PREFACE

An all-India quinquennial survey on employment and unemployment in India was carried out during the period July 2009 to June 2010 as a part of the 66th round of the National Sample Survey (NSS). In this survey, information on various facets of employment and unemployment in India and some individual characteristics associated with household members such as age, sex, level of general and technical education attained, current attendance in educational institutions, vocational training received, etc., were collected at the national and state level. In addition to this, information on the religion of the head of the household was also collected. Based on the data collected during the entire period, estimates pertaining to employment - unemployment situation of people belonging to different religious groups in India along with various characteristics associated with them have been presented in this report.

Based on the central sample data of NSS 66th round, the NSSO released the *Key Indicators of Employment and Unemployment in India, 2009 - 10* in June 2011. Apart from this, eight detailed reports are planned to be released on various aspects of employment and unemployment based on NSS 66th round data. Six such reports have already been released. The present report *Employment and Unemployment Situation Among Major Religious Groups in India* is the seventh in the series. This report primarily deals with the broad indicators of employment and unemployment situation among persons following different religions viz. Hinduism, Islam, Christianity, Sikhism and the rest (Jainism, Buddhism, Zoroastrianism and others) referred to as 'Others', along with the estimates of key indicators for all-India as well as for all the States/UTs. The report contains three chapters and five appendices. The main findings relating to the estimates given in this report are presented in Chapter Three. Chapter One gives the *Introduction* and Chapter Two describes in detail the *Concepts & Definitions* used in the survey in connection with various items covered in this report. The detailed all-India tables on which the report is based are presented in Appendix A and are given in a CD. Detailed description of sample design and estimation procedure is given in Appendix B. The Projected Population as on 1st January 2010 derived from the Projected Population as on 1st March 2009 and 1st March 2010 supplied by RGI Office has been presented in Appendix C. Appendix D gives a facsimile of the schedule of enquiry canvassed in the field. The Relative Standard Error (RSE) of Worker Population Ratio (WPR) by Usual Activity Status can be seen in Appendix E.

The Survey Design and Research Division (SDRD) of the NSSO undertook the development of the survey methodology as well as drafting of the report. The field work was carried out by the Field Operations Division (FOD) of NSSO while the data processing and tabulation work was handled by Data Processing Division (DPD) of NSSO. The Co-ordination and Publication Division (CPD) of NSSO coordinated various activities pertaining to the survey.

NSSO has been endeavouring to bring out its survey results and reports as early as possible for meeting the growing needs of data users. The key results of the survey and unit level data were released within one year of the completion of the field work. This became possible because of the efforts made by the officials of different Divisions of NSSO by meticulous planning and execution of various activities involved and the hard work done by the supporting officials and staff of NSSO. I am thankful to the National Statistical Commission (NSC) and Working Group of NSS 66th round for their valuable guidance at various stages of the survey. I am also thankful to the Experts for providing valuable comments to improve the report.

I hope, this report will be useful to the planners, policy makers and researchers. Suggestions for improvement of its content and coverage will be highly appreciated.

(Vijay Kumar)

Director General & Chief Executive Officer
National Sample Survey Office

New Delhi
June 2013

प्राक्कथन

राष्ट्रीय प्रतिदर्श सर्वेक्षण (एनएसएस) के 66वें दौर के एक भाग के रूप में भारत में रोजगार और बेरोजगारी के बारे में जुलाई 2009 - जून 2010 के दौरान अखिल भारत स्तर पर एक पंचवार्षिक सर्वेक्षण किया गया था। इस सर्वेक्षण में भारत में रोजगार और बेरोजगारी के विभिन्न पहलुओं और परिवार के सदस्यों से जुड़ी कुछ व्यक्तिगत विशेषताओं जैसे कि आयु, लिंग, प्राप्त सामान्य एवं तकनीकी शिक्षा का स्तर, शैक्षणिक संस्थानों में उपस्थिति, व्यवसायिक प्रशिक्षण, आदि के बारे में राष्ट्रीय और राज्य स्तर पर सूचना एकत्र की गई थी। इसके अलावा, इस सर्वेक्षण में परिवार के मुखिया के धर्म के बारे में भी सूचना जुटाई गई थी। इस रिपोर्ट में, सम्पूर्ण अवधि के दौरान एकत्र किए गए आंकड़ों के आधार पर, भारत में विभिन्न धार्मिक समूहों से संबंधित लोगों की विभिन्न विशेषताओं के साथ-साथ रोजगार-बेरोजगारी की स्थिति के बारे में अनुमान प्रस्तुत किए गए हैं।

एनएसएस के 66वें दौर के केन्द्रीय प्रतिदर्श आंकड़ों के आधार पर, एनएसएसओ ने जून 2011 में भारत में रोजगार और बेरोजगारी के मुख्य संकेतक, 2009-2010 नाम से एक रिपोर्ट जारी की थी। इसके अलावा, एनएसएस के 66वें दौर के सर्वेक्षण के आधार पर रोजगार और बेरोजगारी के विभिन्न पहलुओं पर आठ विस्तृत रिपोर्टें जारी करनी की योजना है। ऐसी छह रिपोर्टें पहली ही जारी की जा चुकी हैं। भारत के प्रमुख धार्मिक समूहों में रोजगार और बेरोजगारी की स्थिति नामक यह रिपोर्ट इस श्रृंखला में सातवीं है। इस रिपोर्ट में अखिल भारत स्तर पर और साथ ही सभी राज्यों/संघ राज्यक्षेत्रों के लिए प्रमुख संकेतकों के अनुमान प्रस्तुत करने के साथ, विभिन्न धर्मों यथा हिंदू, इस्लाम, ईसाई, सिख तथा शेष (जैन, बौद्ध, पारसी तथा अन्य) धर्मों जिन्हें "अन्य" नाम से संदर्भित किया गया है, में रोजगार और बेरोजगारी के मुख्य संकेतकों के बारे में विशेष रूप से चर्चा की गई है। रिपोर्ट में तीन अध्याय और पांच परिशिष्ट हैं। इस रिपोर्ट में दिये गए अनुमानों से संबंधित मुख्य निष्कर्ष अध्याय तीन में प्रस्तुत किए गए हैं। पहला अध्याय परिचय के तौर पर है और इस रिपोर्ट में शामिल मद से संबंधित सर्वेक्षण में प्रयुक्त अवधारणाएं तथा परिभाषाएं अध्याय दो में दी गई हैं। विस्तृत अखिल भारतीय तालिकारें जिन पर यह रिपोर्ट आधारित है, परिशिष्ट 'क' के रूप में प्रस्तुत की गई हैं और इन्हें 'सीडी' में दिया गया है। प्रतिदर्श डिजाइन का विस्तारपूर्वक वर्णन और अनुमान तैयार करने की प्रक्रिया परिशिष्ट 'ख' में दी गई है। 01 जनवरी 2010 को अनुमानित आबादी परिशिष्ट 'ग' में दी गई है, इसका अनुमान भारत के महापंजीयक के कार्यालय से प्राप्त पहली मार्च 2009 तथा पहली मार्च 2010 को अनुमानित आबादी के आधार पर तैयार किया गया है। सर्वेक्षण के लिए फील्ड में परिचालित की गई अनुसूचियों की प्रतिकृति परिशिष्ट 'घ' में दी गई है। सामान्य कार्यकलाप स्तर के अनुसार कामगार जनसंख्या अनुपात (इक्यूपीआर) की सापेक्ष मानक बुटि (आरएस ई) परिशिष्ट 'ड.' में दी गई है।

एनएसएसओ के सर्वेक्षण अभिकल्प और अनुसंधान प्रभाग (एसडीआरडी) ने सर्वेक्षण पद्धति तैयार की और साथ ही रिपोर्ट का मसौदा भी बनाया। एनएसएसओ के क्षेत्र संकाय प्रभाग (एफओडी) ने फील्ड कार्य किया जबकि एनएसएसओ के समंक विधायन प्रभाग (डीपीडी) ने आंकड़ा विधायन और सारणीयन का कार्य सम्भाला। एनएसएसओ के समन्वयन तथा प्रकाशन प्रभाग (सीपीडी) ने सर्वेक्षण से संबंधित विभिन्न कार्यकलापों में समन्वय का दायित्व उठाया।

एनएसएसओ अपने सर्वेक्षण निष्कर्ष तथा रिपोर्ट समय पर उपलब्ध कराने का प्रयास करता रहा है ताकि आंकड़ों के उपयोगकर्ताओं की अपेक्षाओं पर खरा उतरा जा सके। सर्वेक्षण के मुख्य निष्कर्ष और यूनिट स्तर के आंकड़े फील्ड-कार्यपूरा हो जाने के बाद एक वर्ष के अन्दर जारी कर दिए गए थे। एनएसएसओ के अलग-अलग प्रभागों द्वारा विभिन्न कार्यकलापों के बेहतर नियोजन और निष्पादन तथा एनएसएसओ के स्टाफ तथा सहायक अधिकारियों की कठिन मेहनत से यह रिपोर्ट वर्तमान स्वरूप में संभव हो सकी है। मैं राष्ट्रीय सांख्यिकीय आयोग (एनएससी) और 66वें दौर के कार्यकारी समूह को सर्वेक्षण के दौरान विभिन्न स्तरों पर उनके मूल्यवान मार्गदर्शन के लिए आभारी हूँ। मैं उन विशेषज्ञों का भी आभारी हूँ, जिन्होंने रिपोर्ट को बेहतर बनाने के लिए अपनी बहुमूल्य राय दी है।

मैं आशा करता हूँ कि यह रिपोर्ट योजनाकारों, नीति-निर्माताओं तथा शोधकर्ताओं के लिए उपयोगी होगी। इसकी विषय-वस्तु तथा कवरेज में सुधार हेतु सुझावों का स्वागत है।

(विजय कुमार)

महानिदेशक और मुख्य कार्यकारी अधिकारी

नई दिल्ली
जून 2013

Highlights

This report is based on the eighth quinquennial survey on employment and unemployment conducted in the 66th round of NSS during July 2009 to June 2010. The survey was spread over 7402 villages and 5252 urban blocks covering 100957 households (59129 in rural areas and 41828 in urban areas) and enumerating 459784 persons (281327 in rural areas and 178457 in urban areas). In this survey information on religion followed by each household was collected as part of the household characteristics. The reported religion of head of the household was considered as the religion of all the household members irrespective of the actual religion followed by individual members. Seven known major religions viz. Hinduism, Islam, Christianity, Sikhism, Jainism, Buddhism and Zoroastrianism were explicitly considered for data collection as a part of the household characteristics. Among these the followers of Hinduism, Islam, Christianity and Sikhism formed the four major religious groups. Households following the religions other than these four religions have been combined together under the category 'Others'. Some of the highlights of this report are listed below:

- In rural India during 2009-10, Hinduism was followed by around 84 per cent of the households constituting about 84 per cent of the population; whereas 11 per cent of households followed Islam with about 12 per cent of the population. Christianity was followed by around 2 per cent of the households constituting about 2 per cent of the population. In urban areas, the percentages of households and population following Hinduism were about 81 and 79, following Islam were about 13 and 16 and following Christianity were about 3 and 3, respectively.
- The sex-ratios for Hindus and Muslims in both rural and urban areas showed a decline between 2004-05 and 2009-10; however those corresponding to Christians showed an improvement during this period. The overall sex-ratio for the rural as well as for the urban population showed a decline between 2004-05 and 2009-10.
- The average household size, in both rural and urban areas, for Muslims was higher than those of other religious groups, and the average household size was the lowest among Christians. The household size in rural areas was higher than that of urban areas for each of the religious groups.
- In rural areas, *self-employment* was the mainstay for all the religious groups. The proportion of households with major income from *self-employed in agriculture* was the highest among Sikh households (about 36 per cent). The proportion of households belonging to the household type *rural labour* was the highest among Muslims (about 41 per cent). In urban India, the proportion of households with major source of earnings as *self-employment* was highest for Muslims (46 per cent). The major source of earnings from *regular wage/salaried* was the highest for Christians households (43 per cent) in urban areas.

- Among all the land possessed classes, in rural areas, proportion of households belonging to the land possessed class '0.005-0.40' hectare was the highest for all the major religious groups, which was more than 40 per cent.
- About 43 per cent of Christian households, 38 per cent of Muslim households and 37 per cent of Hindu households cultivated more than or equal to 0.001 hectare of land but less than 1.00 hectare of land. The proportion of households cultivating more than 4.00 hectares of land was the highest for Sikhs (6 per cent), followed by Hindus (3 per cent).
- For both rural and urban India, average MPCE was the highest for Sikh households, followed by Christians and Hindus. At the all-India level, the average MPCE of Sikh household was Rs. 1659 while that for Muslim household was Rs. 980.
- The literacy rate among persons of age 15 years and above was the highest for Christians, for both the sexes in rural and urban areas. The proportion of persons of age 15 years and above with educational level *secondary and above* was the highest for Christians, followed by Sikhs.
- The current attendance rates in educational institutions were higher among males than females and also higher in urban areas than in rural areas. The current attendance rates in educational institutions among persons of age 0-29 years were the highest among Christians for rural males, rural females, urban males and urban females.
- The Labour Force Participation Rate (LFPR) for male was much higher than female for all religious groups - the differential being greater in urban areas. The male-female differential in LFPR was the lowest among Christians. The LFPR for rural male, rural female and urban female was the highest for Christians while that for urban male was the highest for Sikhs.
- WPR for male was much higher than female for all the religious groups - the differential being greater in the urban areas. The male-female differential in WPR was the lowest among Christians. The WPR according to the usual status (ps+ss) was the highest for Christians for all categories of persons, except urban males, where the WPR of Hindus was higher than Christians. WPRs for rural male, rural female and urban female among Christians were about 56 per cent, 33 per cent, 22 per cent, respectively while that for urban males among Hindus was about 55 per cent.
- In rural areas, majority of male workers belonged to the categories *not literate* (28 per cent) or *literate and up to primary* (28 per cent) while majority of female workers belonged to the category *not literate* (59 per cent). The proportion of male workers with general education level *secondary & above* was the highest for Christians (32 per cent), followed by Sikhs (30 per cent).
- In urban areas, majority of male workers belonged to the education category level *secondary & above* (52 per cent). Among urban males, proportion of workers with level of education *secondary & above* was 58 per cent each for Christians and Sikhs whereas those were 56 per cent and 30 per cent, respectively, for Hindus and Muslims.

- In rural areas, the WPR for male of age 15 years and above was the highest for the educational level *literate and up to primary* (90 per cent) and the WPR for female was highest for educational level *not literate* (43 per cent). Among persons with level of education *secondary & above*, the WPR for male (70 per cent) was much higher than that of female (22 per cent). Among rural male with level of education *secondary & above*, the WPR was highest for Hindus (70 per cent), followed by Sikhs (68 per cent). Among rural female with level of education *secondary & above*, the WPR was highest for Christians (32 per cent), followed by Sikhs (28 per cent).
- In urban areas, the WPR for male of age 15 years and above was highest for the general educational level *literate and up to primary* (84 per cent) and the WPR for female was highest for educational level *graduate and above* (26 per cent). Among urban male with level of education *secondary & above*, the WPR was highest for Hindus (70 per cent), followed by Sikhs (68 per cent). The corresponding WPRs for Christians and Muslims were 67 per cent and 65 per cent, respectively. Among urban female with level of education *secondary & above*, the WPR was highest for Christians (32 per cent), followed by Sikhs (18 per cent).
- In rural areas, majority of employed persons belonged to the employment category *self-employment*. The proportion of *self-employment* among male workers was about 54 per cent and that among female workers was about 56 per cent. In rural areas, a significant portion of workers among male (38 per cent) and female (40 per cent) were engaged in casual labour employment. Among the rural male workers, *self-employment* was the highest for Sikhs (55 per cent), followed by Hindus (54 per cent). Among Christians in rural areas, a significant proportion of male (17 per cent) and female (11 per cent) workers were engaged in *regular wage/salaried employment*.
- In urban areas, the workers were more or less equally engaged in *self-employment* and *regular wage/salaried employment*. The proportion of workers engaged in *self-employment* was the highest for Muslims, followed by Sikhs. Among urban Christians, a significant proportion of male (45 per cent) and female (61 per cent) workers were engaged in *regular wage/salaried employment*. Among urban Hindus, about 44 per cent of male workers and about 40 per cent of female workers were engaged in *regular wage/salaried employment*.
- The unemployment rate in rural areas is less than that of urban areas. In rural areas, during 2009-10, unemployment rate was the highest for Christians for both males (3 per cent) and females (6 per cent). In urban areas, unemployment rate was the highest for Sikhs for both males (6 per cent) and females (8 per cent).

