NTA Scores are normalized scores across multi-shift papers and are based on the relative performance of all those who appeared for the examination in one shift. The marks obtained are transformed into a scale ranging from 100 to 0 for each shift of examinees. NTA score is not the same as the percentage of marks obtained. The NTA Score of a Candidate has been calculated as follows:

$$\frac{100 \times \text{Number of candidates appeared in the 'Shift' with raw score EQUAL TO OR LESS than the score of the candidate in the Shift}}{\text{Total number of candidates who appeared in the 'Shift'}}$$

The percentile of candidates appearing in various shifts of the JEE (Main) 2026 Session 2 are calculated as per above formula and is being declared today.
