How to Change the DBIM-Compliant Theme

Steps to follow

Log in to your district website.

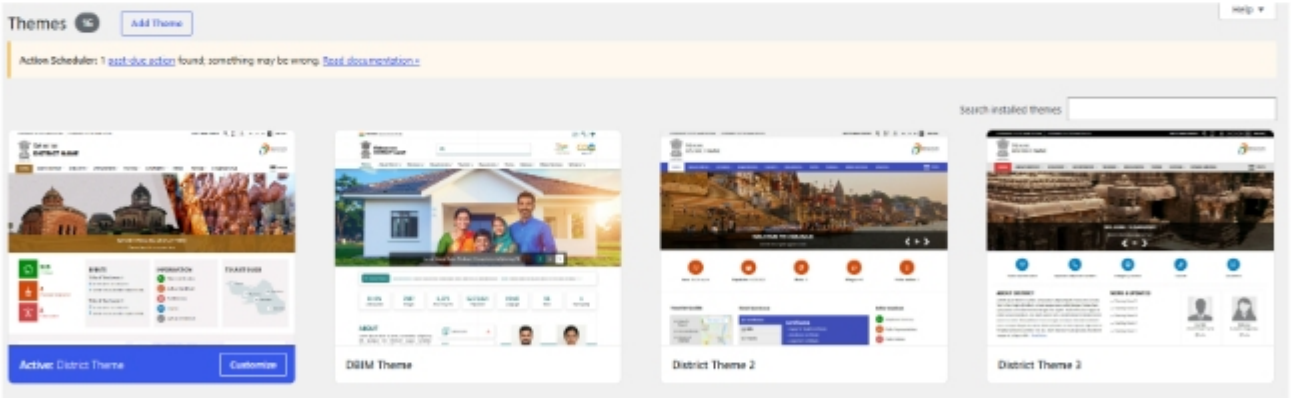

Go to your website backend → Appearance → Themes.

Click **Live Preview** to preview the theme, or click **Activate** to activate it.

Appearance → Themes

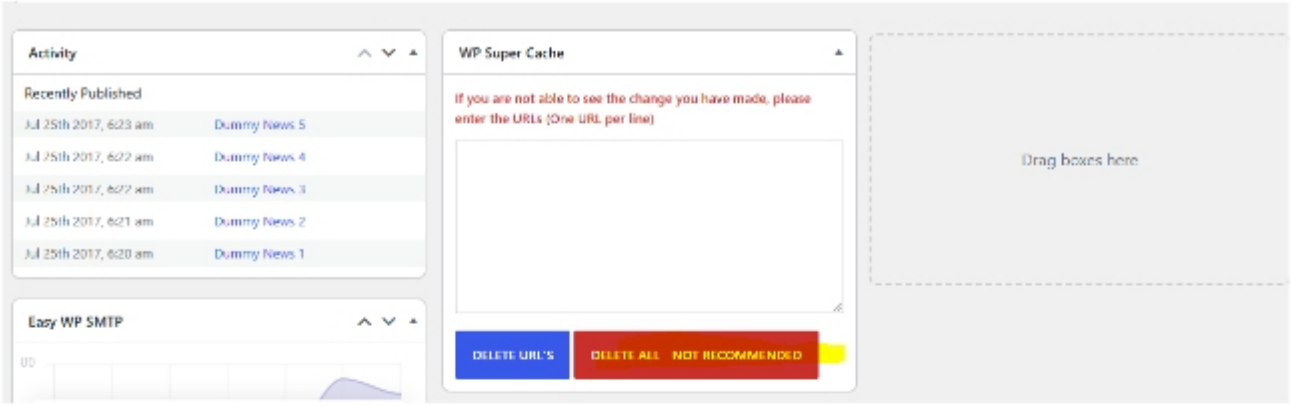

Once the DBIM theme is activated, go to the dashboard and clear the website cache.

Theme activation and cache-clearing screen

Verify the Updated Home Page

Go to the district website's home page and verify that the updated home page is displayed.