मुख्य बातें

यह रिपोर्ट जुलाई 2009 से जून 2010 के दौरान संचालित एनएसएस के 66वें दौर में रोजगार एवं बेरोजगार पर किये गए आठवें पंचवर्षीय सर्वेक्षण पर आधारित है। यह सर्वेक्षण 7,402 ग्रामों एवं 5,252 नगरीय खंडों के 100957 परिवारों (59129 ग्रामीण क्षेत्रों में एवं 41828 नगरीय क्षेत्रों में) में फैला था, एवं 459784 व्यक्तियों की गणना (281327 ग्रामीण क्षेत्रों में एवं 178457 नगरीय क्षेत्रों) की गई। इस सर्वेक्षण में प्रत्येक परिवार द्वारा माने गए धर्म पर घरेलु विशेषताओं के एक भाग के रूप में सूचना इकट्ठी की गयी। परिवार के मुखिया के धर्म को ही सभी पारिवारिक सदस्यों का धर्म माना गया। इस बात की परवाह किए बगैर कि निजी सदस्यों द्वारा कौन सा असली धर्म माना जाता है। सात ज्ञात प्रमुख धर्मों जैसे हिन्दुत्व, इस्लाम, ईसाई, सिख, जैन, बौद्ध एवं जोरोष्ट्रवाद को स्पष्ट रूप से आँकड़ा संग्रहण हेतु पारिवारिक विशिष्टताओं के एक भाग के रूप में माना गया। इनमें से हिन्दुत्व, इस्लाम, ईसाई एवं सिख धर्म के अनुयायियों ने चार मुख्य धार्मिक वर्गों का गठन किया। वे परिवार जो इन चार धर्मों के अलावा दूसरे धर्मों का पालन करते हैं को एक साथ संयुक्त करके 'अन्य' के वर्ग में रखा गया है। इस रिपोर्ट की कुछ मुख्य विशेषताएं निम्नलिखित हैं :

- ग्रामीण भारत में 2009-10 के दौरान, करीब 84 प्रतिशत जनसंख्या का लगभग 84 प्रतिशत परिवार हिन्दुत्व के अनुयायी थे जबकि करीब 11 प्रतिशत परिवार इस्लाम के अनुयायी थे। उनकी जनसंख्या 12 प्रतिशत थी। ईसाई धर्म माननेवाले 2 प्रतिशत परिवारों की जनसंख्या 2 प्रतिशत थी। नगरीय क्षेत्रों में हिन्दुत्व को मानने वाले परिवार एवं जनसंख्या का प्रतिशत करीब 81 एवं 79 था, इस्लाम को माननेवाले परिवारों का प्रतिशत 13 एवं 16 और ईसाई धर्म के अनुयायी क्रमशः 3 एवं 3 थे।
- ग्रामीण एवं नगरीय दोनों क्षेत्रों में 2004-05 एवं 2009-10 के बीच हिन्दुओं एवं मुस्लिमों के लिंग अनुपात में गिरावट दिखाई गई फिर भी इस अविध के दौरान, जो ईशाइयों के तदनुरूप थे उनमें सुधार दिखाया गया। ग्रामीण एवं नगरीय दोनों के लिए 2004-05 एवं 2009-10 के बीच समग्र ग्रामीण एवं नगरीय जनसंख्या के सम्पूर्ण लिंग अनुपात में गिरावट दिखाई गई।
- ग्रामीण एवं नगरीय दोनों क्षेत्रों में परिवार का औसतन आकार, मुसलमानों में अन्य धार्मिक वर्गों के मुकाबले अधिक था, एवं परिवार का औसतन आकार का ईशाइयों में सबसे कम था। प्रत्येक धार्मिक वर्ग के लिए नगरीय क्षेत्रों के मुकाबले ग्रामीण क्षेत्रों में परिवार का आकार अधिक था।
- ग्रामीण क्षेत्रों में, सभी धार्मिक वर्गों के लिए स्व-रोजगार मुख्य आधार था। कृषि में स्व-रोजगार से प्राप्त प्रमुख आय वाले परिवारों का अनुपात सबसे अधिक (करीब 36 प्रतिशत) सिखों में था। ग्रामीण मजदूर पारिवारिक प्रारूप से संबंधित परिवारों का अनुपात मुसलमानों के बीच सबसे अधिक (करीब 41 प्रतिशत) था। नगरीय भारत में, उपार्जन के प्रमुख स्रोत के रूप में स्व-रोजगार वाले नगरीय परिवारों का अनुपात मुस्लिमों में सबसे अधिक (46 प्रतिशत) था। नगरीय क्षेत्रों में नियमित मजदूरी / वेतन से अर्जन का प्रमुख स्रोत ईसाई परिवारों के लिए सबसे अधिक (43 प्रतिशत) था।
- ग्रामीण क्षेत्रों में सभी धारित भूमि वाले श्रेणियों में उन परिवारों का अनुपात जो कि धारित भूमि के क्षेत्र के थे '0.005 – 0.40' हेक्टेयर था जो कि सभी मुख्य धार्मिक वर्गों में सबसे अधिक था; जो कि 40 प्रतिशत से अधिक था।

- करीब 43 प्रतिशत इसाई परिवार एवं 36 प्रतिशत मुस्लिम एवं 37 प्रतिशत हिन्दु परिवारों ने भूमि की कुछ खेती की जो कि 0.001 हैक्टेयर से ज्यादा या उसके बराबर था, परन्तु 1.00 हैक्टेयर से कम था। भूमि जोतने वाले परिवारों का अनुपात 4.00 हैक्टेयर से अधिक था, सिखों के लिए सबसे अधिक (6 प्रतिशत), तत्पश्चात् आए हिन्दु (3 प्रतिशत)।
- दोनों ग्रामीण एवं नगरीय भारत के लिए, औसतन मा.प्र.उ.व्यय सिख परिवारों के लिए सबसे अधिक था, तत्पश्चात् आए इसाई एवं हिन्दु। अखिल-भारतीय-स्तर पर, सिख परिवार का औसतन मा.प्र.उ.व्यय रु 1659 था एवं मुस्लिम परिवार के लिए 980 रु. था।
- 15 वर्ष एवं उससे अधिक आयु वाले व्यक्तियों के बीच साक्षरता दर ईसाइयों में, ग्रामीण एवं नगरीय क्षेत्रों में दोनों लिंगों के लिए सबसे अधिक था। 15 वर्ष एवं उससे अधिक आयु के व्यक्तियों के अनुपात में जिनका शैक्षिक स्तर माध्यमिक एवं उससे ऊपर है ईसाइयों में सबसे अधिक था, तत्पश्चात् थे सिख।
- शैक्षणिक संस्थानों में वर्तमान उपस्थिति दर पुरुषों में महिलाओं के मुकाबले एवं नगरीय क्षेत्रों में भी ग्रामीण क्षेत्रों से अधिक था। शैक्षिक संस्थाओं में वर्तमान उपस्थिति दर 0-29 वर्ष के व्यक्तियों में प्रत्येक ग्रामीण पुरुष, ग्रामीण महिलाएं एवं नगरीय पुरुष एवं नगरीय महिलाओं में ईसाइयों में सबसे अधिक था।
- सभी धार्मिक वर्गों के लिए श्रम बल भागीदारी दर (श्र.ब.भा.द) पुरुष के लिए महिला से काफी अधिक था – यह विभिन्नता नगरीय क्षेत्रों में काफी अधिक थी। - (श्र.ब.भा.द) में पुरुष – महिला विभिन्नता ईसाइयों में सबसे कम थी। यह श्र.ब.भा.द ईसाइयों में ग्रामीण पुरुष, ग्रामीण महिलाएं एवं नगरीय महिलाओं में सबसे अधिक था एवं सिखों में नगरीय पुरुषों में सबसे अधिक था।
- सभी धार्मिक वर्गों में डब्ल्यू पी आर एस महिलाओं के मुकाबले पुरुषों में काफी अधिक था – यह विभिन्नता नगरीय क्षेत्रों में सबसे अधिक थी। डब्ल्यूपीआरएस में पुरुष – महिला विभिन्नता ईसाइयों में सबसे कम थी। सामान्य स्तर (पीएस+एसएस) के अनुसार यह डब्ल्यूपीआरएस सभी वर्गों के व्यक्तियों के लिए, नगरीय पुरुषों को छोड़कर ईसाइयों में सबसे अधिक था, जबकि हिन्दुओं का डब्ल्यूपीआरएस ईसाइयों से अधिक था। ईसाइयों में ग्रामीण पुरुषों, ग्रामीण महिलाओं एवं नगरीय महिलाओं डब्ल्यूपीआरएस क्रमवार करीब 56 प्रतिशत, 33 प्रतिशत, 22 प्रतिशत थे एवं हिन्दुओं में नगरीय पुरुषों के लिए करीब 55 प्रतिशत था।
- ग्रामीण क्षेत्रों में बहुसंख्यक पुरुष कामगार साक्षर नहीं थे (28 प्रतिशत) या पढ़े-लिखे एवं प्राथमिक स्तर तक (28 प्रतिशत) के वर्ग के थे। जबकि बहुसंख्यक महिला कामगार या तो साक्षर नहीं (58 प्रतिशत) श्रेणी की थीं। ईसाइयों में पुरुष कामगारों का अनुपात जिनकी सामान्य शैक्षणिक योग्यता माध्यमिक या उससे अधिक थी सबसे ज्यादा थी (32 प्रतिशत), तत्पश्चात् आए सिख (30 प्रतिशत)।
- नगरीय क्षेत्रों में बहुसंख्यक पुरुष कामगार माध्यमिक एवं उससे ऊपर के शिक्षा स्तर में थे (52 प्रतिशत)। नगरीय पुरुषों में, जिनका शैक्षिक स्तर माध्यमिक एवं उससे ऊपर का था, कामगारों का अनुपात प्रत्येक ईसाइयों एवं सिखों के लिए 58 प्रतिशत था, जबकि हिन्दुओं एवं मुस्लिमों में, यह क्रमशः, 56 प्रतिशत एवं 30 प्रतिशत का था।

- ग्रामीण क्षेत्रों में 15 वर्ष एवं उससे अधिक आयु वाले पुरुषों के लिए डब्ल्यूपीआर शैक्षिक स्तर साक्षर एवं प्राइमरी तक के लिए सबसे अधिक था (90 प्रतिशत) एवं महिलाओं के लिए डब्ल्यूपीआर उस शैक्षिक स्तर के लिए सबसे अधिक था जो साक्षर नहीं थे (43 प्रतिशत)। उन व्यक्तियों में जिनका शैक्षिक स्तर माध्यमिक एवं उससे ऊपर का था, पुरुषों के लिये डब्ल्यूपीआर (70 प्रतिशत) महिलाओं के मुकाबले काफी अधिक था (22 प्रतिशत)। ग्रामीण पुरुषों में जिनका शैक्षिक स्तर माध्यमिक एवं उससे ऊपर था, डब्ल्यूपीआर हिन्दुओं में सबसे अधिक था (70 प्रतिशत), तत्पश्चात् सिख (68 प्रतिशत)। ग्रामीण महिलाओं में जिनका शैक्षिक स्तर माध्यमिक एवं उससे ऊपर का था, के लिए डब्ल्यूपीआर ईसाईयों में सबसे अधिक था (32 प्रतिशत), तत्पश्चात् सिख (28 प्रतिशत)।
- नगरीय क्षेत्रों में, 15 वर्ष एवं उससे अधिक आयु वाले पुरुषों के लिए डब्ल्यूपीआर सामान्य शैक्षिक स्तर साक्षर एवं प्राइमरी तक सबसे अधिक था (84 प्रतिशत) एवं महिलाओं के लिए डब्ल्यूपीआर शैक्षिक स्तर स्नातक एवं उससे ऊपर के लिए सबसे अधिक था (26 प्रतिशत)। नगरीय पुरुषों में, शैक्षिक स्तर माध्यमिक एवं उससे ऊपर के लिए, डब्ल्यूपीआर हिन्दुओं में सबसे अधिक था (70 प्रतिशत), तत्पश्चात् आर्य सिख (68 प्रतिशत)। इसी तरह ईसाईयों एवं मुस्लिमों के लिए (डब्ल्यूपीआर क्रमशः 67 प्रतिशत एवं 65 प्रतिशत थे)। नगरीय महिलाओं में जिनका शैक्षिक स्तर माध्यमिक एवं उससे ऊपर का था के लिए डब्ल्यूपीआर ईसाईयों में सबसे अधिक था (32 प्रतिशत), तत्पश्चात् सिख (18 प्रतिशत)।
- ग्रामीण क्षेत्रों में, बहुसंख्यक व्यक्ति रोजगार वर्ग के स्व-रोजगार श्रेणी में नियोजित थे। पुरुष कामगारों में स्व-रोजगार का अनुपात करीब 54 प्रतिशत था एवं ग्रामीण क्षेत्रों में, पुरुषों में एक महत्वपूर्ण अंश के कामगार (38 प्रतिशत) एवं महिलाएं (40 प्रतिशत) आकस्मिक श्रम रोजगार में कार्यरत थे। ग्रामीण पुरुष कामगारों में, स्व रोजगार सिखों में सबसे अधिक था (55 प्रतिशत), तत्पश्चात् हिन्दु (54 प्रतिशत)। ग्रामीण क्षेत्र के ईसाईयों में, पुरुषों (17 प्रतिशत) एवं महिला कामगारों (11 प्रतिशत) का एक महत्वपूर्ण अंश नियमित मजदूरी/वेतनभोगी रोजगार में कार्यरत थे।
- नगरीय क्षेत्रों में, कामगार कम या अधिक, समान रूप से स्व-रोजगार एवं नियमित मजदूरी/वेतनभोगी रोजगार में कार्यरत थे। स्व-रोजगार में कार्यरत कामगारों का अनुपात मुस्लिमों में सबसे अधिक था, तत्पश्चात् थे सिख। नगरीय ईसाईयों में, पुरुष (45 प्रतिशत) एवं महिला (61 प्रतिशत) का एक महत्वपूर्ण अंश नियमित मजदूरी/वेतनभोगी रोजगार में कार्यरत थे। नगरीय हिन्दुओं में, करीब 44 प्रतिशत पुरुष कामगार एवं 40 प्रतिशत महिला कामगार नियमित मजदूरी। वेतनभोगी रोजगार में कार्यरत थे।
- नगरीय क्षेत्रों के मुकाबले ग्रामीण क्षेत्रों में बेरोजगारी दर कम थी। 2009-10 के दौरान, ग्रामीण क्षेत्रों में बेरोजगारी दर दोनों, पुरुषों (3 प्रतिशत) एवं महिलाओं (6 प्रतिशत) में ईसाईयों में सबसे अधिक थी। नगरीय क्षेत्रों में, सिखों में यह बेरोजगारी दर दोनों, पुरुषों (6 प्रतिशत) एवं महिलाओं (8 प्रतिशत) में अधिकतम थी।

Table 1	Average monthly per capita household consumer expenditure (MPCE) for each major household religion	A1
Table 2	Per 1000 distribution of households by household type for each household religion	A2-A3
Table 3	Per 1000 distribution of households by size class of land possessed for each major household religion (RURAL)	A4
Table 4	Per 1000 distribution of households by size class of land cultivated for each major household religion (RURAL)	A5
Table 5	Per 1000 distribution of households by size class of land cultivated for each major household religion	A6-A14
Table 6	Per 1000 distribution of persons of age 15 years & above by general educational level for each major household religion	A15-A23
Table 7	Current attendance rates in educational institutions per 1000 persons (of age 0 - 29 years) by age-group and household religion	A24-A32
Table 8	Per 1000 distribution of persons by usual activity category taking also into consideration the subsidiary economic status of persons categorised as 'not working' in the principal status for each age-group and religion	A33-A86
Table 9	Per 1000 distribution of persons of age 15 years and above by usual activity category taking also into consideration the subsidiary economic status of persons categorised as 'not working' in the principal status for each general educational level and religion	A87-A140

NOTES ON TABLES

1. Estimates are provided separately for rural and urban areas and for males and females.
2. The estimates presented in the report, in general, refer to the mid-point of the survey period (July 2009 – June 2010) of NSS 66th round, i.e., 01.01.2010.
3. It may be noted that as the tables are generally presented as ‘per 1000 distribution’ or ‘estimates per 1000’, the figures are rounded off. Thus, while using the ratios from the survey results, it is to be noted that the accuracy of these derived aggregates will be limited to the number of significant digits available in the ratio or percentage estimates presented in the report. The estimated aggregates, wherever possible, can be used to get ratios with more significant digits.
4. If there are no sample households/persons in a particular category, the estimates/estimated proportions of households/persons in that category becomes 0. Estimated numbers per 1000 are also shown as 0, when they are greater than 0 but less than 0.5.
5. In the detailed tables, in some of the deeper classifications, some sample sizes may be small and this may have a bearing on the precision of the corresponding estimates.
6. The cell-level figures in the tables, when added up, may not exactly be equal to the figure shown against the ‘total’ column (or line) due to (i) rounding off and/or (ii) presence of non-response cases.

