.
<input type="checkbox"/>	4. eOffice Suit for Indian Judiciary	File management and tracking software, Leave Management System, Personal Information Management System, Tour Management System,	70	This point is already discussed above where eOffice is already mentioned

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
<input type="checkbox"/>	5. Financial Accounting system with pay-rolle management system	Financial Accounting Software with Payroll Management System	70	This is covered in eOffice Premium suit application
<input type="checkbox"/>	6. eProcurement Portals for High Courts	High Courts will be required to join the CPP (Central Pubic Procurement Portal) which is available for State at least for publishing tenders.	70	GEM is under Progress wherein logins can be given to High courts. At present due to various deficiencies with GEM for majority of the items High courts have gone for tender processes. The activity is not covered as eCommittee controlled activity.
<input type="checkbox"/>	7. Other FOSS applications for Automation of work	Other FOSS Applications for automation of work flow and automation	71	What exactly is proposed is not known.
<input checked="" type="checkbox"/>	8. Integration between all Automated Applications	All process automation solutions should be integrated to avoid duplicity of efforts. Ultimately it should lead to Enterprise Resource Planning (ERP).	71	All Applications developed under eCourts now can be integrated with each other. This facility is presently being used for establishment transfers or appeal filing at District Court or High Court.
11 JUDICIAL KNOWLEDGE MANAGEMENT SYSTEM			72-76	
<input type="checkbox"/>	Judicial Knowledge Management System	Integrated Library Management Software (ILMS). A FOSS ILMS software will have to be deployed for Court Libraries similarly on model of CIS deployment i.e. State Level Cloud Environment.	72	KOHA Built is ready. Therefore software part is complete. Training was also planned however it also requires hardware provisioning for cloud infrastructure along with robust WAN connectivity.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
<input type="checkbox"/>	Official Case Law Journal	A Comprehensive Software Mechanisms in the form of Legal Data Base which has repositories of judgements of Supreme Court and all High Courts Provision of porting meta data of Headnotes. Federated Architecture catering needs to be High Court. Will be developed on FOSS Technology.	73	This at first place appears to be part of the process of digitisation and building repositories. Once repositories are in place such comprehensive software mechanism in the form of Legal Data Base can be used thereafter. For Official Case Law Journal it needs some policy level decisions to be made before entering into this area.
<input checked="" type="checkbox"/>	NJDG Data mining for policy formation and assistance	NJDG data need to be stored methodically and required to be mined and analysed for meaningful assistance in policy formation and decision making.	74	This activity is completed under new NJDG
<input type="checkbox"/>	Auto pulling of data from State Clouds to NJDG	Uploading mechanism will shift from auto pull from State Cloud installations which will ensure smooth updation of data on NJDG	74	Auto Pulling of data is enabled at Goa Cloud. However for other States it requires robust connectivity for setting up cloud for CIS. Therefore auto pulling data on NJDG for other States can be achieved only when Cloud is enabled. However Cloud cannot be commissioned for want of Connectivity.
	Data Analytics for following purposes	Data Analytics Tools in NJDG for following purposes	74	The activity is complete.
<input checked="" type="checkbox"/>	A. Data Ware Housing	Process of extracting and storing data from various resources. Various Dynamic and comprehensive Reports generation.	74	NJDG is Data Ware house and achieves the objectives.
<input checked="" type="checkbox"/>	B. Data Mining	Identifying hidden patterns in data. Meaningful and Insightful Trends. Litigation and Adjudication Trends and Judicial Performance Enhancement measures.	75	After standardisation and unification of Nomenclatures, National Codification of imp data elements and elastic search data base for New NJDG finally made it possible to achieve this objectives.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	C. Online Analytical Processing	Querying multi dimensional data base. Summation of data base into highly complex tables with summarised reports.	75	After standardisation and unification of Nomenclatures, National Codification of imp data elements and elastic search data base for New NJDG finally made it possible to achieve this objectives. There is National Query builder which can be used to make queries to the data base by different permutations and combinations and it has a capability to generate the desired results.
✓	D. Business Intelligence Tools	Data Mining and OLAP will form the engine for B.I. Tools for NJDG which will help in the most informative management information system.	75	After standardisation and unification of Nomenclatures, National Codification of imp data elements and elastic search data base for New NJDG finally made it possible to achieve this objectives. Now National judicial data Grid is the most informative management information system showing the information about pending and disposed cases in the country in most powerful way and it can generate actionable information. There is no other comparison in the world with existing new National judicial data Grid.
✓	E. Judicial Management Information System	Judicial Management Information System	75	After standardisation and unification of Nomenclatures, National Codification of imp data elements and elastic search data base for New NJDG finally made it possible to achieve this objectives. National judicial data Grid has two faces one is the public portal where as other is the management portal. The management portal has a facility to create login users at a district or High Court level. The judicial management, planning monitoring and administrative decisions can be taken with the help of information generated through the National judicial data Grid. Recently a mobile application is launched which exclusively deals with judicial management information system. This mobile application "JustIS" has become very popular among judges.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	F. Litigation and Adjudication Pattern Analysis	Litigation and Impact of Analysis on any variations governing factors relating to law, amendments, jurisdictions, recruitments etc. Adjudication Pattern Analysis	76	After standardisation and unification of Nomenclatures, National Codification of imp data elements and elastic search data base for New NJDG finally made it possible to achieve this objectives.
✓	G. Impact of Analysis on any variations governing factors relating to law, amendments, jurisdictions, recruitments etc.	Impact of Analysis on any variations governing factors relating to law, amendments, jurisdictions, recruitments etc. Judicial Performance enhancement measures for policy makers and policy planners. Comprehensive suit for these management solutions will be called JKMS.	76	After standardisation and unification of Nomenclatures, National Codification of imp data elements and elastic search data base for New NJDG finally made it possible to achieve this objectives.
12 HUMAN RESOURCES			78-82	
13 SERVICES DELIVERY			83-87	
SERVICES UNDER THE PROJCT				
✓	SERVICES - Web Portal	ECOURTS UNIFIED PORTAL	83	eCourts Portal is most used portal which current records more than 10 million hits every day. eCourts Portal shows pendency and disposal figures of the District Courts and High Courts. eCourts portal contains manuals and FAQ and Help videos. eCourts Services Unified Portal is now made bilingual. It is not only the web page which appears in bilingual but results generated after fetching data like cause list, case status etc. are also shown in regional languages.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	SERVICES - eFiling Portal	Filing of online cases at High Courts, District Courts and Taluka Courts. Submitting hard copies will have to be submitted with in definitive time line.	83	Portal is ready, its security audited and can be accessed at https://efiling.ecourts.gov.in . eFiling is already successfully tested by majority of the High Courts. Some of the Courts have gone live whereas some are in the process. In the eFiling software, facility of eSigning is provided so that those who do not possess token for making digital signature will be able to use facility of eFiling using eSign facility.
✓	SERVICES - eCourts National Portal	More meaningful	84	Search of Judgments and orders is now separated, names of Judges can be searched. Previously one has to go through entire list of judges and then selection was required to be made for the chosen name from the drop down list. Now it is simple search. In the Cause list now one can search name or case number and there is no need to go through entire cases listed on the cause list to find desired case or party. Caveat Search is now made available. QR Cod facility is made operational on the portal. Any party can take a print of cause title which gives basic information of the case along with QR Code. This cause title can be pasted on the brief or docket and then case status can be found just by scanning QR Code with the help of mobile application. Help Videos and How to section is made more meaningful so that a normal literate litigant can access then website to extract desired results. Facility of search by CNR Number is made available on services portal. Court Complex Location is new facility made available on services portal. Information of process status is given in the case history details.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	SERVICES - National Judicial Data Grid	National Judicial Data Grid	84	New National Judicial Data Grid is made live. It is based on huge process re-engineering work and technological innovation. Now case type wise pendency, age wise pendency, purpose type wise pendency, delay reason wise pendency, disposal type wise pendency, drill down reports and all those regular counts which were available in old NJDG can be accessed through new NJDG.