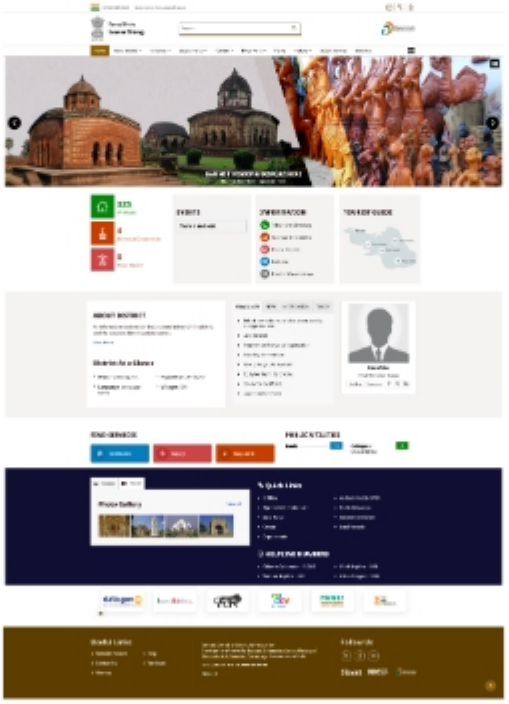

Updated district website home page

Customizing Theme Styles

You can also update the different styles available under the **Customize** option.

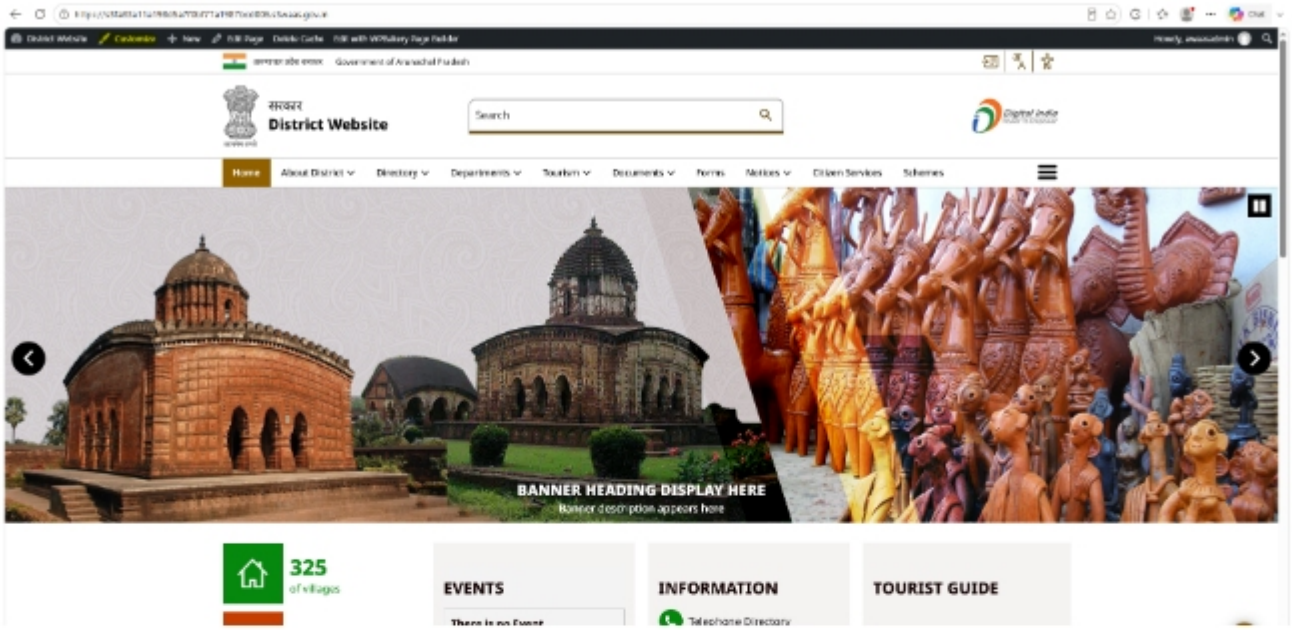

Click the **Customize** option in the top bar.

Customize option

Update the Menu Style

You can also update the menu style, if required.