Chapter One

Introduction

1.1 The report in perspective

1.1.1 The National Sample Survey Office (NSSO), as a part of its 66th round survey programme during the period July 2009 - June 2010, carried out an all-India household survey on the subject of employment and unemployment in India. In this survey, a nation-wide enquiry was conducted to generate estimates of various characteristics pertaining to employment and unemployment and labour force characteristics at the National and State level. Information on various facets of employment and unemployment in India was collected through the employment and unemployment Schedule (Schedule 10) adopting the established concepts, definitions and procedures. Along with the collection of information on some general particulars of household members associated with employment and unemployment such as age, sex, level of general and technical education attained, current attendance in educational institutions, vocational training received, etc., information on some characteristics of the households such as household type, household social group, household religion was also collected in the survey. Based on the data collected during the entire period of the survey, estimates pertaining to employment and unemployment in India along with various characteristics associated with them are presented in a series of reports. This report gives the estimates pertaining to employment and unemployment situation of the people of India belonging to different religious groups along with various other characteristics associated with them.

1.2 Genesis of NSS Employment and Unemployment Survey

1.2.1 The quinquennial survey on employment-unemployment is one of the important surveys conducted regularly by the NSSO. The first such survey was done during September 1972 - October 1973 corresponding to the 27th round of NSSO. The present survey is the eighth in the series.

1.2.2 *Past Quinquennial Surveys:* The assessment of the volume and structure of employment and unemployment using large scale household surveys commenced with the NSS 9th round (May - September, 1955). Subsequently, NSSO conducted a number of surveys on this subject to firm up the concepts and methods. The core conceptual framework for conducting such surveys was put in place by an "Expert Committee on Unemployment Estimates" (popularly known as the Dantwala Committee), set up by the Planning Commission. The Expert Committee reviewed these surveys and the indicators generated from such surveys conducted by NSS in the past. The concepts and definitions recommended by this committee formed the basis of the first quinquennial survey on employment and unemployment conducted in the 27th round of NSS (September 1972 – October 1973). Since then, six comprehensive quinquennial surveys on employment and unemployment situation in India have been carried out in the past by the NSSO prior to the present quinquennial survey. These

were carried out during the 32nd round (July 1977 - June 1978), 38th round (January 1983 - December 1983), 43rd round (July 1987 - June 1988), 50th round (July 1993 - June 1994), 55th round (July 1999 - June 2000), 61st round (July 2004 - June 2005) in which concepts, definitions and procedures were based primarily on the recommendations of the Dantwala Committee. The results of these surveys have been brought out in the form of NSS reports. In NSS 55th round, the aspects of enterprise characteristic of employment and in NSS 61st round the qualitative aspects of informal employment were added in the survey module of the quinquennial round.

1.2.3 Other surveys on employment-unemployment: Apart from these quinquennial surveys on employment and unemployment, NSSO had also been collecting information on certain key items on employment and unemployment, as a part of annual series, from a smaller sample of households in each round since its 45th round (July 1989 - June 1990) through the schedule on Household Consumer Expenditure (Schedule 1.0). The objective of data collected in the annual series was to measure employment and unemployment indicators in terms of the usual and current weekly statuses only and study of these indicators in respect of category of employment, industrial distribution of the usually employed, etc. These procedures continued till the 59th round (January-December 2003) of NSS. In the annual rounds, only activity status and industry of work according to usual principal status, subsidiary status and current weekly status approach were collected through a few columns of the demographic block of the Consumer Expenditure Schedule (Schedule 1.0). Particulars of employment and unemployment according to the usual principal status and usual subsidiary status were collected in the annual rounds by following a similar approach as in the quinquennial rounds. In the quinquennial rounds, particulars of current daily status of the household members are collected and current weekly status is derived from them, whereas in the annual rounds, current weekly status has been obtained through a direct query. In the 60th round (January-June 2004), a separate schedule on employment and unemployment was canvassed for the first time in an annual round and particulars on employment and unemployment was collected in the same manner as those of the quinquennial rounds. In NSS 62nd round (July 2005 - June 2006) and in NSS 64th round (July 2007- June 2008) also a separate schedule on employment and unemployment, similar to the one canvassed during NSS 60th round, was canvassed and particulars on labour force were collected in the manner similar to the quinquennial rounds.

1.3 Scope of NSS 66th round Survey on Employment and Unemployment

1.3.1 The critical issues in the context of labour force enquiries pertain to defining the labour force and measuring participation of labour force in different economic activities. The activity participation of the people is not only dynamic but also multidimensional; it varies over regions, age, education, gender, industry and occupational categories. In NSS surveys, persons are classified into various activity categories on the basis of activities pursued by them during certain specified reference periods. Three reference periods are used in NSS surveys, viz. (i) one year, (ii) one week and (iii) each day of the reference week. Based on these three periods, three different measures of activity status are arrived at. The activity

status determined on the basis of the reference period of one year is known as the usual activity status (US) of a person, that determined on the basis of a reference period of one week is known as the current weekly status (CWS) of the person and the activity status determined on the basis of the engagement on each day during the reference week is known as the current daily status (CDS) of the person.

1.3.2 In NSS 66th round Employment & Unemployment schedule, the major features of data collected in NSS 61st round were retained. In addition, some information on 'Home based workers' was collected. There is another specific importance that is associated with the period of NSS 66th round. The present quinquennial round is the first survey carried out since the major public intervention in the rural labour market made with the enactment of the Mahatma Gandhi National Rural Employment Guarantee Act 2005. The survey instruments for NSS 66th round appropriately incorporated the assimilation of data on some salient aspects relating to MGNREGA.

1.3.3 In NSS 66th round, data on employment-unemployment characteristics were collected through Schedule 10. The schedule captured a range of information on the following aspects:

- i) *Household characteristics*, like household size, religion, social group, land possessed, land cultivated, etc. For rural households information was collected, on whether the household had Mahatma Gandhi National Rural Employment Guarantee (MGNREG) job card, whether got work in MGNREG works during the last 365 days, number of days got work in MGNREG works and mode of payment of the wages earned in MGNREG works. Information on household monthly consumer expenditure was also collected through a worksheet to study the exact relationship of employment-unemployment characteristics with the level of living of the population.
- ii) *Demographic particulars*, like age, sex, educational level, status of current attendance and vocational training.
- iii) *Usual principal activity status and subsidiary economic activity status* of all persons.
- iv) *Particulars of the enterprise* for all the usual status workers (excluding those engaged in growing of crops and growing of crops combined with farming of animals) viz., location of work place, type of enterprises, number of workers in the enterprise etc. and some *particulars of the conditions of employment* for the employees, like type of job contract, eligibility for paid leave, availability of social security benefits, etc. For self-employed persons in the usual status, some particulars were collected for identification of home-based workers.
- v) *Extent of underutilization of the labour time and on the qualitative aspects of employment*, like changes in activity status, occupation /industry, existence of trade unions/associations, nature of employment (permanent/temporary), etc.
- vi) *Participation in specified activities* by the household members who are classified as engaged in domestic duties in the usual principal activity status.

1.4 The survey outline of NSS 66th round survey

1.4.1 *Geographical coverage*: The survey covered the whole of the Indian Union except (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remained inaccessible throughout the year. However, all the sample first stage units of both rural and urban areas of Leh, Kargil and Poonch districts of Jammu & Kashmir became casualty and therefore these districts were outside the survey coverage.

1.4.2 *Sub-round*: The fieldwork of the 66th round of NSSO started from 1st July, 2009 and continued till 30th June, 2010. As usual, the survey period of this round was divided into four sub-rounds, each with a duration of three months, the 1st sub-round period ranging from July to September 2009, the 2nd sub-round period from October to December 2009 and so on. An equal number of sample villages/blocks (FSUs) was allotted for survey to each of these four sub-rounds. The survey used the interview method of data collection from a sample of randomly selected households.

1.5 Sample Design

1.5.1 A stratified multi-stage design was adopted for the 66th round survey. The first stage units (FSU) were the 2001 census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. In addition, two non-UFS towns of Leh and Kargil of Jammu & Kashmir were also treated as FSUs in the urban sector. The ultimate stage units (USU) were households in both the sectors. Hamlet-groups/sub-blocks constituted the intermediate stage whenever these were formed in the sample FSUs. For the rural sector, the list of 2001 census villages (Panchayat wards in case of Kerala) constituted the sampling frame. For the urban sector, the list of latest available UFS blocks constituted the sampling frame. For non-UFS towns, frame consisted of the individual towns (only two towns, viz., Leh & Kargil constituted this frame). Within each district of a State/UT, two basic strata were formed as follows: rural stratum comprising all rural areas of the district and urban stratum comprising all the urban areas of the district. However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum. There was no sub-stratification in the urban sector. However, to net adequate number of child workers, for all rural strata, each stratum was divided into 2 sub-strata. These were, sub-stratum 1: all villages with proportion of child workers (p) $> 2P$ (where P is the average proportion of child workers for the state/UT as per Census 2001) and sub-stratum 2: remaining villages.

1.5.2 At the all-India level, a total number of 12784 FSUs was allocated for survey in the central sample. This sample size was at par with the sample size of NSS 61st round. In addition, 24 State sample FSUs (16 for rural sector and 8 for urban sector) of Leh and Kargil districts of J & K were included in the central sample. The total number of sample FSUs was

allocated to the States and UTs in proportion to population as per census 2001 subject to the availability of investigators and ensuring minimum sample allocation to each State/ UT. The State/ UT level sample size was allocated between two sectors in proportion to population as per *census 2001* with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu, etc. did not exceed the rural sample size. A minimum of 16 FSUs (to the extent possible) was allocated to each state/ UT separately for rural and urban areas. Further the State level allocations for both rural and urban areas were adjusted marginally in a few cases to ensure that each stratum/ sub-stratum got a minimum allocation of 4 FSUs. Within each sector of a State/ UT, the respective sample size was allocated to the different strata/ sub-strata in proportion to the population as per census 2001. Allocations at stratum/ sub-stratum level were adjusted to multiples of 4 with a minimum sample size of 4 and equal number of samples were allocated to the four sub rounds.

1.5.3 For the rural sector, from each stratum/ sub-stratum, required number of sample villages was selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. For urban sector, from each stratum FSUs were selected by using Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples. All households listed in the selected village/block/ hamlet-groups/sub-blocks were stratified into three second stage strata (SSS). A total of 8 households was selected from each sample village/block for canvassing the employment and un-employment schedule. The sample households from each of the second stage strata were selected by SRSWOR.

1.5.4 Out of the total number of 12,808 FSUs (7,524 villages and 5,284 urban blocks) allotted for the central sample¹ (including 24 state sample FSUs of Leh and Kargil districts of J & K: 16 for rural sector and 8 for urban sector), 12,654 FSUs (7,402 villages and 5,252 urban blocks) could be surveyed at the all-India level for canvassing Schedule 10. The number of households surveyed was 1,00,957 (59,129 in rural areas and 41,828 in urban areas) of which number of households surveyed for the religious groups Hinduism, Islam, Christianity, Sikhism and 'Others' were 45559, 6462, 4254, 1382 and 1458 respectively, in rural areas and 31390, 5977, 2694, 771 and 987 respectively, in urban areas. The number of persons surveyed for Schedule 10 in NSS 66th round was 4,59,784 (2,81,327 in rural areas and 1,78,457 in urban areas). The number of sample persons for the religious groups Hinduism, Islam, Christianity, Sikhism and 'Others' were 213672, 33492, 20334, 6886 and 6891 respectively, in rural areas and 129527, 29884, 11254, 3448 and 4304 respectively, in urban areas. 'Others' here refers to the combined category of the religious groups 'Jainism', 'Buddhism', 'Zoroastrianism' and the remaining religious groups other than Hinduism, Islam, Christianity, Sikhism. The sample design and estimation procedure used for the survey is given in Appendix B of this report.

¹ The sample selected for NSS 66th round which was surveyed by NSSO is termed "Central sample". As is usual in the regular NSS rounds, most States and Union Territories participated in the survey: the sample surveyed by State Government officials is termed as "State sample".

1.5.5 The domains of rural and urban sector in the survey are co-terminus with the criterion adopted in census. The urban frame used in the survey is the latest updated UFS that takes into account the newly declared towns after the last census 2001. Accordingly the rural sector is the one that is not urban.

1.6 Contents of the Report

1.6.1 As stated earlier, this report deals with various estimates on employment and unemployment of the people belonging to different religions along with their correlates as obtained from tables generated from data collected on relevant items for the entire round. We would like to sound a note of caution at the outset that *reported* religion of household was a *by-product* of a *general* household *sample* survey aimed at estimating salient characteristics of employment and unemployment of the *general* population and was *not* specifically designed for collecting information on economic conditions of specific religious communities.

1.6.2 For each household surveyed, the reported religion of the head of the household was considered as the religion of *all* the members of the household irrespective of the actual religion followed by individual members. Seven known major religions viz. Hinduism, Islam, Christianity, Sikhism, Jainism, Buddhism and Zoroastrianism were explicitly considered for data collection as a part of the household characteristics. Some results like, distribution of households and population by religious groups, distribution of households by household type, land cultivated and worker population ratio, proportion unemployed, etc. have been obtained for each of the major religions (viz. Hinduism, Islam, Christianity and Sikhism) from the survey. All discussions in this report are limited to only such items/concepts, based on which estimates have been generated. A detailed explanation of these is given in the next chapter entitled 'Concepts and Definitions'.

1.6.3 The sample sizes pertaining to religious groups other than Hinduism, Islam, Christianity and Sikhism were small even at the all-India level. The estimates based on such small samples for the smaller religious groups, may not be sufficiently reliable and hence, estimates relating to these religious groups have not been generated separately. Households belonging to these religious groups have been combined together and their estimates presented as "Other" religious group.

1.6.4 This report contains three chapters including the present introduction and five appendices. Chapter Two discusses the concepts and definitions of only those terms that are relevant in connection with various items covered in this report. The main findings on employment - unemployment situation among major religious groups and their broad household and population characteristics are discussed in Chapter Three. In Chapter Three, wherever state level tables have been presented, they have been placed at the end of the chapter. The detailed tables forming the basis of this report are presented in Appendix A. Appendix B gives a detailed description of the sample design and estimation procedure used for the survey. In Appendix C, the Projected Population as on 1st March 2009 and 1st March

2010 supplied by RGI Office have been presented along with those projected for 1st January 2010 using compound rate of growth. The projections have been given for, male and female, separately, for rural and urban for each State/UT. Appendix D gives a facsimile of the schedule canvassed in the survey. The RSEs of worker population ratio (WPR) according to usual status (ps+ss) and current weekly status (CWS) for each of the major states are given in Appendix E.

1.6.5 All the estimates presented in this report are based on Central sample data only. Further, the cell-level figures in any of the detailed tables, when added up, may not exactly be equal to the figure shown against the “total” column (or line) due to (i) rounding off and/or (ii) presence of non-response cases.