✓	SERVICES- Provision to monitor uploading - Date of Uploading	Provision to monitor uploading - Date of Uploading	84	Tools are provided to management users of NJDG wherein one can know whether data is uploaded, what is the time lag or delay, whether server is properly functioning etc. One can also know as to when data was uploaded. These tools make monitoring of uploading of data easy.
✓	SERVICES- Automatic triggers /alerts when data has not been uploaded	Automatic triggers /alerts when data has not been uploaded	84	Automatic alerts are shown in red colour in NJDG when data is not uploaded. SMS alerts are given and mailing alerts are given to Judges and District System Administrators. In the JustIS mobile application, Judicial Officer can monitor updation of data limited to his own Court. one can easily know whether data is uploaded or not. As mobile application is continuously updated, immediately one can gather status of the uploading of data. When the policy document was written at that time it was not conceived that the Mobile Application can be used for automatic alerts instead of SMS or mails. eCourts Services Mobile App gives information to the world at large whether data relating to any Court establishment is updated or not. Therefore, now not only judges but lawyers also come to know whether data has been uploaded or otherwise.
✓	SERVICES - Auto alerts of undated cases through SMS email and Dash Boards	Auto alerts of undated cases through SMS email and Dash Boards	84	Alerts for undated cases is provided through email, SMS and Dashboard.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	SERVICES - Graphical Charts for reports of NJDG	Graphical Charts for reports of NJDG	84	Pending and Disposal Dash Board of New NJDG is based on Graphical Charts and portal is made open to public at large.
✓	SERVICES - Judicial Performance Assessment Mechanism through NJDG	Judicial Performance Assessment Mechanism through NJDG	84	Judicial Performance assessment report is provided in CIS as directed by SC. Query Builder can generate desired reports for performance assessment. Apart from that norms laid down by High Court for disposal of cases can be generated through CIS and performance assessment report can be generated as per the requirements of the High Court.
✓	SERVICES - All Periodical Returns of District Judiciary to be made available through NJDG for High Courts	All Periodical Returns of District Judiciary to be made available through NJDG for High Courts	84	Report Generation and requirements vary from High court to High Court therefore statistical reports has been kept as part of periphery and High Courts can generate and customise all kinds of reports from their State Data Servers. More than 80 different kinds of reports are provided in CIS. More than 30 different kinds of reports are provided to management users of NJDG.
✓	SERVICES - Communication Pipelines for Judicial Data Transmission from lowest court upto Apex Court.	Communication Pipelines for Judicial Data Transmission from lowest court upto Apex Court.	84	This has been done in DC CIS NC 3.0 and now it is integrated with HC CIS NC 1.0. Now in filing appeals or revision or like cases in High Courts which arise out of pending or disposed litigation in District and Taluka Courts, just by entering CNR No. Or Case Number all the details of case pending or deposed by District Court are fetched which avoids duplicity of efforts in making data entry of parties.
✓	SERVICES - Pendency Arrears and Institution/Disposal Statement	Pendency Arrears and Institution/Disposal Statement. This will be based on Act Sections, offences viz economic offences, offences again women, children, senior citizens etc.	84	This statement is provided in New NJDG in graphical as well as drill down data pattern.
✓	SERVICES - District Court Websites	District Court Websites will be deployed with functional integrated links to National eCourts Portal Case related information	85	District Court web sites recently migrated to advanced version of Drupal.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
<input type="checkbox"/>	SERVICES - GIGW and W3C Compliant website	GIGW and W3C Compliant website	85	All the compliances for GIGW and W3C are already made in eCourts Portal however certificate has not been obtained. NIC needs to start process for the same at the earliest.
<input checked="" type="checkbox"/>	SERVICES - Localisation Project Management Framework (LPMF)	Localisation Project Management Framework (LPMF) for District Court Websites so as to enable content to be accessed in local languages also.	85	Now main eCourts Portal itself is made available as bilingual website. Besides that data shown on such bilingual website is also in regional language. Apart from that on the district court website also provision is made for bilingual access of the information relating to cases.
<input checked="" type="checkbox"/>	SERVICES - Disabled friendly website	Disabled friendly website	85	eCourts Portal is disabled friendly and certified by Authorised Agency.
<input checked="" type="checkbox"/>	SERVICE - Mobile Application	Mobile Application	85	eCourts services Mobile Application is released. So far four versions of the mobile applications are released. Mobile is extremely popular and till this date 12 lakh downloads are recorded. Rating of the app is 4.4 on google play store and can be said to be good rating for the mobile application. Mobile application besides search of case status on different criteria also gives facility of cause list and small portfolio management tool called my cases. In the latest version of the mobile application majority of the High Courts and all District and Taluka Courts are covered. QR Code facility makes mobile application innovative and a tool of mobile governance.
<input checked="" type="checkbox"/>	SERVICES - SMS Gateway	SMS Gateway	86	SMS Gateway for the eCourts is obtained.
<input checked="" type="checkbox"/>	SERVICES - Push SMS	Push SMS	86	Push SMS facility is operational in all District Courts and High Courts.
<input checked="" type="checkbox"/>	SERVICES - Pull SMS	Pull SMS	86	Pull SMS facility is made operational in all District Courts and High Courts.
<input checked="" type="checkbox"/>	SERVICES - Email Facility	Emailing alerts	86	Automated mailing facility is made operational at all District and Taluka Courts of the country.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	SERVICES - Information Kiosk With Printing Facility	Information Kiosk With Printing Facility	86	Information kiosk are being purchased by High Courts and facility is given in CIS to connect such kiosk with CIS. All Courts are have made available this facility for benefits of litigants and lawyers.
✓	SERVICES - Certified copiers online with bar Coding	Certified copiers online with bar Coding	86	QR Code facility has been provided in CIS 3.0, QR Code provides unique identification to the copy of the case. It is now more accepted technology as compared to bar code. QR Code is comparatively cheaper to end users to read QR codes. High Courts have given tokens to Judicial Officers for digital signature and many District and Taluka Courts are using such digital signatures before uploading copies of their judgments or orders.
✓	SERVICES - ePayment Gateway	ePayment Gateway	86	ePayment Gateway has been provided for payment of Court Fees where there is facility of the State Government to accept Court Fees or Judicial Deposits. The facility is provided under common unified portal https://pay.ecourts.gov.in
✓	SERVICES - eCourt Fee	eCourt Fee	86	This is made operational in Maharashtra, Haryana, Punjab on https://pay.ecourts.gov.in eCourts Fees is also made operational in eFiling Portal for Delhi, Punjab, Andhra Pradesh, Telangana, Maharashtra, Haryana, Tamilnadu, Himachal Pradesh etc.
✓	SERVICES - Other Payment	Other Payment	86	This facility is made operational in Maharashtra as pilot on pay.ecourts.gov.in
✓	SERVICES - Portfolio Management System	Portfolio Management System	87	Portfolio Management services were given to UMANG, CSCs and discussions are on the way for LIMBS.
✓	SERVICES - Inter operability of Other Components of Justice Delivery System	Inter operability of Other Components of Justice Delivery System	87	This facility as a part of ICJS is taken up at Telangana.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	SERVICES - eCourts Project Litigant Charter	eCourts Project Litigant Charter	87	Entire Litigant Charter Services is complete. Besides prescribed services some additional services are also given under Litigant Charter.
EXTRA WORK DONE THOUGH NOT MENTIONED IN ACTION PLAN				
✓	NSTEP	What was proposed under policy action plan document was serving processes through mail and giving hand held devices to bailiffs. However NSTEP is complicated dedicated system of electronic transmission, tracking and repository of process status.		Dedicated System where digital processes are generated in secured manner, transmitted to authorised users from where processes are allocated to different jurisdictions and local bailiffs. The processes are automatically transmitted to mobile devices of the bailiffs. Bailiffs can take photograph, can take on screen signatures, GPS coordinates are captured and instantly process service status can be updated upon portal from where it reaches to local software. Additionally processes can be served through mail.
✓	eCourts website made bilingual	Only District Court website links were to be given in regional language but data shown will be fetched in English. However what is delivered is District Court web sites are given bilingual links and apart from that multilingual eCourts Portal has gone step ahead than what was proposed in the project		Not only contents in the website are in local language but data shown viz. causeless, case status, etc. is also in local language.
✓	eSign besides HC asked to give digital signatures.	eSign is new secured way of digital signatures which does not require token		This facility is made operational in filing so that persons who cannot afford digital signature token can also take benefit of technological advances like efilings and digital signatures.