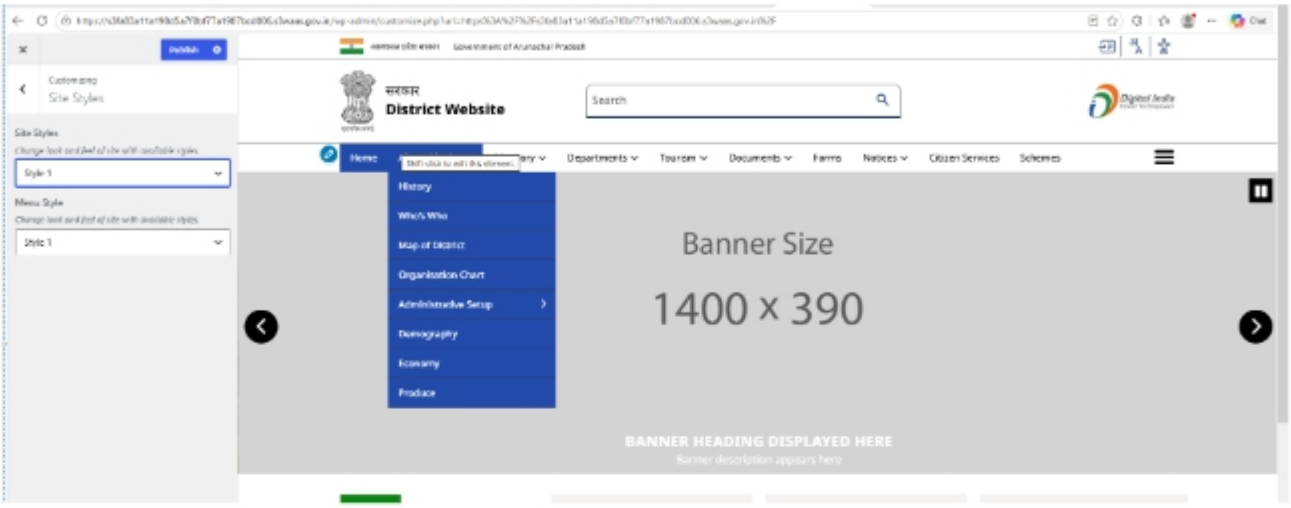

Menu style options

How to Change and Update Newly Created Home Page(s)

Go to **Pages** in your website backend.

Search for **DBIM** in the search box.

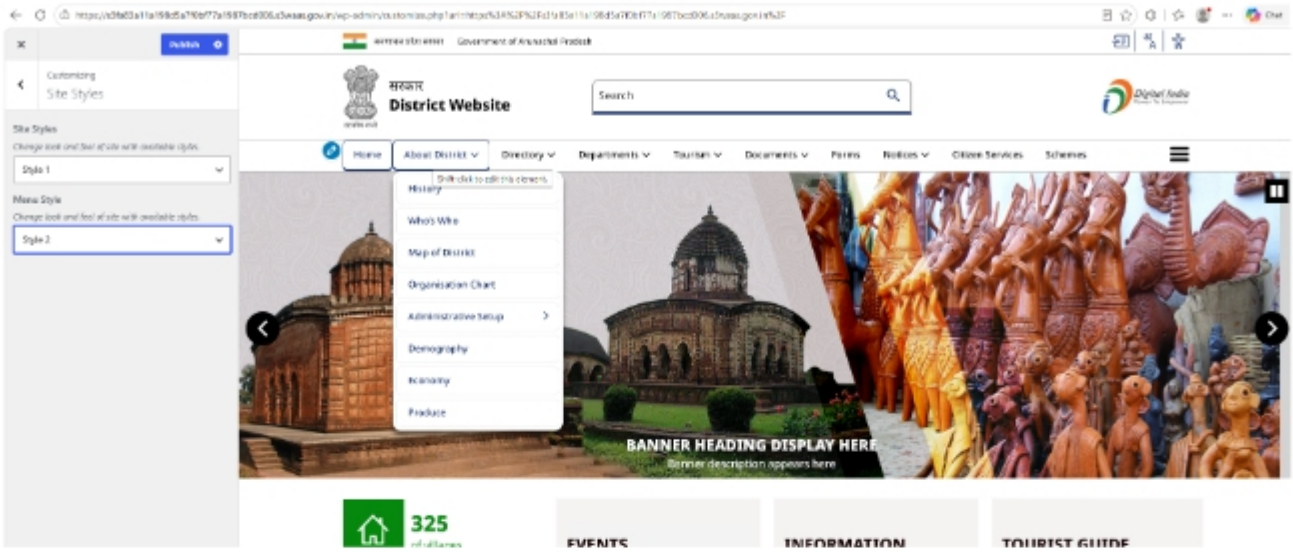

View all six newly created home pages and click the **Edit with WPBakery Page Builder** link to customize the selected home page.

Pages section and DBIM home pages

Update the New Home Page

Update your new home page by editing the different components available.

Editing home page components

Once the home page content has been updated, you can publish the home page by clicking the **Edit Page** link.