1.7 Plan for Release of Results

1.7.1 It has been planned to bring out a series of eight reports on the basis of the employment and unemployment survey results of NSS 66th round. The present report – the seventh in the series - deals with the estimates based on the data relating to the employment and unemployment situation among major religious groups in India according to the *usual activity status*(ps+ss). The report gives the results generated at the all-India level and some important results for different States/Union Territories. In addition to these eight reports planned, a document on *Key Indicators of Employment and Unemployment in India, 2009-10* was released in June 2011. Of the eight reports, Report no. 537 (*Employment and Unemployment Situation in India, 2009-10*), Report no. 539 (*Informal Sector and Conditions of Employment in India*), Report no. 543 (*Employment and Unemployment Situation among Social Groups in India*), Report no. 548 (*Home-based Workers in India*), Report no. 550 (*Participation of Women in Specified Activities along with Domestic Duties*), Report no. 551 (*Status of Education and Vocational Training in India*) have already been released. The tentative title of the remaining report planned to be released is ‘*Employment and Unemployment situation in Cities and Towns in India*’.

Chapter Two

Concepts and Definitions

2.0 The concepts and definitions of some important terms used in the survey and relevant to this report are explained in the following paragraphs.

2.1 **Household:** A group of persons who normally lived together and took food from a common kitchen constituted a household. The adverb “normally” means that temporary visitors and guests (whose total period of stay in the household was expected to be less than 6 months) were excluded but temporary stay-aways (whose total period of absence from the household was expected to be less than 6 months) were included. Thus a child residing in a hostel for studies was excluded from the household of his/her parents, but a resident domestic servant or paying guest (but not just a tenant in the house) was included in the employer’s/host’s household. “Living together” was given more importance than “sharing food from a common kitchen” in drawing the boundaries of a household in case the two criteria were in conflict. However, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to shortage of space, the household formed by such a person’s family members was taken to include the person also. Each inmate of a hotel, mess, boarding-lodging house, hostel, etc., was considered to be a single-member household except that a family living in a hotel (say) was considered one household only. The same principle was applicable for the residential staff of such establishments. The size of a household is the total number of persons in the household.

2.2 **Religious group:** For each household surveyed, the reported religion of the head of the household was considered as the religion of *all* the members of the household irrespective of the actual religion followed by individual members. Seven known major religions viz. Hinduism, Islam, Christianity, Sikhism, Jainism, Buddhism and Zoroastrianism were explicitly considered for data collection as a part of the household characteristics. The information recorded in this regard was based entirely on the response of the informant.

2.3 **Land possessed by the household as on date of survey:** The area of land possessed included land ‘owned’, ‘leased in’ and ‘land neither owned nor leased in’ (i.e. encroached) by the household but excluded land ‘leased out’. For a piece of land under the possession of the household, if the household did not have the title of ownership and also did not have lease agreement for the use of land transacted, either verbally or in writing, such land was considered as ‘neither owned nor leased in’. In collecting information regarding land possessed, the actual position as obtained on the date of survey was considered. The ‘area of land possessed’ did not include the area of land owned, leased-in, etc. by the servants/paying guests who were considered as normal members of the household.

2.4 **Land cultivated (including orchard and plantation) during July 2008-June 2009:** Land cultivated (including orchard and plantation) during the agricultural year 2008-2009, i.e., July 2008 to June 2009 was recorded considering cultivation of land from the land ‘owned’, ‘land leased-in’ or from ‘land neither owned nor leased-in’. Area with field crops and area under orchards and plantations was counted only once in the same year/ season. It may be noted that information on land owned, possessed or cultivated as described above was collected in hectares up to 3 places of decimals.

2.5 Age (years): The age in completed years, as on the date of survey, of the household members were recorded.

2.6 General educational level: A person was considered as literate if he/she could both read and write a simple message with understanding in at least one language. For all the individuals who were found to be literate, the general level of education was collected in terms of highest level of education successfully completed. Highest level of education successfully completed by each member of the household was decided by considering his/her all general/ technical/ vocational educational level and was recorded in terms of 12 categories viz. (i) not literate, (ii) literate without formal schooling: (a) Education Guarantee Scheme (EGS)/Non-formal Education Courses (NFEC)/ Adult Literacy Centres (AEC), (b) Total Literacy Campaign (TLC), (c) others; (iii) literate but below primary, (iv) middle, (v) secondary, (vi) higher secondary, (vii) diploma/certificate course, (viii) graduate, and (ix) postgraduate and above. The criterion for deciding primary, middle, secondary, etc. levels were the same that has been followed in the concerned states/union territories. The category 'diploma or certificate course' meant diploma or certificate courses in general education, technical education or vocational education, which is below graduation level. Diploma or certificate courses in general education, technical education or vocational education, which is equivalent to graduation level, was considered under the category 'graduate'. Similarly, diploma or certificate courses in general education, technical education or vocational education, which is equivalent to post-graduation level and above were considered under the category 'post-graduate and above'.

2.7 Status of current attendance in educational institution: Particulars of current attendance in educational institution were recorded for persons of age below 30 years. It was first ascertained whether the person was currently attending any educational institutions (government or private) or not. For persons who were not currently attending any educational institutions, reason for not attending viz. (i) school too far, (ii) to supplement household income, (iii) education not considered necessary, (iv) to attend domestic chores, and (v) others, was recorded. For those who were currently attending any educational institution, the course of study pursued by them was recorded in terms of 23 categories viz. (i) EGS/NFEC/AEC, (ii) TLC, (iii) pre-primary (nursery/Kinder garten, etc.), (iv) primary (class I to IV/V), (v) middle, (vi) secondary, (vii) higher secondary, (viii) graduate in: (a) agriculture, (b) engineering/technology, (c) medicine, (d) other subjects; (ix) post graduate and above, (x) diploma or certificate (below graduate level) in: (a) agriculture, (b) engineering/technology, (c) medicine, (d) crafts, (e) other subjects, (xi) diploma or certificate (graduate level) in: (a) agriculture, (b) engineering/technology, (c) medicine, (d) crafts, (e) other subject; (xii) diploma or certificate in post graduate and above level. Persons who were registered for any regular correspondence courses or distance education courses for a stipulated period at the end of which, were allowed to appear in the examination for the course, was also considered as 'currently attending'. Persons who were awaiting results were also considered as 'currently attending'.

2.8 Economic activity: The entire spectrum of human activity falls into two categories – economic activities and non-economic activities. Any activity resulting in production of goods and services that add value to national product was considered as an economic activity for the employment and unemployment survey. Such activities included production of all goods and services for market (i.e. for pay or profit) including those of government services, and, the production of primary commodities for own consumption and own account production of fixed assets.

2.8.1 The full spectrum of economic activities as defined in the UN system of National Accounts was not covered in the definition adopted for the NSS 66th round survey of Employment and Unemployment. Production of any good for own consumption is considered as economic activity by UN System of National Accounts but production of only primary goods for own consumption was considered as economic activity by NSSO. While the former considers activities like own account processing of primary products as economic activities, in the NSS surveys, processing of primary products for own consumption was not considered as economic activity.

2.8.2 The term 'economic activity' as defined in the employment and unemployment survey of NSS 66th round, therefore, included:

- (i) all the market activities performed for pay or profit which result in production of goods and services for exchange.
- (ii) of the non-market activities,
 - (a) all the activities relating to the primary sector (i.e. industry Divisions 01 to 14 of NIC-2004) which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods for own consumption
 - and
 - (b) activities relating to the own-account production of fixed assets, which include production of fixed assets including construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labourer or a supervisor.

As per the practice followed in earlier rounds, certain activities like prostitution, begging, etc., which though fetched earnings, were not considered as economic activities. Activity status of a person was judged irrespective of the situation whether such activity was carried out illegally in the form of smuggling or not.

2.9 Activity status: During a reference period, a person could be in any one, or a combination of, the following three broad activity statuses:

- (i) working or being engaged in economic activity (work) as defined above,
- (ii) being not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' if 'work' is available, and
- (iii) being not engaged in any economic activity (work) and also not available for 'work'.

Broad activity statuses mentioned in (i) and (ii) above are associated with 'being in labour force' and the last with 'not being in the labour force'. Within the labour force, broad activity status (i) and (ii) were associated with 'employment' and 'unemployment', respectively.

2.9.1 In this report identification of each individual in terms of a unique activity status under any one of the three broad activity statuses was done according to the usual status approach by adopting *major time criterion*. Each of the three broad activity statuses was further sub-divided into several detailed activity categories. If a person categorised as engaged in economic activity by adopting the criteria mentioned above was found to be pursuing more than one economic activity during the reference period, the appropriate detailed activity status code was connected to that activity in which relatively long time had been spent. A similar procedure was adopted for assigning detailed activity code for persons categorised as engaged in non-economic activity and pursuing more than one non-economic activity.

2.9.2 This report discusses various employment and unemployment indicators according to usual status approach and as such the discussions of the concepts relevant for usual status approach have only been made. The detailed activity statuses under each of the three broad activity statuses (viz. 'employed', 'unemployed' and 'not in labour force') and the corresponding codes used in usual status approach are given below:

<u>code</u>	<u>description</u>
working (or employed)	
<i>self-employed</i>	
11	worked in household enterprises (self-employed) as own-account worker
12	worked in household enterprises (self-employed) as an employer
21	worked in household enterprises (self-employed) as helper
<i>regular wage/ salaried employee</i>	
31	worked as regular wage/salaried employee
<i>casual labour</i>	
41	worked as casual wage labour in public works
51	worked as casual wage labour in other types of works
not working but seeking/available for work (or unemployed)	
81	sought work or did not seek but was available for work
neither working nor available for work (or not in labour force)	
91	attended educational institutions
92	attended to domestic duties only
93	attended to domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use
94	rentiers, pensioners, remittance recipients, etc.
95	not able to work owing to disability
97	others (including beggars, prostitutes, etc.)
98	did not work owing to sickness (for casual workers only)
99	children of age 0-4 years

2.10 Workers (or employed): Persons who were engaged in any economic activity or who, despite their attachment to economic activity, abstained themselves from work for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work, constituted workers. Unpaid helpers who assisted in the operation of an economic activity in the household farm or non-farm activities were also considered as workers. In the usual status relevant activity status codes 11 to 51 were assigned for workers. Workers were further categorized as *self-employed* (relevant activity status codes: 11, 12, 21), *regular salaried/wage employee* (relevant activity status codes: 31), and *casual wage labour* (relevant activity status codes: 41 and 51).

2.11 Seeking or available for work (or unemployed): Persons who, owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, were considered as those 'seeking or available for work' (or unemployed). In the usual status, activity status codes 81 were assigned for unemployed.

2.12 Labour force: Persons who were either 'working' (or employed) or 'seeking or available for work' (or unemployed) constituted the labour force. In the usual status, persons with activity status codes 11 – 81 constituted the labour force.

2.13 Not in labour force: Persons who were neither 'working' nor 'seeking or available for work' for various reasons during the reference period were considered as 'not in labour force'. Persons under this category are students, those engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young persons, prostitutes, etc. and casual labourers not working due to sickness. Activity status codes 91-95, 97 and 98 were assigned for persons belonging to category 'not in labour force'. For the purpose of this report, status code 99 was assigned to children of age 0-4 years.

2.14 Self-employed: Persons who operated their own farm or non-farm enterprises or were engaged independently in a profession or trade on own-account or with one or a few partners were treated as self-employed in household enterprises. The essential feature of the self-employed is that they have *autonomy* (decide how, where and when to produce) and *economic independence* (in respect of choice of market, scale of operation and finance) for carrying out their operation. The remuneration of the self-employed consists of a non-separable combination of two parts: a reward for their labour and profit of their enterprise. The combined remuneration is wholly determined by the revenue from sales after netting out value of purchased inputs used in production.

2.14.1 Categories of self-employed persons: Self-employed persons were categorised as follows:

- (i) **own-account workers:** those self-employed persons who operated their enterprises on their own account or with one or a few partners and who, during the reference period, by and large, ran their enterprise without hiring any labour. They could, however, have had unpaid helpers to assist them in the activity of the enterprise;

- (ii) **employers:** those self-employed persons who worked on their own account or with one or a few partners and, who, by and large, ran their enterprise by hiring labour; and
- (iii) **helpers in household enterprise:** those self-employed persons (mostly family members) who were engaged in their household enterprises, working full or part time and did not receive any regular salary or wages in return for the work performed. They did not run the household enterprise on their own but assisted the related person living in the same household in running the household enterprise.

2.15 **Regular wage/salaried employee:** These were persons who worked in others' farm or non-farm enterprises (both household and non-household) and, in return, received salary or wages on a regular basis (i.e. not on the basis of daily or periodic renewal of work contract). This category included not only persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

2.16 **Casual wage labour:** A person who was casually engaged in others' farm or non-farm enterprises (both household and non-household) and, in return, received wages according to the terms of the daily or periodic work contract, was a casual wage labourer.

2.17 **Public works:** 'Public works' were those activities which were sponsored by Government or Local Bodies, and which covered local area development works like construction of roads, dams, bunds, digging of ponds, etc., as relief measures, or as an outcome of employment generation schemes under the poverty alleviation programme such as *Mahatma Gandhi National Rural Employment Guarantee* (MGNREG) public works, Sampoorna Grameen Rozgar Yojana (SGRY), National Food for Work Programme (NFFWP), etc. The coverage of schemes under 'public works' was restricted to those schemes through which the Government generated wage employment under poverty alleviation programme, or relief measures. The types of works that were generally undertaken through these schemes, were watershed development, drought proofing, land levelling, flood control, laying pipes or cables, sanitation, water harvesting, irrigation canal, development of orchard, road construction, building construction / repair, running crèche, etc. To distinguish between 'public works' and works not classifiable as 'public works', some broad characteristics of 'public work' were identified, viz. the primary objective is generation of wage employment and poverty alleviation, and creation of community asset as an outcome in achieving those main objectives.

2.18 **Different approaches followed to determine activity status:** The persons surveyed were classified into various activity categories on the basis of the activities pursued by them during certain specified reference periods. There were three reference periods for this survey. These are: (i) one year (ii) one week and (iii) each day of the reference week. Based on these three periods, three different measures of activity status are arrived at. These are termed respectively as usual status, current weekly status and current daily status. In this report, the various indicators of employment and unemployment have been presented in the usual status approach. The procedure adopted to arrive at the usual status is elucidated below.

2.18.1 **Usual principal activity status:** The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spent relatively long time (i.e. major time criterion) during the 365 days preceding the date of survey is considered as the *usual principal activity status* of the person.

To decide the usual principal activity of a person, first a two stage dichotomous-classification was followed for determining the broad usual principal activity status (employed or unemployed or not in labour force) of the person. At the first stage, persons were first categorised as those in the *labour force* (either employed or unemployed) and those *not in the labour force* depending on the major time spent during the 365 days preceding the date of survey. Persons thus adjudged as not belonging to the labour force were assigned the broad activity status 'neither working nor available for work' (*not in the labour force*). At the second stage, for persons belonging to the labour force, the broad activity status of either 'working' (*employed*) or 'not working but seeking and/or available for work' (*unemployed*) was ascertained based on the same criterion viz. relatively long time spent in accordance with either of the two broad statuses within the labour force during the 365 days preceding the date of survey. Within the broad activity status so determined, the detailed activity status of a person pursuing more than one such activity was determined once again on the basis of the relatively long time spent on such activities. In terms of activity status codes, codes 11-51 were assigned to persons classified as workers and codes 91-97 to those not in the labour force. In the usual status approach, a single code 81 was assigned to persons seeking or available for work (unemployed persons) while two separate codes 81 (sought work) and 82 (did not seek but was available for work) were assigned to unemployed persons according to current weekly status and current daily status approach.