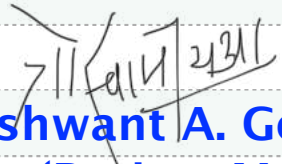

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	Mailing account creation software	Automation of work process flow of mail account creation		Now any officer or staff can create online account under domain aij.gov.in or indiacourts.gov.in . Entire process is online and paper work is brought to zero. eCommittee Development Team has designed this system and presently it is used by all High Courts for step by step verification and authorisation for creating mails accounts for Courts or Officers.
✓	Templates of standard orders and Judgments	Process re-engineering exercise during development of CIS 3.0		Many a time there are hundreds of parties in a case and typing names and addresses of such parties consumes enormous time. Some times mistakes do occur in typing such details, some times important elements like interest, set off or property disposal are missed. So to avoid these things templates are prepared which will capture all essential details of title clause of the judgment and also remind certain important elements in specific types of cases.
✓	Templates of Issues . Charge framing	Standard templates are provided in CIS 3.0 wherein standard Charge framing text content as provided in IPC or CrPC are taken and with the help of software QR Code based Charge with all details of the case, court, Judge and offence charged can be crafted with in minutes. This will help the officers to devote maximum time to record evidence or hear arguments.		All offences under IPC, other important Acts, charge can be framed within some minutes. It gives scope to user to amend, edit or completely change the template text. It only assists Judicial Officer to use his valuable time for meaningful work rather than stereo type work.
✓	Intelligent Templates for process generation	All Civil and Criminal Processes as provided under Code of Civil Procedure and Code of Criminal Procedure are provided in CIS 3.0. All details are fetched as per selection made by user.		Creating intelligent process was really a huge task. It will save thousands of judicial hours of staff and judicial officers which previously use to consume in writing same processes time and again for different parties. Instant help is provided to the user which will guide how to prepare processes. Help is so easy that any body who knows which process is to be selected can generate and publish the processes.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	Act Section Codification	National Codification of Central Acts and State Act is provided by eCommittee. Schema is prepared explaining logic as to how that codification should be done. All Central Acts Repository is created in the office of eCommittee and it was circulated to all the High Courts. This Codification has helped a lot in new NJDG and if it is adopted by other agencies will create huge impact. eCommittee has supplied data base of more than 2000 Central Acts and Rules updated with National Codes. Previously Acts were entered as free text entry in local masters therefore there was no uniformity. In one Stat it is mentioned as IPC, in second State it was Indian Penal Code in third state Penal Code in India. Their chronological position in master was also not common between two establishments with in the same District. This was creating problem so eCommittee supplied Act data base of more than 2000 Acts wherein every entry bears National Code to each Act which will be same although out the country.		Every State Legislature and Central Legislature give Act No. And year to each Act they pass. However, there are various examples where Act No and Year are exactly identical but Statutes are different from State to State. There are pre independence Laws which are adopted by various States and after adoption those are amended from time to time. Therefore identification of such adopted Laws from State to State has to be uniquely identified. Therefore this schema is prepared which worked perfectly during CIS 3.0, New NJDG and also during inter operability in ICJS.
✓	JustIS Mobile App	Personalised Mobile Application for Judicial Officer to effectively manage his court		Tools provided in JustIS Mobile App has created a positive waive in the Judicial Officers in the Country. The app gives facility to Judge effectively organise, manage and monitor his business in the Court. This is unique initiative of eCommittee of Supreme Court of India