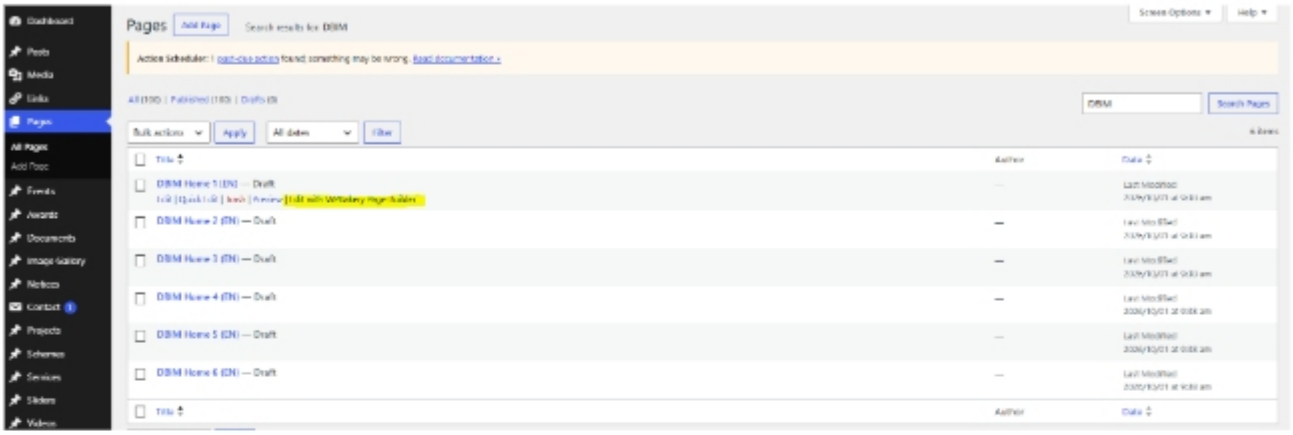

Publishing the updated home page

Set the Newly Created Home Page as the Main Home Page

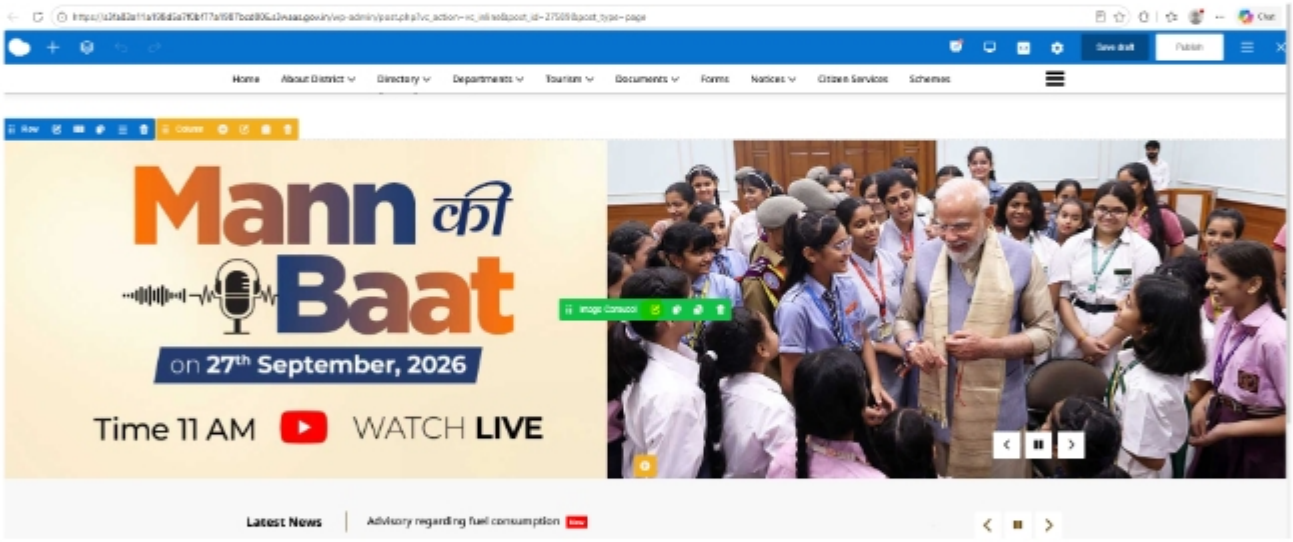

You can now set your newly created home page as the main home page.

Steps: Go to **Website Backend → Settings → Reading**, select your DBIM home page, and click **Save Changes**.