2.18.2 Usual subsidiary economic activity status: A person whose usual principal status was determined on the basis of the major time criterion could have pursued some economic activity for a shorter time throughout the reference year of 365 days preceding the date of survey or for a minor period, which is not less than 30 days, during the reference year. The status in which such economic activity was pursued was the subsidiary economic activity status of that person. Activity status codes 11 to 51 only were used for the subsidiary economic activity performed by a person. It may be noted that engagement in work in subsidiary capacity may arise out of the two following situations:

- (i) a person may be engaged in a relatively long period during the last 365 days in some economic (non-economic) activity and for a relatively minor period, which is not less than 30 days (not necessarily for a continuous period), in another economic activity (any economic activity). The economic activity, which was pursued for a relatively minor period *but not simultaneously with principal activity*, was considered as his/her subsidiary economic activity.
- (ii) a person may be pursuing an economic activity (non-economic activity) almost throughout the year in the principal status and also simultaneously pursuing another economic activity (any economic activity) for a relatively short time in a subsidiary capacity. The economic activity, which was pursued for a relatively short time, was considered as his/her subsidiary economic activity.

2.18.3 Usual activity status considering principal and subsidiary status taken together: The usual status, determined on the basis of the usual principal activity and usual subsidiary economic activity of a person taken together, is considered as the usual activity status of the person and is written as usual status (ps+ss). According to the usual status (ps+ss), workers are those who perform some work activity either in the principal status or in the subsidiary status. Thus, a person who is not a worker in the usual principal status is considered as worker according to the usual status (ps+ss), if the person pursues some subsidiary economic activity for 30 days or more during 365 days preceding the date of survey.

2.19 Household type: On the basis of the sources of the household's income during the last 365 days preceding the date of survey, the household types were assigned. For this purpose, only the household's income from economic activities was considered. The income of servants and paying guests was not taken as the income of the household.

For the **rural** areas, household types were as follows:

self-employed in non-agriculture; agricultural labour; other labour; self-employed in agriculture; others.

For **urban** areas, the household types were as follows:

self-employed; regular wage/salary earning; casual labour; others.

2.20 Manual work: A job essentially involving physical labour was considered manual work. However, jobs essentially involving physical labour but also requiring a certain level of general, professional, scientific or technical education were not termed as 'manual work'. On the other hand, jobs not involving much of physical labour and at the same time not requiring much educational (general, scientific, technical or otherwise) background were treated as 'manual work'. Thus, engineers, doctors, dentists, midwives, etc., were not considered manual workers even though their jobs involved some amount of physical labour. But, peons, chowkidars, watchman, etc. were considered manual workers even though their work might not involve much physical labour. A few examples of manual workers are cooks, waiters, building caretakers, sweepers, cleaners and related workers, launderers, dry cleaners and pressers, hair dressers, barbers, beauticians, watchmen, gate keepers, agricultural labourers, plantation labourers and related workers.

2.21 Rural labour: Manual labour working in agricultural and /or non-agricultural occupations *in return for wages* paid either in cash or in kind (excluding exchange labour) and *living in rural areas*, was taken as rural labour.

2.22 Agricultural labour: A person was considered as engaged as agricultural labour, if he/she followed one or more of the following agricultural occupations in the capacity of a wage paid manual labour, whether paid in cash or kind or both:

- (i) farming,
- (ii) dairy farming,
- (iii) production of any horticultural commodity,
- (iv) raising of livestock, bees or poultry,
- (v) any practice performed on a farm as incidental to or in conjunction with farm operations (including forestry and timbering) and the preparation for market and delivery to storage or to market or to carriage for transportation to market of farm produce.

Working in fisheries was *excluded* from agricultural labour. Further, 'carriage for transportation' referred *only to the first stage of the transport* from farm to the first place of disposal.

2.23 Wage paid-manual labour: A person who did manual work in return for wages in cash or kind or partly in cash and partly in kind (excluding exchange labour) was considered as a wage paid manual labour. Salaries were also counted as wages. A person who was self-employed in manual work was *not treated* as a wage paid manual labour.

2.24 Procedure for collecting monthly per capita consumer expenditure (MPCE): For collection of data on total expenditure of the household from employment and unemployment schedule (Schedule 10), a worksheet was used in the Schedule 10 of the 66th round. The approximate value of consumer expenditure obtained through the worksheet has been used for studying employment and unemployment characteristics by different levels of living of the household members. The worksheet contained 36 different components of household consumer expenditure. Depending upon the type of item, either of the two reference periods viz., 30 days and 365 days, was used to record consumption of different groups of items. The items of consumption were classified into four groups and three different approaches viz (a) consumption approach, (b) expenditure approach and (c) first-use approach, were followed for defining consumption of items. The different groups were (i) *food (other than ‘cooked meals’), pan, tobacco & intoxicants and fuel & light*, (ii) *cooked meals, miscellaneous goods and services including education, medical, rent, taxes and cess*, (iii) *clothing and footwear and (iv) durable goods*. The procedure followed for defining consumption of the four groups were (i) *consumption approach*, (ii) *expenditure approach*, (iii) *first-use approach* and (iv) *expenditure approach*, respectively. The definition of household consumer expenditure and the procedure for evaluating that was the same for both Schedule 10 and Schedule 1.0 (Household Consumer Expenditure).

2.25 Conceptual Framework of Key Employment and Unemployment Indicators

2.25.1 **Labour force participation rate (LFPR):** LFPR is defined as the number of persons in the labour force per 1000 persons.

2.25.2 **Worker Population Ratio (WPR):** WPR defined as the number of persons employed per 1000 persons.

2.25.3 **Proportion Unemployed (PU):** It is defined as the number of persons unemployed per 1000 persons.

2.25.4 **Unemployment Rate (UR):** UR is defined as the number of persons unemployed per 1000 persons in the labour force (which includes both the employed and unemployed).

2.25.5 Key employment-unemployment indicators are derived as follows:

activity profile		key indicators
activity status (code)	category of persons	
11, 12, 21, 31, 41, 51	workers	1. Labour Force Participation Rate (LFPR): $\frac{\text{no. of employed persons} + \text{no. of unemployed persons}}{\text{total population}} * 1000$ 2. Worker Population Ratio (WPR): $\frac{\text{no. of employed persons}}{\text{total population}} * 1000$ 3. Proportion Unemployed (PU): $\frac{\text{no. of unemployed persons}}{\text{total population}} * 1000$ 4. Unemployment Rate (UR): $\frac{\text{no. of unemployed persons}}{\text{no. of employed persons} + \text{no. of unemployed persons}} * 1000$

Chapter Three

Summary of Findings

3.1 Introduction

3.1.1 The National Sample Survey Office (NSSO), during the period July 2009 - June 2010, along with the collection of information on various facets of employment and unemployment in India, collected information on 'household religion' through the employment and unemployment schedule (Schedule 10) of 66th round. The religion of the head of the household, as reported by the informant, was considered as the religion of the entire household irrespective of the actual religion followed by individual members. This chapter primarily deals with the broad indicators of employment and unemployment situation among persons following different religions viz. Hinduism, Islam, Christianity, Sikhism and the rest (Jainism, Buddhism, Zoroastrianism and others) referred to as 'Others'. However, before studying their employment and unemployment situation, some broad indicators pertaining to household and population characteristics of the different religious groups have been discussed in this chapter. The estimates of key indicators have been given for all-India as well as for all the States/UTs. The discussion in the text is confined to the estimates of the major states and all-India estimates developed on the basis of data of all the states and union territories. Comparison with the earlier survey results has been presented at the all-India level only. All-India summary results have been presented along with the write-up and the corresponding results at the State/Union Territory level are given at the end of this chapter. The detailed tables showing the survey results at the all-India level are given in Appendix A.

3.1.2 The estimates of key employment and unemployment characteristics for different religious groups have been presented as ratios. It has been observed that compared to the census population or the projections thereof, population estimates of the surveys of NSSO are, in general, on the lower side. This difference may be mainly due to the differences between NSSO and Census Operations in methods and coverage adopted. However, the estimates of ratios obtained from the survey are expected to be reasonably reliable and to arrive at the estimate of an absolute number in any category, the users may apply the survey estimates of ratios to the census population or projections for that category. The estimates presented in the report, in general, refer to the mid-point of the survey period of the 66th round (July 2009 - June 2010), namely 01.01.2010. To arrive at the absolute number in any category, the survey estimates of ratios are to be applied to the census projected populations as on 01.01.2010¹. The estimates of aggregates given in the detailed tables in Appendix A are to be used as weights to help combine ratios and should not be used as estimates of absolute numbers for a given characteristic. It may also be noted that as the tables are generally

¹ In Appendix C, the Projected Population as on 1st March 2009 and 1st March 2010 supplied by RGI Office have been presented along with those projected for 1st January 2010 using compound rate of growth. The projections have been given for, male and female, separately, for rural and urban for each State/UT.

presented as per thousand distributions, the figures are rounded off. Thus, while using the ratios from the survey results, it is to be noted that the accuracy of the derived aggregates will be limited to the number of significant digits available in the ratios presented in the report. The estimated aggregates, wherever possible, can be used to get ratios with more significant digits.

3.1.3 It may be noted that the scope of the survey being all households without special focus on religious groups, the sample sizes pertaining to the religious groups other than Hindus, Muslims, Christians and Sikhs were either small even at the all-India level or were concentrated only in a few states. Tables 0.1 and 0.2, appearing at the end of this Chapter, give the number of households and persons surveyed for the different religious groups in different States/UTs. It may be noted that the number of sample households for a particular religious group of a State/Union Territory may not be adequate in providing sufficiently reliable estimates of the various indicators and therefore, the estimates for the different religious groups for the States/Union Territories are to be used after taking due account of the sample number of households for different religious groups of the States/Union Territories. This caution is sounded upfront for the interpretation of state level results for religious groups.

3.1.4 In the 66th round of NSSO, Schedule 10 was canvassed in 12,654 FSUs (7,402 villages and 5,252 urban blocks) and the total number of households surveyed at the all-India level was 1,00,957 (59,129 in rural areas and 41,828 in urban areas). The number of sample households for the religious groups Hindus, Muslims, Christians, Sikhs and 'Others' were 45559, 6462, 4254, 1382 and 1458 respectively, in rural areas and 31390, 5977, 2694, 771 and 987 respectively, in urban areas. The number of persons surveyed for Schedule 10 in NSS 66th round was 4,59,784 (2,81,327 in rural areas and 1,78,457 in urban areas). The number of sample persons for the religious groups Hindus, Muslims, Christians, Sikhs and 'Others' were 213672, 33492, 20334, 6886 and 6891 respectively, in rural areas and 129527, 29884, 11254, 3448 and 4304 respectively, in urban areas. Households following religions other than Hinduism, Islam, Christianity, Sikhism have been combined together under the category 'Others'.

3.1.5 The major states are those with population one crore² or more as per population Census 2001 in respect of each of rural and urban sectors. As per Census 2001, there are 20 states whose rural population is more than 1 crore and there are 21 states whose urban population is more than 1 crore. Accordingly, 20 states have been considered as major states for rural areas and 21 states have been considered as major states for urban areas. The major states, as per this criterion, are Andhra Pradesh, Assam, Bihar, Chhattisgarh, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Odisha, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh, Uttarakhand, West Bengal and urban Delhi.

² 10 million = 1 crore

3.2 Households and Population

3.2.1 Distribution of households and population by religious group

3.2.1.1 Statement 3.1 gives per thousand distributions of households by major religious groups separately for rural and urban areas at the all-India level. The corresponding figures for State/UTs

Statement 3.1: Per 1000 distribution of households by major religious groups in NSS 55th (1999-2000), 61st (2004-05) and 66th (2009-10) rounds

all-India						
NSS round (year)	household religion					all (incl. n.r.)

households and population following Hinduism were about 81 and 79, following Islam were about 13 and 16 and following Christianity were about 3 and 3, respectively. It may be mentioned here

are given in Statements 3.1.1. Similar distributions for persons at the all-India level are given in statement 3.2 and the corresponding figures for States/UTs are given in Statement 3.2.1. It may be seen that in rural India during 2009-10, Hinduism was followed by around 84 per cent of the households constituting about 84 per cent of the population; whereas 11 per cent of households followed Islam with about 12 per cent of the population. Christianity was followed by around 2 per cent of the households constituting about 2 per cent of the population. In urban areas, the percentages of

that, as obtained from NSS 66th round survey, about 70 per cent of the households in India belonged to the rural areas accounting for about 73 per cent of the total population.

3.2.1.2 Statements 3.1 shows that, in rural areas, the proportion of Hindu households remains somewhat steady whereas the proportion of Muslim households increased by about 1 percentage point in a span of about 10 years from 1999-2000 to 2009-2010. During this period, in the urban areas, the proportions of Hindu households showed an increase of about 1 percentage point and the Muslim households showed a decline of about 1 percentage point. During this span of 10 years, considering both rural and urban areas together, proportion of households following Christianity and Sikhism remained almost at the same level. During this period, share of Hindu in the rural population of India remained almost at the same level whereas that of Muslims increased by about 1 percentage point. During this period, share of Hindu in the urban population of India increased by about 2 percentage points and that of Muslims decreased by about 1 percentage point.

3.2.1.3 Statements 3.1.1 and 3.2.1 show that there were wide variations in the shares of households and populations of different religious groups among the major states. In rural areas, the proportion of Hindu households was more than 96 per cent in Chhattisgarh, Himachal Pradesh, Madhya Pradesh and Odisha. In urban areas, Himachal Pradesh, Haryana, Odisha and Chhattisgarh had more than 90 per cent of Hindu households. Apart from Jammu & Kashmir (55 per cent), the states with more than 20 per cent of Muslim households in rural areas were Assam (32 per cent), West Bengal (31 per cent) and Kerala (21 per cent). In urban areas, the states with more than 15 per cent of Muslim households were Jammu & Kashmir (48 per cent), Uttar Pradesh (23 per cent), Uttarakhand (19 per cent), Kerala (19 per cent), Assam (17 per cent) and Karnataka (16 per cent). Among the major states, Kerala had a large proportion of Christian households. About 21 per cent of the households in each of rural and urban areas of Kerala were Christian households.

3.2.1.4 The state-wise distributions of persons broadly followed similar orders of magnitudes as those observed among households for major religious groups. In rural areas, more than 96 per cent of the population of Chhattisgarh, Himachal Pradesh, and Odisha were Hindu. In urban areas, more than 90 per cent of the population of Himachal Pradesh, Odisha, Haryana and Chhattisgarh were Hindu. The proportion of Muslim population in rural areas was more than 30 per cent in Jammu & Kashmir (57 per cent), Assam (34 per cent) and West Bengal (32 per cent). In the urban areas, the states with more than 20 per cent of Muslim population were Jammu & Kashmir (53 per cent), Uttar Pradesh (26 per cent), Kerala (23 per cent), Uttarakhand (22 per cent), Karnataka (20 per cent). Among the major states, Kerala had the highest concentration of Christian population - about 19 per cent in each of rural and urban areas.

3.2.2 Sex Ratio and household size

3.2.2.1 An important indicator of the social condition, particularly with respect to women's status, of any society is its 'sex ratio' (number of females per 1000 males). Statement 3.3 gives the sex

ratios for three major religious groups during 1999-2000, 2004-05 and 2009-10. It is seen from Statement 3.3 that the sex ratio among Christians was higher than those of other religious groups. The sex-ratio of Hindus was greater than Muslims in rural India and was less than Muslims in urban India. The sex-ratios for Hindus and Muslims in both rural and urban areas showed a decline between 2004-05 and 2009-10; however those corresponding to Christians showed an improvement during this period. The overall sex-ratio for the rural as well as for the urban population showed a decline between 2004-05 and 2009-10.

3.2.2.2 Statement 3.4 gives the average household size for the major religious groups as obtained from NSS 66th round. It is seen from Statement 3.4 that, in both the rural and urban areas, the average household size

Statement 3.4: Household size among different religious groups in NSS 66 th (2009-10) round			
all-India			
household religion	household size		
	rural	urban	rural+ urban
(1)	(2)	(3)	(4)
Hinduism	4.5	4.0	4.4

for Muslims was higher than those of other religious groups. In both the rural and urban areas, the average household size was the lowest among Christians. The household size in rural areas was higher than that of urban areas for each of the religious groups.