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	Help in CIS	Instant help on the screen while using CIS		Help is already provided through help videos, manuals however, staff or officer generally needs help while actually working on CIS and many a times manuals or videos are not available instantly then and there. Therefore, instant click help for each and every section along with photos explaining in detail about every small functionality in CIS. The only thing user has to do is to click help icon. The help section provided in CIS 3.0 runs 643 pages and thousands of images.
✓	Section Data base	Now in CIS instant help is provided to know whether offence is bailable or non-bailable, cognizable or non-cognizable, what is the maximum sentence that can be imposed, whether offence can be tried by Magistrate or Sessions Judge etc.		A Huge data base in logical form is created which can be accessed by user to know punishment, nature offence, type of sentence or the court which can try particular offence. etc. This has given instant help to Judicial Officers and staff while doing their day to day work.
✓	Help Videos of Mobile Application	Almost 16 different help videos of mobile application are uploaded on you tube and there are lakhs of hits to watch the videos.		There are different parameters on which a case can be searched. There are smart ways to manage portfolio tool of my cases provided in the mobile app. For each search parameter different video is released and uploaded. These videos are being watched regularly by thousands of users daily.
✓	Litigant Help videos	It was felt that litigants also need help while accessing website. Therefore help videos are created and uploaded on you tube and eCourts website.		Videos are released in English and Hindi. There are lacs of hits from eCourts Portal which shows that it was necessary step for litigants to provide such audio video help material.
✓	Specialised Cause List to Police Stations	Police Station daily receives cause list of only those cases which belong that police station		Now police station mail ID can be entered and such personalised services can be given to Police Stations or Jails.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	QR Code	It is now possible that a litigant or Court can take print out of cause title of every case which contains QR Code. Now every Judgment or Order of the Court will have QR Code. Every summons or warrant of the Court will have QR Code, Every form generated will have QR Code. Every Case can be tracked with QR Code. Mobile Application gives facility to scan QR Code and give current status of the case.		<p>QR Code prints on hard copy has power to connect with current status of the Case. This power is will connect any QR Code with the current case status. Now Courts, Police, Big Institutional litigants are pasting QR Code bearing cause title to their dockets. So that every time case comes before them they automatically get current status.</p> <p>When new case is filed, receipt of filing or registration generated bears QR Code so litigant can scan QR Code and get current status wherever he desires.</p>
✓	CNR Number	Case Number Record (CNR) Number a unique concept is introduced.		CNR Number is entire DNA of case which traces State, District, Court Establishment, case type and Case Number and year of the case. As this number contains every information, while searching on the basis of CNR number user does not have to enter information about State, District, Court Complex, Case Type, Case Number and year. Just one number saves lot of efforts which otherwise user had to put in to reach to particular menu to search. QR Code has made it more easy as you need not have even writ that number simply scan and search. This is how the journey started with CNR has reached upto QR Code.
✓	Unique Process ID	Every Process generated in CIS has unique ID. This ID contains CNR with additional details.		When any party or witness or accused receives process with printed QR Code, and if wants to know what is the case about, what the case the status, he just have to scan the QR Code and the case status will be before him. This Process ID can help to track entire process history as one process ID in the same case issued to different defendants will not match. This will help in further technological upgradation and innovation.

Yes/No	Deliverables under the project	Detailed Description as given in Policy Action Plan phase II	Page No	Present Status and things required to be done
✓	CPMS	Court Project Management System, is the tool developed by NIC for the purpose of configuring CIS product according to the requirements of the respective state. It contains the repository of captions, menu items, alerts, messages, functional variations, configuration of build for every state and bilingual requirement for every state. When a new version is to be released, the relevant data is updated and the build is automatically prepared through CPMS.		Court Project Management System, is the tool developed by NIC for the purpose of configuring CIS product according to the requirements of the respective state. It contains the repository of captions, menu items, alerts, messages, functional variations, configuration of build for every state and bilingual requirement for every state. When a new version is to be released, the relevant data is updated and the build is automatically prepared through CPMS.
✓	eCourts release portal	Intranet URL is shared with all the States and Districts for downloading the new releases for the CIS (both for District Courts and High Courts), patches, to view manuals, videos etc. Every single release is date wise available on the release URL for the respective state. In all as on date, 390 releases in all are made and are well documented since 2013 or since release of 1 st National Core version for District Courts.		Intranet URL is shared with all the States and Districts for downloading the new releases for the CIS (both for District Courts and High Courts), patches, to view manuals, videos etc. Every single release is date wise available on the release URL for the respective state. In all as on date, 390 releases in all are made and are well documented since 2013 or since release of 1 st National Core version for District Courts.
✓	Unified HC Services Portal	Unified HC Services portal is now part of eCourts Portal. Now Cases Status of 18 High Courts can be searched on this services portal		Apart from Case Status, causeless, Judgement order search can be made on this portal. CNR Number search is also made available on this portal. Search on different parameters like party name, advocate name, case type, filing number