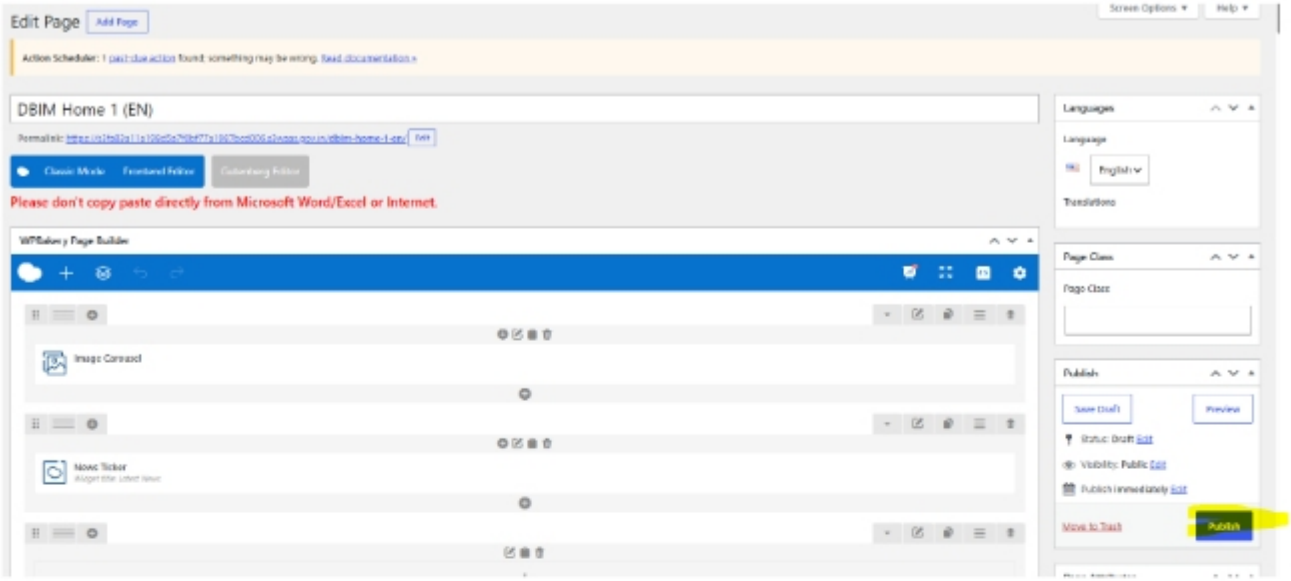

Reading Settings

Finally, open the district website and verify that the newly selected home page is displayed correctly.

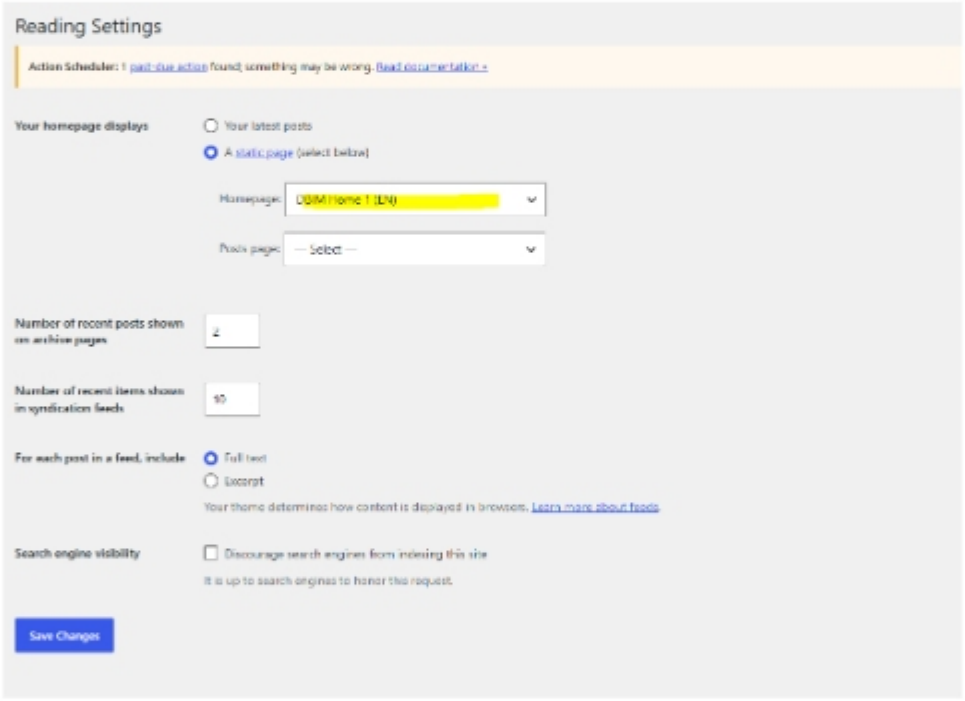

Final updated home page