3.2.3 Distribution of Households by Household Type

3.2.3.1 In NSS 66th Round, each surveyed household was categorised under an appropriate 'household type'. The type/nature of work that fetched highest income to the household during the reference period of 365 days preceding the date of survey determined its household type. Distributions (per 1000) of households by household type for major religious groups in rural and urban areas are given in Statements 3.5R and 3.5U respectively. The corresponding results at the State/UT level are presented in Statement 3.5.1 at the end of this Chapter.

3.2.3.2 Statement 3.5R shows that, among different sources of earnings of the rural households during 2009-10, self-employment in agriculture and non-agriculture together was the major source of earnings for a large number of households of all religious groups. About 47 percent of rural households belonged to the household type *self-employed in agriculture* or *self-employed in non-agriculture*. The proportion of households getting major income from self-employment was the highest among Sikhs (48 per cent). Within *self-employed*, majority of the households of all the

religious groups, other than Muslims, belonged to the category *self-employed in agriculture*. The proportion of households with major income from *self-employed in agriculture* was the highest among Sikh households (about 36 per cent). The corresponding proportions were 33 per cent for Hindus and 30 per cent for Christians. About 25 per cent of the Muslim households belonged to the household type *self-employed in non-agriculture*. The proportion of households belonging to the household type *rural labour* was the highest among Muslims (about 41 per cent). Within the category of *rural labour* households, the proportions of households classified under *agricultural labour* was the highest for Hindu households (26 per cent), followed by Muslim (23 per cent) and Christian households (21 per cent).

Statement 3.5R: Per 1000 distribution of households of different religious groups by household type

all-India								rural
household religion	household type							
	Self employed (SE) in			Rural labour (RL)			others	all (incl. n.r.)
	agriculture	non- agriculture	sub- total	agricultural labour	other labour	sub- total		
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
Hinduism	332	145	477	261	144	405	118	1000
Islam	214	249	463	232	175	407	130	1000
Christianity	295	147	442	209	142	351	207	1000
Sikhism	356	124	480	203	164	367	153	1000
Others	356	86	442	313	123	436	122	1000
all (incl. n.r.)	319	155	474	256	148	404	122	1000

For urban India, the household types were classified as self-employed, regular wage/salaried, casual labour and others. As seen from Statement 3.5U, during 2009-10, the major source of earnings of a large number of urban households was regular wage/salaried employment. The proportion of

Statement 3.5U: Per 1000 distribution of households of different religious groups by household type

all-India	household type				urban
household religion	self employed (SE)	regular wage/salaried (RWS)	casual labour (CL)	others	all (incl. n.r.)
(1)	(2)	(3)	(4)	(5)	(6)
Hinduism	333	412	130	125	1000
Islam	455	304	155	86	1000
Christianity	221	428	180	171	1000
Sikhism	361	357	140	142	1000
Others	348	412	116	123	1000
all (incl. n.r.)	347	397	134	121	1000

households belonging to the household type 'regular wage/salaried' was the highest for Christians (43 per cent), followed by Hindus (41 per cent). Among the major religious groups, the proportion of urban households with major source of earnings as self-employment was the highest for Muslims (46 per cent). It can be observed from Statement 3.5U that, though there were noticeable differences in the proportion of households belonging to the household types 'self-employed' or 'regular wage/salaried' over the religious groups, the proportion of households belonging to the household type 'casual labour' were not substantially different among various religious groups.

3.2.4 Distribution of households by size class of land possessed and cultivated

3.2.4.1 For the purpose of the survey, land cultivated was defined as the net area sown during the agricultural year (AY) 2008-09, i.e. July 2008 to June 2009, corresponding to the survey period of 2009-2010. Possession of land by the sample households was collected as on the date of survey. In rural areas, amount of land possessed or cultivated by a household reflects the economic status of

proportion was more than 40 per cent for all the major religious groups. As seen from Statement 3.6, among the four major religious groups, the proportion of households possessing land less than 1.00 hectare was the highest for Muslims (91 per cent), followed by Christians (86 per cent). The

the household to a great extent. Statement 3.6 gives proportions of households (per 1000 of rural households of a particular religious group) in seven different categories of possession of land for each of the major religious groups. The corresponding proportions at the level of State/UT are given in Statement 3.6.1. It is seen from Statement 3.6 that, among all the land possessed classes, proportion of households belonging to the land possessed class '0.005-0.40' was the highest for all the religious groups. The

proportion of households possessing land more than 4.00 hectares was the highest for Sikhs (7 per cent), followed by Hindus (3 per cent).

3.2.4.2 Statement 3.7 gives proportions of households (per 1000 of rural households of a particular religious group) in seven different categories of land cultivated by the households for each of the major religious groups. The corresponding proportions at the level of State/UT are given in Statement 3.7.1. About 43 per cent of the Christian households, 38 per cent of Muslim households and 37 per cent of Hindu households cultivated more than or equal to 0.001 hectare of land but less than 1.00 hectare of land. The proportion of households cultivating land more than 4.00 hectares was the highest for Sikhs (6 per cent), followed by Hindus (3 per cent).

3.2.5 Household monthly per capita consumer expenditure (MPCE)

3.2.5.1 Household monthly per capita consumer expenditure (MPCE), which serves as a proxy for income, is usually taken to reflect the living standard of household. In the NSS 66th round survey

Statement 3.8: Monthly per capita household consumer expenditure (MPCE) for each of the major religious groups

all-India household religion	MPCE (Rs.)		
	rural	urban	rural+urban
(1)	(2)	(3)	(4)
Hinduism	888	1797	1125
Islam	833	1272	980
Christianity	1296	2053	1543
Sikhism	1498	2180	1659
Others	880	2074	1402
all (incl. n.r.)	901	1733	1128

on employment-unemployment, data on consumption expenditure was collected through a separate abbreviated work sheet, which was integrated with the employment and unemployment schedule. Based on the data on household consumer expenditure collected through the worksheet from the sample households surveyed in the NSS 66th round (2009-10), Statement 3.8 presents the results on monthly per capita household consumer expenditure (MPCE) for each of the major religious groups. Statement 3.8 shows that, for

both rural and urban India, average MPCE was the highest for the Sikh households, followed by Christians and Hindus. At the all-India level, the average MPCE of Sikh household was Rs. 1659 (Rs. 2180 in urban areas and Rs. 1498 in rural areas) while that for Muslim household was Rs. 980 (Rs. 1272 in urban areas and Rs. 833 in rural areas).

3.2.6 Age distribution of persons

3.2.6.1 The distributions of different categories of persons (viz., rural males, rural females, urban males and urban females) by age-groups as background information, gives a better understanding of the employment and unemployment situation of the major religious groups. Statement 3.9 presents the distributions of persons by 5-year age groups, separately for rural males, rural females, urban males and urban females belonging to different religious groups. Among the different religious groups, proportion of children (age: 0-14 years) per 1000 of the total population was the highest for Muslims. For Muslims, the proportions were 38 per cent, 35 per cent, 32 per cent and 32 per cent among rural males, rural females, urban males and urban females, respectively. The corresponding

proportions for the overall population of rural males, rural females, urban males and urban females were 33 per cent, 31 per cent, 27 per cent and 25 per cent, respectively. The proportion of persons of the age-group 15-59 years among rural males was the highest for Christians (62 per cent).

Statement 3.9: Per 1000 distribution of persons by 5 year age group for major religious groups

The corresponding proportion for urban males was the highest among Hindus (66 per cent). The proportion of persons of the age-group 15-59 years among females was the highest for Sikhs – 65 per cent among rural females and 69 per cent among urban females.

3.2.7 Distribution of persons by Education Level

3.2.7.1 Educational attainment represents human capital accumulation and determines, to a large extent, the employment prospects of an individual. Thus, it is important to study the distribution of population by educational attainment before taking up a discussion on employment and its correlates. Per 1000 distribution of persons of age 15 years and above by their general educational level has been presented in Statement 3.10, separately for rural males, rural females, urban males and urban females. The corresponding results for the State/UTs have been given in Statement 3.10.1.

It is seen from Statement 3.10 that among persons of age 15 years and above, the literacy rate was the highest for Christians. The literacy rates for rural males, rural females, urban males and urban females of Christians were 86 per cent, 77 per cent, 94 per cent and 88 per cent, respectively while the over-all literacy rates for these categories of persons were 74 per cent, 50 per cent, 90 per cent and 76 per cent, respectively. Among Muslims, the literacy rates for rural males, rural females,

urban males and urban females were 69 per cent, 47 per cent, 81 per cent and 65 per cent, respectively. Among the major religious groups, proportion of persons of age 15 years and above with educational level *secondary and above* was the highest for Christians, followed by Sikhs. These proportions for rural males, rural females, urban males and urban females among Christians were 38 per cent, 31 per cent, 63 per cent and 55 per cent, respectively as against the corresponding proportions of 28 per cent, 15 per cent, 56 per cent and 44 per cent, respectively for these categories of persons at the all-India level.

3.2.8 Current Attendance Rates in Educational Institutions

3.2.8.1 The current attendance rates in educational institutions, i.e. the number of persons attending any educational institution per 1000 persons, along with literacy levels, also gives an idea of the quality of human capital for the future workforce. The current attendance rates in educational institutions during 2009-10 for rural males, rural females, urban males and urban females of age 0-29 years belonging to different religious groups have been presented in statement 3.11. The State/UT level results have been presented in Statement 3.11.1. It may be seen from statement 3.11 that the current attendance rates in educational institutions were higher among males than among females and were also higher in urban areas than in rural areas. Statement 3.11 shows that the current attendance rates in educational institutions among persons of age 0-29 years were the highest among Christian rural males, rural females, urban males and urban females alike. The current attendance rates in educational institutions among rural males, rural females, urban males and urban females of age 0-29 years among Christians were 58 per cent, 52 per cent, 63 per cent and 56 per cent, respectively. The corresponding rates for Muslims were 46 per cent, 38 per cent, 48 per cent and 42 per cent, respectively. The over-all current attendance rates in educational institutions for rural males, rural females, urban males and urban females of age 0-29 years were 50 per cent, 42 per cent, 53 per cent and 49 per cent, respectively. As compared to Hindus, the current attendance rate in educational institutions for persons of age 0-29 years of Sikhs was higher for rural males and was almost of the same magnitude for rural females, urban males and urban females.

Statement 3.11: Current attendance rates in educational institutions per 1000 persons by age-group for major religious groups

3.3 Labour Force, Employment & Unemployment

3.3.1 From the data collected through the quinquennial surveys on employment-unemployment, four different estimates of employment and unemployment indicators can be generated based on the three approaches adopted for classification of persons by activity statuses. These are:

- 1) number of persons employed/unemployed or in the labour force according to the *usual status* (ps) i.e. by considering usual principal activity only,
- 2) number of persons employed/ unemployed or in the labour force according to the *usual status* (ps+ss) i.e. by considering usual principal and subsidiary activity together,
- 3) number of persons employed/ unemployed or in the labour force according to the *current weekly status* approach, and

- 4) number of person-days employed/ unemployed or in the labour force according to the *current daily status* approach

For the purpose of this report, estimates of employment and unemployment indicators for major religious groups have been generated with respect to the *usual status* (ps+ss) where the activity status of a person for a long reference period of 365 days preceding the date of survey has been determined on the basis of the usual principal activity and usual subsidiary economic activity of the person taken together.

3.3.2 Labour Force Participation Rate (LFPR) of major religious groups

3.3.2.1 Labour force, or, in other words, the ‘economically active’ persons refers to the population which supplies or seeks to supply labour for production of goods and services and therefore, includes both the ‘employed’ and the ‘unemployed’. The number of persons in the labour force per 1000 persons gives the measure of labour force participation rate (LFPR). Statement 3.12 presents the labour force participation rate (LFPR) according to the usual status (ps+ss) among different categories of persons of the major religious groups as obtained from NSS 55th (1999-2000), 61st (2004-05) and 66th (2009-10) rounds. The LFPRs for different categories of persons of the major religious groups at States/UTs level are given in statement 3.12.1. Figure 1 shows LFPRs at the all-India level for persons belonging to the major religious groups.

3.3.2.2 It can be seen from Statement 3.12 that the rural-urban differentials exist in the LFPRs for all the religious groups. Statement 3.12 also depicts that the LFPRs for males were much higher than those for females for all religious groups - the differentials being greater in urban areas where the LFPRs of females were very low. The male-female differential in LFPR was the lowest among Christians. During the period 2009-10, among the major religious groups, the LFPR for rural males, rural females and urban females were the highest for Christians while that for urban males was the highest for Sikhs. During this period, the LFPRs for rural males, rural females and urban females among Christians were about 57 per cent, 35 per cent, 23 per cent, respectively while that for urban males among Sikhs was about 57 per cent. The over-all LFPRs for rural males, rural females, urban males and urban females at the all-India level were about 56 per cent, 27 per cent, 56 per cent and 15 per cent, respectively. During the period 2009-10, the LFPRs for rural males, rural females, urban males and urban females among Muslims were about 53 per cent, 15 per cent, 54 per cent and 10 per cent, respectively. Between 2004-05 and 2009-10, the LFPRs for rural males among Hindus and Christians were almost at the same level but that for Muslims increased by about 2 percentage points and that for Sikhs decreased by about 2 percentage points. Between 2004-05 and 2009-10, the over-all LFPR for urban males declined by 1 percentage point and those for rural females and urban females decreased by about 7 percentage points and 3 percentage points, respectively.

Statement 3.12: Labour force participation rates according to usual status (ps+ss) among persons of different categories of the major religious groups in NSS 55th (1999-2000), 61st (2004-05) and 66th (2009-10) rounds

3.3.3 Worker Population Ratios (WPRs) of major religious groups

3.3.3.1 The work force according to the *usual status* (ps+ss) includes persons who (a) worked for a relatively long part of the 365 days preceding the date of survey, and (b) those who did not work for the long part of the 365 days but did some work at least for 30 days during the reference period of 365 days preceding the date of survey. The estimate of usually employed population is a combination of two categories viz. (i) usually employed in the principal status (ps workers) and (ii) not usually employed in the principal status but employed in the subsidiary status (ss workers). The number of persons employed per 1000 persons is referred to as the workforce participation rate or worker population ratio (WPR). The estimates for Worker Population Ratio (WPR) according to

usual status (ps+ss) for persons belonging to the major religious groups as obtained from NSS 55th (1999-2000), 61st (2004-05) and 66th (2009-10) rounds have been presented in Statement 3.13. The WPRs for different categories of persons of the major religious groups at States/UTs level are given in statement 3.12.1. Figure 2 shows WPRs at the all-India level for different categories of persons belonging to the major religious groups.

Statement 3.13: Worker Population Ratio (WPR) according to usual status (ps+ss) among persons of different categories of the major religious groups in NSS 55th (1999-2000), 61st (2004-05) and 66th (2009-10) rounds

3.3.3.2 It can be seen from Statement 3.13 that rural-urban differential exists in the WPRs for all the religious groups. Statement 3.13 also shows that the WPRs for males were much higher than those for females for all the religious groups - the differentials being greater in urban areas where

the WPRs of females were very low. The male-female differential in WPR was the lowest among Christians. During the period 2009-10, among the major religious groups, the WPR according to the usual status (ps+ss) was the highest for Christians for all categories of persons, except urban males, where the WPR of Hindus was higher than that for Christians. During this period, the WPRs for rural males, rural females and urban females among Christians were about 56 per cent, 33 per cent, 22 per cent, respectively while that for urban males among Hindus was about 55 per cent. The over-all WPRs for rural males, rural females, urban males and urban females at the all-India level were about 55 per cent, 26 per cent, 54 per cent and 14 per cent, respectively. During the period 2009-10, Muslims registered the lowest WPR for both the sexes in both rural and urban areas. The WPRs for rural males, rural females, urban males and urban females among Muslims were about 52 per cent, 14 per cent, 52 per cent and 9 per cent, respectively. Between 2004-05 and 2009-10, the WPRs for rural males among Hindus and Christians remained almost at the same level but that for Muslims increased by about 2 percentage points and that for Sikhs decreased by about 1 percentage point. Between 2004-05 and 2009-10, the over-all WPR for urban males declined by about 1 percentage point and those for rural females and urban females decreased by about 7 percentage points and 3 percentage points, respectively.