Statistics of Public Videos prepared by eCommittee

Citizen Help Videos made available eCourts Portal

The screenshot displays the eCourts portal interface. At the top left, the logo for 'ECOURTS SERVICES' is visible, along with the text 'High Courts of India' and 'District and Taluka Courts of India'. The top right navigation bar includes links for 'Home', 'NJDG', and 'Supreme Court'. The main heading is 'eCourts : Help Videos', with a breadcrumb trail 'Home > Help Videos'. Below this, a grid of nine video thumbnails is presented, each with a red circular icon and a title:

- 1 Basic introduction to eCourts site
- 2 District Court Website - Salient Features
- 3 NJDG Public Portal - Features and facilities
- 4 Case List search
- 5 Party name search - Case Status
- 6 CNR search - Case Status
- 7 Case Number search - Case Status
- 8 Filing Number search - Case Status
- 9 Act based search - Case Status

Citizen Help Videos in English made available You Tube

The screenshot shows a YouTube channel page for 'eCourts & NJDG English'. The channel has 17 videos and 14,736 views, last updated on July 3, 2017. The playlist contains seven videos, each with a thumbnail, title, channel name, and duration.

Video Number	Video Title	Channel	Duration
1	Advocate Name - Bar Code - Date Case List - District and Taluka Court Services	eCourts & NJDG Public	4:57

