Inviting Applications for Solar Water Pumping Systems (FY 2025–26)

Applications are invited for installation of Solar Water Pumping Systems under Component-B of PM-KUSUM Scheme for Phase-II of Financial Year 2025–26 through the SARAL Haryana Portal (NIC) from 25.12.2025 to 29.12.2025 from General Applicants as well as DISCOM Applicants.

It has been observed that during the application process, some applicants were facing the following technical issues:

1. Duplicate Challan Generation

Certain applicants were receiving challans generated during previous application cycles while submitting fresh applications, despite changes in pump type & capacity, rates, and some empanelled vendors in the current phase.

2. Restriction on re-application against Family IDs

The following type of farmers who had applied earlier but are unable to apply afresh against their Family ID.

- did not deposit the beneficiary share earlier, or
- deposited the beneficiary share and subsequently received a refund from the Department, or
- deposited the beneficiary share but remained in the waiting list as the target for the respective phase had been exhausted.

The above issues have now been resolved by the backend technical IT team and now applicants can re-apply..

Accordingly, all interested applicants may now apply afresh on the SARAL Haryana Portal. However, only those Family IDs against which solar water pumps have been allocated to the Empanelled Agency (EA) shall not be permitted to re-apply against the same Family ID, as only one Solar Water Pump is permissible per family as per scheme guidelines.

Issues related to duplicate challan generation and re-application eligibility stand resolved.

Applicants are advised to submit their applications within the stipulated time period.

This is for information and the necessary action of all concerned, please.