3.3.4 Distribution of usually employed persons of age 15 years and above by educational level

3.3.4.1 The distribution of the employed persons across educational levels for a given section of population at a given point of time reflects the quality of its workforce at that time. Per 1000 distributions of usually employed (ps+ss) persons of age 15 years and above by general educational level for the major religious groups as obtained from NSS 55th (1999-2000), 61st (2004-05) and 66th (2009-10) rounds are presented here, separately, for rural and urban areas in statements 3.14R and 3.14U, respectively. In these statements, the workers of age 15 years and above have been classified into 6 categories of level of general education, viz., *not literate*, *literate and up to primary*, *middle*, *secondary*, *higher secondary* and *graduate and above* and a combined category *secondary & above*.

3.3.4.2 It is observed from statement 3.14R that during 2009-10, in rural areas, majority of male workers belonged to the categories of *not literate* (28 per cent) or *literate and up to primary* (28 per cent) while majority of female workers belonged to the category of *not literate* (59 per cent). About 24 per cent of male workers in rural areas had attained the general education level of *secondary & above* whereas the corresponding proportion for female workers was only 9 per cent. Among rural males, proportion of workers with level of education *not literate* or *literate and up to primary* were 43 per cent, 52 per cent, 55 per cent and 67 per cent for Christians, Sikhs, Hindus and Muslims, respectively. Among rural females, proportion of workers with level of education *not literate* were 26 per cent, 47 per cent, 59 per cent and 59 per cent for Christians, Sikhs, Hindus and Muslims, respectively. In rural areas, the proportion of male workers with general education level *secondary & above* was the highest for Christians (32 per cent), followed by Sikhs (30 per cent). The corresponding proportions for female workers among Christians and Sikhs were as high as 23 per

cent while those for Hindus and Muslims were 9 per cent and 6 per cent, respectively. Between 1999-2000 and 2009-10, proportion of literates in the workforce has increased for both rural males and rural females.

Statement 3.14R: Per 1000 distribution of usually employed (ps+ss) persons of age 15 years and above by general educational level for major religious groups in NSS 55th (1999-2000), 61st (2004-05) and 66th (2009-10) rounds

3.3.4.3 Statement 3.14U shows that during 2009-10, in urban areas, majority of male workers belonged to the level of education category *secondary & above* (52 per cent) whereas only 38 per cent of the female workers belonged to that category. Among urban males, proportion of workers with level of education *secondary & above* was 58 per cent each for Christians and Sikhs whereas those were 56 per cent and 30 per cent, respectively, for Hindus and Muslims. Among Christians, about 62 persons of urban female workers were with level of education *secondary & above*. The

corresponding proportions among Sikhs, Hindus and Muslims were 48 per cent, 39 per cent and 22 per cent, respectively. Between 1999-2000 and 2009-10, proportion of literates in the workforce has increased for both urban males and urban females.

Statement 3.14 U : Per 1000 distribution of usually employed (ps+ss) persons of age 15 years and above by general educational level for major religious groups in NSS 55th (1999-2000), 61st (2004-05) and 66th (2009-10) rounds

3.3.5 Worker Population Ratio (WPRs) among persons of age 15 years and above for different levels of general education

3.3.5.1 The education level - specific worker population ratios among persons of age 15 years and above, as obtained from NSS 55th (1999-2000), 61st (2004-05) and 66th (2009-10) rounds, are presented for rural and urban India in statements 3.15R and 3.15U respectively. Among persons of age 15 years and above, the number of persons who were usually employed (ps + ss) per 1000 persons of a particular level of general education has been considered as the education level-specific worker population ratio. For working out such education level - specific worker population ratios, the persons of age 15 years and above have been classified into 6 categories, viz., *not literate*, *literate and up to primary*, *middle*, *secondary*, *higher secondary* and *graduate and above* and a combined category *secondary & above*.

3.3.5.2 It is seen from Statements 3.15R that during 2009-10, in rural areas, the WPR for males of age 15 years and above was highest for the general educational level *literate and up to primary* (90 per cent) and the WPR for females was highest for educational level *not literate* (43 per cent). Among persons with level of education *secondary & above*, the WPR for males (70 per cent) was much higher than that of females (22 per cent). Among rural males with level of education *secondary & above*, the WPR was highest for Hindus (70 per cent), followed by Sikhs (68 per cent). Among rural females with level of education *secondary & above*, the WPR was highest for Christians (32 per cent), followed by Sikhs (28 per cent). Between 1999-2000 and 2009-10, the WPRs for rural males have increased for the educational categories *literate and up to primary* and *middle* while those have decreased for the remaining educational categories. During this period, the WPR for rural females has increased marginally for the educational category *middle* while the WPRs for the remaining education categories, excepting *graduate and above* have decreased sharply.

3.3.5.3 Statements 3.15U shows that during 2009-10, in urban areas, the WPR for males of age 15 years and above was highest for the general educational level *literate and up to primary* (84 per cent) and the WPR for females was highest for educational level *graduate and above* (26 per cent). Among persons with level of education *secondary & above*, the WPR for males (69 per cent) was much higher than that of females (16 per cent). Among urban males with level of education *secondary & above*, the WPR was highest for Hindus (70 per cent), followed by Sikhs (68 per cent). The corresponding WPRs for Christians and Muslims were 67 per cent and 65 per cent, respectively. Among urban females with level of education *secondary & above*, the WPR was highest for Christians (32 per cent), followed by Sikhs (18 per cent). Between 1999-2000 and 2009-10, the WPRs for urban males have increased for the educational categories *literate and up to primary* and *middle* while those have decreased for the remaining educational categories. During this period, the WPRs for urban females have increased for the educational categories *literate and up to primary* and *middle* while those have decreased for the remaining educational categories.

*including all the religious groups.

NSS 66th round: 2009-10 NSS 61st round: 2004-05; NSS 55th round: 1999-2000

Note: for 61st round, figures for diploma/certificate are included in higher secondary

Statement 3.15R: WPR according to the usual status (ps+ss) among persons of age 15 years and above for different level of general educational in NSS 55th (1999-2000), 61st (2004-05) and 66th (2009-10) rounds

3.3.6 Distribution of usual status (ps+ss) workers by status in employment

3.3.6.1 In Statement 3.16, the per 1000 distribution of usually employed persons (ps+ss) by status in employment are given for rural males, rural females, urban males and urban females belonging to the major religious groups. It is seen from Statement 3.16 that majority of persons employed in rural areas belonged to the employment category *self-employment*. In rural areas, the proportion of *self-employment* among male workers was about 54 per cent and that among female workers was about 56 per cent. In rural areas, a significant portion of workers among males (38 per cent) and females (40 per cent) were engaged in casual labour employment. Among rural male workers, self-employment was the highest for Sikhs (55 per cent), followed by Hindus (54 per cent). Among

Christians in rural areas, a significant proportion of male (17 per cent) and female (11 per cent) workers were engaged in *regular wage/salaried* employment.

3.3.6.2 The Statement 3.16 shows that workers in urban areas were more or less equally engaged in *self-employment* and *regular wage/salaried employment*. In urban areas, proportion of workers engaged in *self-employment* was the highest for Muslims, followed by Sikhs. Among Muslims, about 50 per cent of urban male workers and about 60 per cent of urban female workers were engaged in *self-employment*. The corresponding proportions for urban male workers and urban female workers among Sikhs were 44 per cent and 52 per cent. Among Christians in urban areas, a significant proportion of male (45 per cent) and female (61 per cent) workers were engaged in *regular wage/salaried employment*. Among Hindus in urban areas, about 44 per cent of male workers and about 40 per cent of female workers were engaged in *regular wage/salaried employment*.

Statement 3.16: Per 1000 distribution of usually employed (ps+ss) persons by status of employment for major religious groups during 2009-10

3.3.7 Unemployment Rate (UR)

3.3.7.1 Unemployment rate (UR) is defined as the number of persons unemployed per 1000 persons in the labour force. This gives the unutilised portion of the labour force. It is a more refined indicator of the unemployment situation in a population than the proportion unemployed (PU), which is merely the

number of persons unemployed per thousand persons in the population. It may be noted that the unemployment rate, as estimated from the surveys, happens to be very much lower in the population compared to the worker population ratio (WPR). Therefore, estimates of unemployment rate obtained from the surveys are subject to higher margin of sampling fluctuations than those of the WPRs. One may use the estimates of unemployment rate cautiously in interpreting them, particularly at the state and union territory level. To form an idea about the reliability of these estimates, the number of sample unemployed persons for major religious groups are also given in Statement 3.18 for the years 2009-10 and 2004-05.

Statement 3.17: Number of estimated persons unemployed per 1000 persons in the labour force (UR) according to usual status (principal & subsidiary taken together) among persons of different categories of the major religious groups during 2009 - 2010, 2004 - 2005 and 1999 - 2000

all	28	39	46	57	67	57	34	45	48

3.3.7.2 It is seen from Statement 3.17 that the unemployment rates in rural areas are less than those of urban areas. Among different categories of persons, unemployment rate was the highest for urban females (6 per cent). In rural areas, during 2009-10, unemployment rate was the highest for Christians for both males (3 per cent) and females (6 per cent). In urban areas, unemployment rate was the highest for Sikhs for both males (6 per cent) and females (8 per cent). Between 2004-05 and 2009-10, the unemployment rates among rural males and rural females remained almost at the same level while those for urban males and urban females decreased by 1 percentage point.

Appendix B

Sample Design and Estimation Procedure

Appendix - B

Sample Design and Estimation Procedure

1. Introduction

1.1 The 66th round (July 2009-June 2010) of NSS was earmarked for survey on 'Household Consumer Expenditure' and 'Employment and Unemployment'. The survey covered the whole of the Indian Union *except* (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year. All the sample first stage units of both rural and urban areas of Leh, Kargil and Poonch districts of Jammu & Kashmir became casualty and therefore these districts were outside the survey coverage. In addition to these, all the sample first stage units of the following areas were casualty in different sub-rounds: (i) in sub-rounds 1, 2, and 4, both rural and urban areas of Rajouri district of Jammu & Kashmir, (ii) in sub-round 2, urban areas of Lakhisarai district of Bihar, (iii) in sub-round 3, rural areas of Doda district of Jammu & Kashmir. The estimates of the different sub-rounds, therefore, excluded these areas. The period of survey was of one year duration starting on 1st July 2009 and ending on 30th June 2010. The survey period of this round was divided into four sub-rounds of three months' duration each, the 1st sub-round period ranging from July to September 2009, the 2nd sub-round period from October to December 2009 and so on. In each of these four sub-rounds equal number of sample villages/ blocks (FSUs) were allotted for survey with a view to ensuring uniform spread of sample FSUs over the entire survey period.

2 Sample Design

2.1 A stratified multi-stage design was adopted for the 66th round survey. The first stage units (FSU) were the 2001 census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. In addition, two non-UFS towns of Leh and Kargil of Jammu & Kashmir were also treated as FSUs in the urban sector. The ultimate stage units (USU) were households in both the sectors. Hamlet-groups/sub-blocks constituted the intermediate stage whenever these were formed in the sample FSUs.

2.2 *Selection of the first-stage units:* The various steps involved before making the selection of the FSUs are discussed at length in the following few paragraphs before taking up the issue of selection of USUs within FSUs.

2.2.1 *Sampling Frame for First Stage Units:* For the rural sector, the list of 2001 census villages (Panchayat wards in case of Kerala) constituted the sampling frame. For the urban sector, the list of latest available UFS blocks constituted the sampling frame. For non-UFS towns, frame consisted of the individual towns (only two towns, viz., Leh & Kargil constituted this frame).

2.2.2 Stratification of the first stage units: Within each district of a State/ UT, two basic strata were formed as follows:

- i) rural stratum comprising of all rural areas of the district and
- (ii) urban stratum comprising of all the urban areas of the district.

However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum.

2.2.3 Sub-stratification: There was no sub-stratification in the urban sector. However, to net adequate number of child workers, for all rural strata, each stratum was divided into 2 sub-strata as follows:

sub-stratum 1: all villages with proportion of child workers (p) $> 2P$ (where P is the average proportion of child workers for the state/ UT as per Census 2001)

sub-stratum 2: remaining villages

2.2.4 Allocation of FSU's among Strata: At the all-India level, a total number of 12784 FSUs were allocated for survey in the central sample. In addition, 24 State sample FSUs (16 for rural sector and 8 for urban sector) of Leh and Kargil districts of J & K were included in the central sample. The total number of sample FSUs was allocated to the States and UTs in proportion to population as per census 2001 subject to the availability of investigators and ensuring minimum sample allocation to each State/ UT. The State/ UT level sample size was allocated between two sectors in proportion to population as per census 2001 with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu, etc. did not exceed the rural sample size. A minimum of 16 FSUs (to the extent possible) was allocated to each state/ UT separately for rural and urban areas. Further the State level allocations for both rural and urban areas were adjusted marginally in a few cases to ensure that each stratum/ sub-stratum got a minimum allocation of 4 FSUs. Within each sector of a State/ UT, the respective sample size was allocated to the different strata/ sub-strata in proportion to the population as per census 2001. Allocations at stratum/ sub-stratum level were adjusted to multiples of 4 with a minimum sample size of 4 and equal number of samples was allocated among the four sub rounds.

2.2.5 Selection of first-stage units: For the rural sector, from each stratum/ sub-stratum, required number of sample villages were selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. For urban sector, from each stratum FSUs were selected by using Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples.

2.3 Selection of Ultimate Stage Units (USU) within a FSU: The remaining paragraphs of this sub-section outlines the various steps leading to the actual selection of USUs within a FSU.

2.3.1 *Selection of hamlet-groups/sub-blocks:* Selected FSUs with approximate population 1200 or more were divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector as stated below.

approximate present population of the sample FSU	no. of hgs/sbs to be formed
less than 1200 (no hamlet-groups/sub-blocks)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (Plains), Nainital (Plains), Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups were formed as follows:

approximate present population of the sample village	no. of hgs to be formed
less than 600 (no hamlet-groups)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

Hamlet-groups/ sub-blocks were formed in the sample FSU by more or less equalising populations. Two hamlet-groups (hg)/ sub-blocks (sb) were selected from a large FSU, wherever hamlet-groups/ sub-blocks were formed. This was done in the following manner – one hg/ sb with maximum percentage share of population was always selected and termed as hg/ sb 1; one more hg/ sb was selected from the remaining hg's/ sb's by simple random sampling (SRS) and termed as hg/ sb 2. Listing and selection of the households was done independently in the two selected hamlet-groups/ sub-blocks. The FSUs without hg/ sb formation were treated as sample hg/ sb number 1.

2.3.2 *Sampling frame of households:* All households listed in a village/UFS block where no hamlet-group/sub-block formation was done, or the households listed in the two selected hamlet-groups/sub-blocks of the village/UFS block where hamlet-group/sub-block formation was done, constituted the sampling frame of households.

2.3.3 *Stratification of rural households:* For employment and un-employment survey of NSS 66th round, all households listed in the selected FSU/hamlet group/sub-blocks were stratified into three second stage strata (SSS). The three second-stage-strata (SSS) formed in the rural areas were:

SSS	Rural composition of SSS	number of households to be surveyed	
		FSU without hg/sb formation	FSU with hg/sb formation (for each hg/sb)
SSS 1:	relatively affluent households	2	1
SSS 2:	of the remaining, households having principal earning from non- agricultural activity	4	2
SSS 3:	other households	2	1

Identification of affluent households was done by taking into account factors generally associated with affluent households such as: ownership of motor car/ jeep/ tractor/ combine-harvester/ truck/ bus/ etc.; consumer durables like DVD/ VCP/ refrigerator/ washing machine etc.; ownership of large business/ highly remunerative profession/ high salaried income etc.; ownership of spacious pucca house in good condition; ownership of 7 hectares or more of cultivable land; ownership of 3.5 hectares or more of irrigated land; ownership of a good number of cattle, buffaloes and camels (10 or more in number).