7	CNR Number - case status - District Court Services	eCourts & NJDG Public	1:20

Citizen Help Videos in Hindi made available You Tube

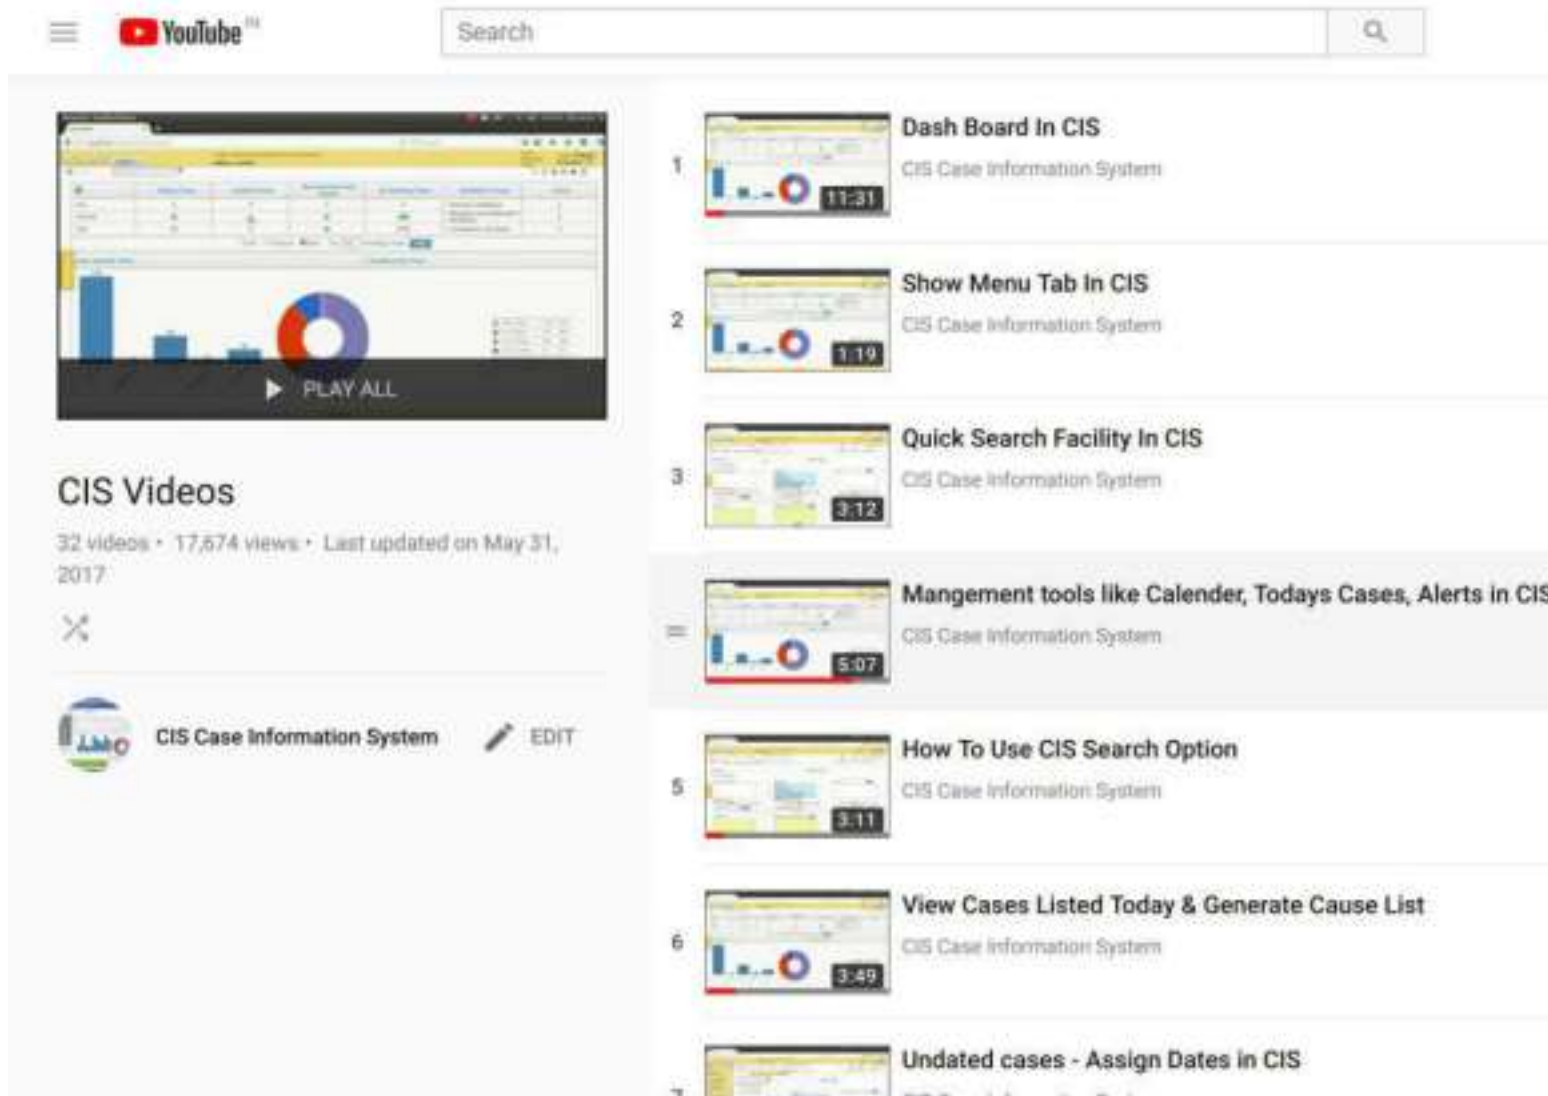

The screenshot shows a YouTube channel page for 'eCourts & NJDG Public'. The channel banner features a collage of images related to the judiciary and a statistics bar with the following values: 2877, 24.5M, 43M, and 508K. Below the banner, the channel name 'eCourts & NJDG Public' is displayed with an 'EDIT' option.

The main content area is titled 'ई-कोर्टस एवं एनजीडीजी - जिला एवं तालुका न्यायालय की सेवाएं' (E-Courts and NJDG - District and Taluk Courts Services). It indicates 17 videos, 508 views, and a last update on Jul 3, 2017. A description in Hindi states: 'इस सार्वजनिक सेवा संकेत स्थल पर ईकोर्टस प्रकल्प अंतर्गत जारी की गयी सभी सार्वजनिक सेवा प्रदान करने हेतु जानकारी विडियो सामान्य नागरिक जादा से जादा लाभ उठाये इस उद्देश से जारी किये गये है।' (This public service portal provides all public services under the E-Courts scheme to benefit common citizens as much as possible. These videos are released for this purpose.)

The video list on the right includes the following titles and durations:

1. इ कोर्ट में आपका स्वागत है (1:14)
2. एनजीडीजी भारतीय न्यायसंस्था का सार्वजनिक वेब पोर्टल (5:59)
3. जिल्हा न्यायालयों का स्वतंत्र संकेत स्थल (3:01)
4. विवादियों के नाम से तथा पार्टी के नाम से केस की स्थिती खोजे (2:09)
5. एफ आय आर क्रमांक से केस की जानकारी खोजे - जिल्हा तथा तालुका न्यायालय (1:54)
6. फाइलिंग क्रमांक से केस की स्थिती खोजे - जिल्हा तथा तालुका न्यायालय (2:00)
7. सीएनाआर क्रमांक से केस की पूरी जानकारी खोजे

