Pensioner's Life Certificate Verification Using Face Recognition Technology

- One time Registration of Pensioner
- One time confirmation of the details by Treasury officer
- Login using PPO Nos for capturing live photo and blink to confirm liveness
- Declaration of marital & employment status
- Verification is mandatory every six months

The screenshot shows the registration interface of the 'Pensioner's Life Certificate Verification' app. At the top, the title 'PENSIONER'S LIFE CERTIFICATE VERIFICATION' is displayed. Below it, a central graphic shows a hand holding a smartphone with a face on the screen, surrounded by labels: 'Face Verification', 'Contactless', 'Liveness Detection', 'Presentless', 'Security', and 'Cashless'. The screen is for the 'Finance Department Government of Meghalaya'. It features two input fields: 'Enter your PPO No' and 'Enter your Password', each with a corresponding icon (a person and a lock). Below these fields is an orange 'LOG IN' button. At the bottom left, there is a link 'Register/Forget Password?' and at the bottom right, a link 'Manual'. The version number 'v 1.0.4' is shown above the logos for 'NIC National Informatics Centre' and 'Digital India Power To Empower'. The footer states 'Powered by National Informatics Centre | 2021'.

The screenshot shows the login interface of the 'Pensioner's Life Certificate Verification' app. At the top right, there is a 'Logout' button with an exit icon. Below the header, a 'Welcome Pensioner Name' message is displayed with a user icon. Underneath, the PPO number is shown as '(PPO No:- MG/100)'. The main section is titled 'LIFE CERTIFICATION' with a green checkmark icon. It contains three orange buttons: 'Submit Photo/Life Certificate (Self Verification)' with a document icon, 'Check Status Status of Photo Submitted/Life Certificate)' with a checkmark icon, and 'Change Password' with a lock icon. Below these buttons is a large circular placeholder for a photo. The version number 'v 1.0.0' is displayed above the logos for 'NIC National Informatics Centre' and 'Digital India Power To Empower'. The footer states 'Powered by National Informatics Centre | 2021'.

Status

- **Status:** Currently running and working in the Centralised Treasury, Sub Treasuries and in some public places in AFIS Machines.
- Creation and Modifications of existing content types as and when required.
- **Ongoing process:** Modifications and updating of the contents

Bill Accounting Preparation System

A software application for preparing bills and sanction orders related to Travelling Allowance, Party Bills, GPF withdrawal, Children Education Advance, Festival Advance, Leave Salary and preparation of DA Arrear for the employees and Members accordingly.

Implemented in Meghalaya Legislative Assembly since 2016

No. of bills sanctioned : 5216

VAHAN & National Permit

VAHAN:

is an online web application for all Vehicle related activities; flagship e-Governance application under National Transport Project.

Salient features and Status:

1. Facilitates Registration of vehicle.
2. Vahan 4 has been implemented in all the DTO's offices of the state and in the State Transport Authority for State permit related activities.
3. Registration Certificate of vehicles are also made available in the digital locker.

No. of
Vehicles
registered:
429594

No. of
Permits:
47079

Future Scope:

Implementation of iRAD, training provided to all the officers of the stake holder departments.

VAHAN National Permit:
is an online web application system for granting of national permits for goods carriages across the country.

Salient features and Status:

Implemented in the office of the State Transport Authority since 2011.

Integrated with SBI payment gateway for generating challan for payment of National Permit Authorization.

No. of NP issued : **5,471**

SARATHI

Sarathi: An online web application which deals with the issuance of driving license and other related activities, Flagship e-Governance application under National Transport Project

Features & Status:

Issuing of Learner License, International Driving Permit, Driving School License, Conductor License
Implemented in all the DTO's of the state
DL is available in the Digital Locker

Transactions :
No. of DL Issued :
1,95,605
No. of LL Issued :
1,67,314
No. Of Online
Transactions : 35,030

Future scope :

Implementation of the online services using Aadhaar authentication for faceless transactions

Online Services enabled in Sarathi
(along with e-payment)

Issuance of
Learner License

Issuance of
Driving License

Renewal of DL

Issuance of
Duplicate DL

Replacement of DL

Issuance of International
Driving Permit

Additional Endorsement
to DL

E-Challan

Description:

An integrated Enforcement solution to manage traffic violations through an Android based mobile app and web-base application.

Features and Status:

Launched officially for the Traffic Police Meghalaya on the 2nd March 2021

Implements the POS machines - cash and credit/debit card payment of fines.