2.3.4 Stratification of urban households: Three second stage strata (SSS) were formed in the urban areas as follows:

SSS	Urban composition of SSS	number of households to be surveyed	
		FSU without hg/sb formation	FSU with hg/sb formation (for each hg/sb)
SSS 1:	households having MPCE of top 10% of urban population (MPCE > B)	2	1
SSS 2:	households having MPCE of middle 60% of urban population ($A \leq \text{MPCE} \leq B$)	4	2
SSS 3:	households having MPCE of bottom 30% of urban population (MPCE < A)	2	1

The cut-off points 'A' and 'B' (in Rs.) were determined from NSS 61st round data for **each NSS region** for urban areas in such a way that top 10% of the population have MPCE more than 'B' and bottom 30% of the population have MPCE less than A.

2.3.5 Selection of households: For employment-unemployment survey a total of 8 households were selected from each village/FSU. In both rural and urban areas, in case no hamlet-group/sub-block formation was done in the village/block, a number of 2, 4 and 2 households were selected from the second stage strata SSS1, SSS2 and SSS3, respectively. In case hamlet-groups/sub-blocks were formed in the village/block, a number of 1, 2 and 1 households were selected respectively from the second stage strata SSS1, SSS2 and SSS3 of each of the hamlet-groups/sub-blocks. The sample households from each of the second stage strata were selected by SRSWOR.

2.4 Number of village/blocks allotted for survey in the NSS 66th round along with the number of village/blocks actually surveyed and number of persons enumerated in respect of employment and unemployment survey are given for different states and union territories in Table 1 at the end of Appendix-B.

3. Estimation Procedure

Procedures for obtaining estimates of aggregates, ratios and their RSEs is briefly indicated below:

3.1 Notations:

s = subscript for s -th stratum

t = subscript for t -th sub-stratum (only for rural sector)

m = subscript for sub-sample ($m = 1, 2$)

i = subscript for i -th FSU [village (panchayat ward)/ block/ non-UFS town]

d = subscript for a hamlet-group/ sub-block ($d = 1, 2$)

j = subscript for j -th second stage stratum in an FSU/ hg/sb [$j = 1, 2$ or 3]

k = subscript for k -th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/ sb's formed in the sample FSU

$D^* = 0$ if $D = 1$

$= (D - 1)$ for FSUs with $D > 1$

N = total number of FSUs in any urban stratum

Z = total size of a rural stratum/sub-stratum (= sum of sizes for all the FSUs of a stratum/sub-stratum)

z = size of sample village used for selection.

n = number of sample FSUs surveyed including 'zero cases' but excluding casualty for a particular sub-sample and stratum/sub-stratum.

H = total number of households listed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

$\hat{X}, \hat{Y}$ = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stmidjk}$ = observed value of the characteristic y for the k -th household in the j -th second stage stratum of the d -th hg/ sb ($d = 1, 2$) of the i -th FSU belonging to the m -th sub-sample for the t -th sub-stratum of s -th stratum.

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

3.2 Estimation of aggregates for a particular sub-sample (m) and stratum (s):

3.2.1 Sub-sample estimate for a sub-stratum in rural areas:

For j-th second stage stratum of a sub-stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

For all second-stage strata combined:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.2.2 Sub-sample estimate for a stratum in rural areas: Sub-sample estimate for a stratum will be obtained by adding sub-sample wise estimates of all the sub-strata ($\hat{Y}_{st}$) of the stratum.

3.2.3 Sub-sample estimate for a stratum in urban areas:

For j-th second stage stratum of a stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

For all second-stage strata combined:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.3 Overall Estimate for Aggregates: Overall estimate for aggregates for a stratum ($\hat{Y}_s$) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

3.4 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate $\hat{Y}$ at the State/ UT/ all-India level is obtained by summing the stratum estimates $\hat{Y}_s$ over all strata belonging to the State/ UT/ all-India.

3.5 Estimates of Ratios: Let $\hat{Y}$ and $\hat{X}$ be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the State/ UT/ all-India level.

Then the combined ratio estimate ($\hat{R}$) of the ratio ($R = \frac{Y}{X}$) will be obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}.$$

3.6 *Estimates of Error:* The estimated variances of the above estimates will be as follows:

3.6.1 *For aggregate $\hat{Y}$:*

$V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s)$ where $V\hat{a}r(\hat{Y}_s)$ is given by

$V\hat{a}r(\hat{Y}_s) = \sum_t \frac{1}{4} (\hat{Y}_{st1} - \hat{Y}_{st2})^2$ for rural stratum, where $\hat{Y}_{st1}$ and $\hat{Y}_{st2}$ are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

and

$V\hat{a}r(\hat{Y}_s) = \frac{1}{4} (\hat{Y}_{s1} - \hat{Y}_{s2})^2$ for urban stratum, $\hat{Y}_{s1}$ and $\hat{Y}_{s2}$ being the stratum estimates for sub-sample 1 and 2 respectively.

3.6.2 *For ratio $\hat{R}$:*

$M\hat{S}E(\hat{R}) = \frac{1}{4\hat{X}^2} \sum_s \sum_t [(\hat{Y}_{st1} - \hat{Y}_{st2})^2 + \hat{R}^2 (\hat{X}_{st1} - \hat{X}_{st2})^2 - 2\hat{R}(\hat{Y}_{st1} - \hat{Y}_{st2})(\hat{X}_{st1} - \hat{X}_{st2})]$
for rural and

$M\hat{S}E(\hat{R}) = \frac{1}{4\hat{X}^2} \sum_s [(\hat{Y}_{s1} - \hat{Y}_{s2})^2 + \hat{R}^2 (\hat{X}_{s1} - \hat{X}_{s2})^2 - 2\hat{R}(\hat{Y}_{s1} - \hat{Y}_{s2})(\hat{X}_{s1} - \hat{X}_{s2})]$
for urban.

3.7 *Estimates of Relative Standard Error (RSE):*

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{V\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

Table B1: Number of FSUs (villages/urban blocks) allotted, number of FSUs surveyed and number of persons enumerated in different states and union territories

Note: 1. Projected population as on 1st March 2009 and 1st March 2010 are from RGI (reference Tables 8 and 9 of the Population Projections for India and States: 2001-2026).

2. Table 8 provides projected population as on 1st March 2009 and 1st March 2010 for rural+urban combined and Table 9 provides projected population as on 1st March 2009 and 1st March 2010 for urban.

3. Projected population as on 1st January 2010 has been derived using the formula, $A = 1 * [(-)^{1/2}]^1$, where A1 is the population for 1st March 2009, A2 is the population for 1st March 2010 and A is the population for 1st January 2010.

4. Projected population as on 1st January 2010 has been derived for the rural+urban and urban separately and that for rural has been derived by subtracting these two.

5. The projections given in this table pre-date the population Census 2011.

SOCIO-ECONOMIC SURVEY
SIXTY-SIXTH ROUND: JULY 2009 – JUNE 2010
SCHEDULE 10: EMPLOYMENT AND UNEMPLOYMENT**

[0] descriptive identification of sample household	
1. state/u.t.:	5. hamlet name:
2. district:	6. ward /inv. unit /block:
3. tehsil/town: *	7. name of head of household:
4. village name:	8. name of informant:

[1] identification of sample household											
item no.	item	code				item no.	item	code			
1.	srl. no. of sample village/block					11.	sub-sample				
2.	round number	6		6		12.	FOD sub-region				
3.	schedule number	1	0	0		13.	sample hg/sb number (1/2)				
4.	sample (<i>central-1, state-2</i>)					14.	second-stage stratum number				
5.	sector (<i>rural-1, urban-2</i>)					15.	sample household number				
6.	NSS region					16.	srl. no. of informant (as in col. 1, block 4)				
7.	district					17.	response code				
8.	stratum					18.	survey code				
9.	sub-stratum					19.	reason for substitution of original household (code)				
10.	sub-round										

Codes for Block 1

item 17: response code:

informant: co-operative and capable -1, co-operative but not capable -2, busy -3, reluctant -4, others -9.

item 18: survey code: household surveyed: original -1, substitute -2, casualty -3.

item 19: reason for substitution of original household:

informant busy -1, members away from home -2, informant non-cooperative -3, others -9.

* tick mark (✓) may be put in the appropriate place.

[2] particulars of field operation												
srl. no.	Item		investigator				supervisory officer (s)					
(1)	(2)		(3)				(4)					
1.	i) name (block letters)											
	ii) code											
2.	date(s) of :		DD	MM	YY	DD	MM	YY				
	(i) survey/ inspection											
	(ii) receipt											
	(iii) scrutiny											
	(iv) despatch											
3.	number of additional sheets attached											
4.	total time taken to canvass	Schedule 10										
5.	(in minutes)	block 9 of Schedule 10										
6.	whether the schedule contains remarks? (yes -1, no-2)		in block 10/ 11				elsewhere in the schedule					
7.	signature											

[10] remarks by investigator

[11] comments by supervisory officer (s)

[3] household characteristics											
1.	household size				10.	whether the household has NREG job card (yes-1, no-2)					
2.	principal industry (NIC-2004)	description:			11.	for rural areas,	whether got work in NREG works during last 365 days (code)				
		code (5-digit)						12.	if code 1 in item 11,	no. of days worked	
										13.	mode of payment (code)
3.	principal occupation (NCO-2004)	description:			is any member of the household the holder of post office account (yes-1, no-2, don't know-9) and number of such accounts in the household as on the date of survey [in items 14 to 17]						
		code (3-digit)				type of post office account		whether held by any member (yes-1, no-2, don't know -9)	no. of accounts in the hh.		
4.	household type (code)				14.	savings bank					
5.	religion (code)				15.	recurring deposit account					
6.	social group (code)				16.	monthly income accounts scheme					
7.	land owned as on the date of survey (0.000 hectares)				17.	any other account or savings instruments					
8.	land possessed as on the date of survey (0.000 hectares)				has any member used the following services in any Post Office during last 3 months (yes-1, no-2, don't know-9) [items 18 to 20]						
					18.	money order					
9.	land cultivated (including orchard and plantation) during July 2008–June 2009 (0.000 hectares)				19.	instant money order					
					20.	international money transfer service					

Note: 1 acre = 0.4047 hectare, 1 hectare=10, 000 sq. metre

Codes for Block 3

item 4: **household type:**

for rural areas: self-employed in non-agriculture -1, agricultural labour -2, other labour -3, self-employed in agriculture -4, others -9.

for urban areas: self-employed -1, regular wage/salary earning -2, casual labour -3, others -9.

item 5: **religion:** Hinduism -1, Islam -2, Christianity -3, Sikhism -4, Jainism -5, Buddhism -6, Zoroastrianism -7, others -9.

item 6: **social group:** scheduled tribe -1, scheduled caste -2, other backward class -3, others -9.

item 11: **whether got work in NREG works:** got work in NREG works -1, sought but did not get work in NREG works -2, did not seek work in NREG works -3.

item 13: **mode of payment:** paid: directly into post office account-1, directly into bank account-2, in a gram sabha meeting-3, by the field assistant/mate-4, by an SHG member-5, through a smartcard-6, other-9; not yet paid-7.

[3.1] indebtedness of rural labour household as on the date of survey (i.e., for households with code 1 in item 5, block 1 along with code 2 or 3 in item 4, block 3)				
srl. no. of loan	nature of loan (code)	source (code)	purpose (code)	amount outstanding including interest as on the date of survey (Rs)
(1)	(2)	(3)	(4)	(5)
total				

Codes for Block 3.1

col. (2): **nature of loan:** hereditary loan -1, loan contracted in cash -2, loan contracted in kind -3, loan contracted partly in cash and partly in kind -4.

col. (3): **source:** government -1, co-operative society -2, bank -3, employer/ landlord -4, agricultural/ professional money lender -5, shopkeeper/ trader -6, relatives/ friends -7, others -9.

col. (4): **purpose:** household consumption: medical expenses -1, educational expenses -2, legal expenses -3, marriage and other ceremonial expenses-4, other household consumption expenses -5; purchase of land/ construction of building -6, other productive purpose -7, repayment of debt -8, others -9.

Codes for Block 4**col. (3): relation to head:**

self -1, spouse of head -2, married child -3, spouse of married child -4, unmarried child -5, grandchild -6, father/ mother/ father-in-law/ mother-in-law -7, brother/ sister/ brother-in-law/ sister-in-law/ other relatives -8, servants/ employees/ other non-relatives -9.

col. (6): marital status:

never married -1, currently married -2, widowed -3, divorced/separated -4.

col. (7): educational level - general:

not literate -01, literate without formal schooling: EGS/ NFEC/ AEC -02, TLC -03, others -04; literate: below primary -05, primary -06, middle -07, secondary -08, higher secondary -10, diploma/certificate course -11, graduate -12, postgraduate and above -13.

col. (8): educational level - technical:

no technical education -01, technical degree in agriculture/ engineering/ technology/ medicine, etc. -02, diploma or certificate (below graduate level) in: agriculture -03, engineering/ technology -04, medicine -05, crafts -06, other subjects -07; diploma or certificate (graduate and above level) in: agriculture -08, engineering/ technology -09, medicine -10, crafts -11, other subjects -12.

col. (9): status of current attendance:

currently not attending:

never attended: school too far -01, to supplement household income -02, education not considered necessary -03, to attend domestic chores -04, others -05;

ever attended but currently not attending: school too far -11, to supplement household income -12, education not considered necessary -13, to attend domestic chores -14, others -15;

currently attending in: EGS/ NFEC/ AEC -21, TLC -22, pre-primary (nursery/ Kinder garten, etc.) -23, primary (class I to IV/ V) -24, middle -25, secondary-26, higher secondary-27, graduate in: agriculture -28, engineering/ technology -29, medicine -30, other subjects -31; post graduate and above -32, diploma or certificate (below graduate level) in: agriculture -33, engineering/ technology -34, medicine -35, crafts -36, other subjects -37; diploma or certificate (graduate level) in: agriculture -38, engineering/ technology -39, medicine -40, crafts -41, other subjects -42; diploma or certificate in post graduate and above level- 43.

col. (10): type of institution: government -1, local body -2, private and aided -3, private and unaided -4, not known -5.

col. (12): whether receiving/received any vocational training:

yes: receiving formal vocational training -1; received vocational training: formal -2, non-formal: hereditary-3, self-learning-4, learning on the job-5, others -6;

did not receive any vocational training -7.

col. (13): field of training:

mechanical engineering trades -01, electrical and electronic engineering trades -02, computer trades -03, civil engineering and building construction related works -04, chemical engineering trades -05, leather related work -06, textile related work -07, catering, nutrition, hotels and restaurant related work -08, artisan/ craftsman/ handicraft and cottage based production work -09, creative arts/ artists -10, agriculture and crop production related skills and food preservation related work -11, non-crop based agricultural and other related activities -12, health and paramedical services related work -13, office and business related work -14, driving and motor mechanic work -15, beautician, hairdressing & related work -16, work related to tour operators/ travel managers -17, photography and related work -18, work related to childcare, nutrition, pre-schools and crèche -19, journalism, mass communication and media related work -20, printing technology related work -21, other -99.

col. (15): source from where degree/diploma/certificate received/to be received:

Industrial Training Institutes (ITIs)/Industrial Training centers (ITCs) -01, School offering vocational courses (Secondary, Higher Secondary level) -02, UGC (first degree level) -03, Polytechnics -04, Community Polytechniques/ Jansiksha Sanstha -05, National Open School -06, Hotel Management Institutes -07, Food craft & Catering Institutes -08, Small Industries Service Institutes/District Industries Centres/Tool Room Centres -09, Fashion Technology Institutes -10, Tailoring, Embroidery and Stitch Craft Institutes -11, Nursing Institutes -12, Rehabilitation/ Physiotherapy /Ophthalmic and Dental Institutes -13, Institutes giving Diploma in Pharmacy -14, Hospital and Medical Training Institutes -15, Nursery Teachers' Training Institutes -16, Institutes offering training for Agricultural Extension -17, Training provided by Carpet Weaving Centers -18, Handloom/ Handicraft Design Training Centers/ KVIC -19, Recognised Motor Driving Schools -20, Institute for Secretariat Practices -21, Recognised Beautician Schools -22, Institutes run by Companies/ Corporations -23, Institutes for Journalism and Mass Communication -24, other institutes -99.

col. (16): whether the vocational training was ever helpful in getting a job:

yes: was helpful in taking up self-employment activity- 1, was helpful in taking up wage/salaried employment-2; was not helpful-3, not applicable-4.

[4] demographic particulars of household members