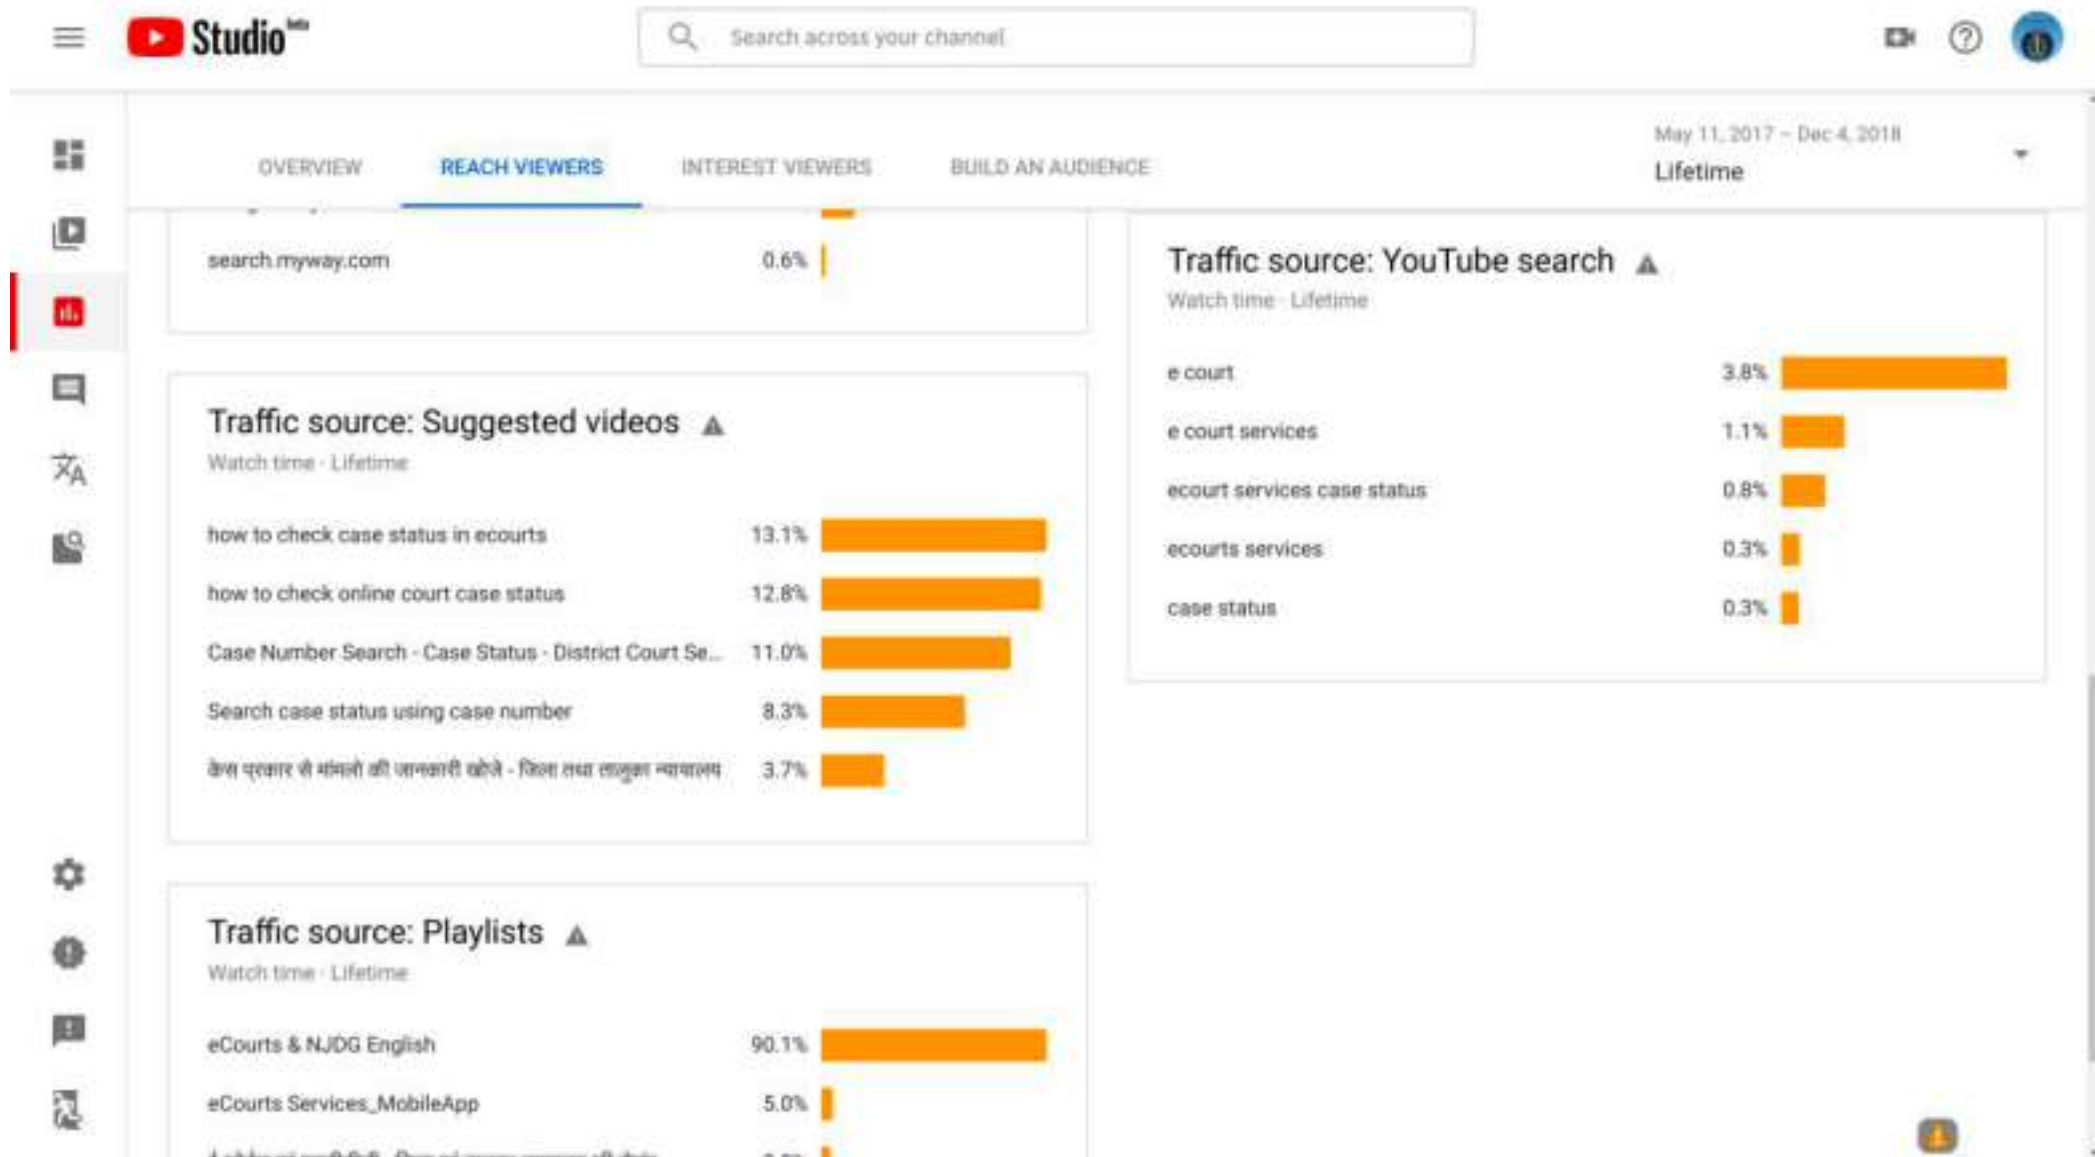

Case Information System Help Videos made available You Tube

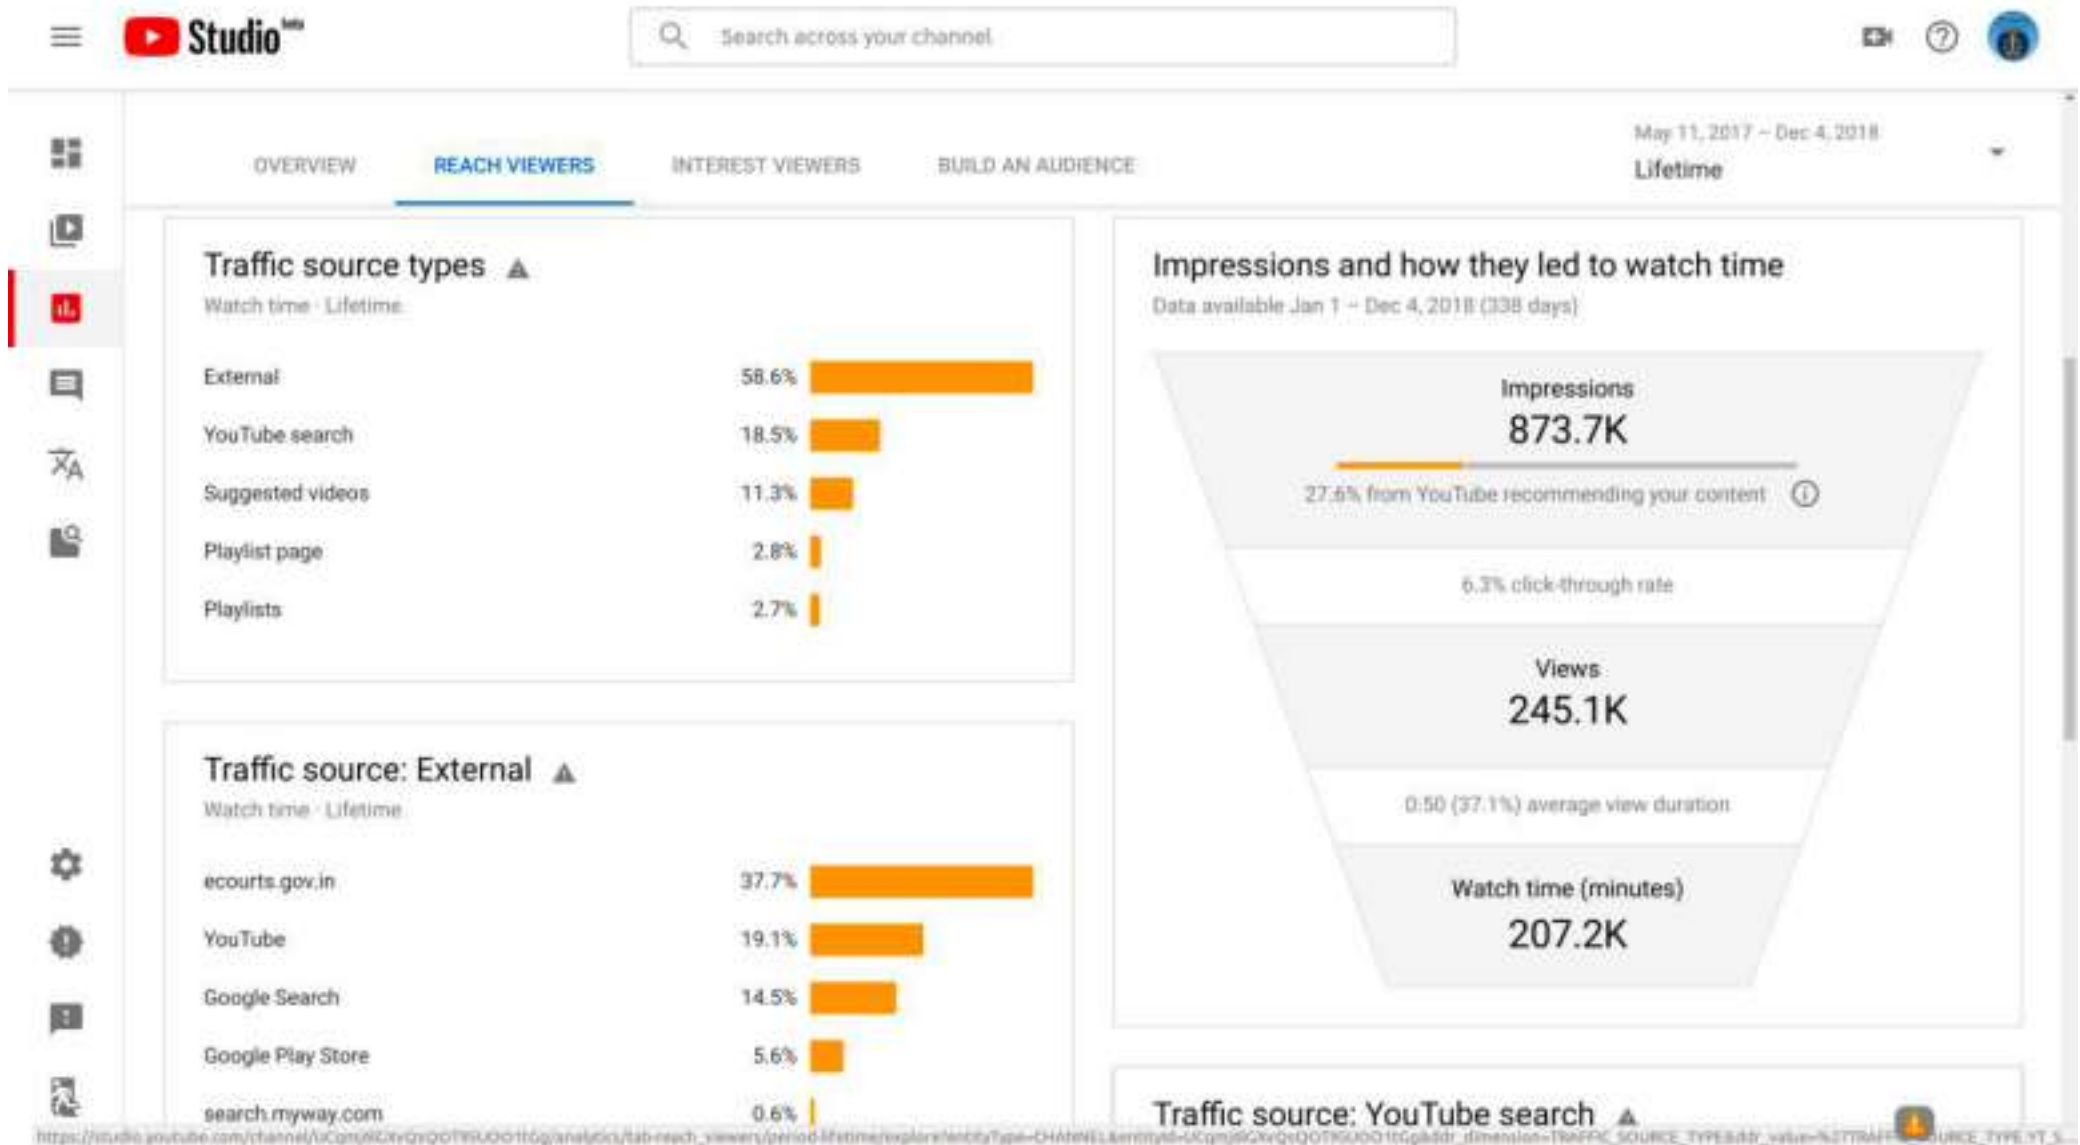

The image shows a screenshot of a YouTube channel page for 'CIS Case Information System'. The channel name is 'CIS Case Information System' with a profile picture showing a globe and a bar chart. The channel has 32 videos and 17,674 views, last updated on May 31, 2017. A playlist titled 'CIS Videos' is displayed, containing 7 videos. The videos are:

1. Dash Board In CIS (11:31)
2. Show Menu Tab In CIS (1:19)
3. Quick Search Facility In CIS (3:12)
4. Mangement tools like Calender, Todays Cases, Alerts in CIS (5:07)
5. How To Use CIS Search Option (3:11)
6. View Cases Listed Today & Generate Cause List (3:49)
7. Undated cases - Assign Dates in CIS