Transactions:

No. of Challans issued : **5378**

Revenue collected :
Rs. 39,27,300

Future Scope:

Integration of Card and online payment with GRAS

Integration with Virtual Court

Integrated Management of PDS

One Nation One Ration Card

Employment Exchange - Connect Kam

Brief Description :

Connect Kam is an online Candidates Registration Portal in the Employment Exchanges. This Portal contain activities like Candidate Registration, Renewal of Registration, Candidate Updation/ Modification etc. Also, development of the Employer registration module is in progress.

Salient features and Status:

- ≡ Candidates can register online in the Portal.
- ≡ Renewal Request for candidate Registration.
- ≡ Request for Update of qualification and other details of candidate on the portal.
- ≡ All the online request(s) are subject to approval of the concerned Employment Officer.
- ≡ Download of candidate's X10 Card.

Case Information System e-Court Project

Brief Description:

CIS means Case Information System. The Case Information System software is a giant move under the initiative of the e committee to make the Indian Judiciary more transparent and more litigant friendly. The CIS 1.0 & 3.2 NC versions are available for High Court and lower court respectively. This Case Information System Software for District Judiciary is created under the guidance of the e-committee, Supreme Court of India through the software team at National Informatics Center (NIC), Pune. The whole idea of CIS to put it in a nutshell is that the litigant should be able to view the daily status of his case, to view the orders of the case, hearing date of his case, the progress of the case on any particular date etc online from any part of the world. The Data is also replicated to National Judicial Data Grid, so as to enable the Public, Litigants and Advocates to avail the services from www.ecourts.gov.in

Features:

- ≡ Registraton and filling of cases.
- ≡ Appeal filling
- ≡ Court Proceeding
- ≡ Backlog and legacy entry
- ≡ Listing of cases
- ≡ Litigants updation
- ≡ Fees Report)

- Implemented in High Court since March 2013
- Implemented in Meghalaya High Court and all District Courts
- Implemented District Council (KHADC)

Cases Pending (Meghalaya High Court)

PMGKY Online Reporting & Monitoring Portal (<http://164.100.250.63:8080/megpmgky/>)

Description: An online portal to enable the Government officials to view and monitor the status of implementation of various schemes which has been identified under the Prime Minister Garib Kalyan Yojana (PMGKY).

- Functions:**
1. The Dashboard - Graphical representation of the data collected in various charts in the homepage
 2. Online Reporting System by users from various departments.

Nine Sectors: (i) PMKISAN (ii) PMJDY (iii) PDS (inc LPG) (iv) IGNOAPS (v) MGNREGS (vi) DIVYANG (vii) MGNREGA (viii) BOCW (ix) Health.

Each sector is being represented by a tab menu on the home page. By clicking on each tab, one can see the overall status of implementation of the scheme at the state level, followed by the breakup at the District level.

Behaviour Change Management App

Brief Description :

The BCM App facilitates disseminating latest SOPs, Notifications, Training materials and health awareness campaigns to equip and inform citizens with the right methodologies and processes in carrying out their daily activities and livelihood and impress upon them the need to inculcate healthy habits to fight against the COVID 19 pandemic.

Benefits of the Mobile App:

The checklist provides a set of questions to help the user to assess himself/herself with regards to hand hygiene, social distancing, respiratory etiquettes etc.
The occupational-wise training modules and SOPs will help to equip and educate various stakeholders like drivers, barbers, security personnel, Govt. officials, Health care providers etc.
The training materials are available in three different languages (Khasi, Garo & English).
Availability of MIS-cum-APIs to enable Health Officials to create new contents, manage contents and view various statistical reports pertaining to the App.

OASIS is an acronym for Online Approvals and Sanctions Information System

It is an application to disseminate information about the Administrative Approvals, Sanctions and Releases of the various schemes and projects of the

RFID Tag Search BT Mobile App

It is an Android mobile application for searching tagged books in the library where the mobile UI facilitates user to key in the Tag ID of the book being searched.

Then the mobile handset is interfaced/paired with a Bluetooth handheld RFID Reader which can be used to scan the library shelves. Once the desired book (Tag ID) is found, the mobile makes a loud sound.

The application is generic in nature and can in fact be used to search for misplaced files, hardware items etc., provided all these have been tagged using RFID Technology.

It is an Android mobile application for counting tagged books in the library where the RFID Handheld Reader is used to scan the library shelves of tagged books.

Then the mobile handset which is interfaced/paired with the handheld RFID Reader through Bluetooth displays the read tags and the count (no. of tags/books read). The unique tag IDs read are also recorded in a SQLite Database in the mobile handset.

The application is generic in nature and can in fact be used to count anything provided the items have been tagged using RFID.
