(v) All questions of that particular section must be attempted in the correct order.

SECTION A - (Reading Skills)**22**

1. Read the following passage carefully :

12

- (1) Education for Sustainable Development (ESD) is now high on the international agenda and ESD is seen as a way to encourage greater sustainable consumption and production, to counter the effects of climate change, address threats to biodiversity and provide more effective disaster risk reduction. Education for Sustainable Development is seen by UN as a lifelong process from early childhood to higher and adult education and goes beyond formal education. As values, lifestyles and attitudes are established from an early age, the role of

(2)

education is of particular importance for children! ESD has often been associated with curriculum projects linked with recycling; energy and water conservation; pollution reduction and sustainable consumption – all developed to contribute towards achieving a more sustainable future.

- (2) Research from developmental psychology, longitudinal studies, social-cultural analysis, and neuroscience have all shown that it is in the early years that children have the greatest capacity to learn, and it is in these years that many of our fundamental attitudes and values are first put into place. Children are already investigating issues related to recycling, energy conservation, waste disposal and changes in their local environment. ESD in Early Childhood Care and Education (ECCE) is of great significance. The development of ESD and ECCE requires more than just curriculum development. It provides the possibility of a transformational reconstruction.
- (3) UNICEF reports show that children under the age of eight represent the highest percentage of affected population in today's global emergencies. A UNESCO survey has shown that the ministries of education, environment and sustainable development in 97 UN member states identify poverty as the highest priority area to be addressed in achieving sustainable development. In fact, reductions in poverty and inequality are widely recognised as the priority in efforts to create a more sustainable world. At a global level, millions of children start school carrying the handicap that comes with the experience of malnutrition, ill-health and poverty. Yet, equitable access to high-quality pre-school programmes remains a problem in both rich and poor countries. Sustainable development projects that enable rapid progress in maternal health, child nutrition and survival already exist, even in some of the world's poorest countries. Linking health and education agenda has been recognised as extremely important.

Answer the following questions based on the above passage:

- (i) Complete the following with a suitable explanation with reference to paragraph 1. ESD is now high on the international agenda because _____. 1
- (ii) Based on the given passage, how does UN view ESD as a lifelong process? What are the critical areas of emphasis? (Paragraph 1) 2
- (iii) List two curriculum projects that ESD (Education for Sustainable Development) has been linked with. (Paragraph 1). 2
- (iv) Complete the following sentence suitably: (Paragraph 2) 2
Many of our fundamental attitudes and values are put into plan in the early years as _____.
- (v) Substitute the underlined word with the correct word from paragraph 2: 1

ESD in Early Childhood Care and Education provides the possibility of transformational reconstruction.

- (A) positive change
- (B) power to reform
- (C) negative impact
- (D) creative

- (vi) What do UNICEF reports reveal about the vulnerability of children under the age of eight during global emergencies? (Paragraph 3) 1

- (A) UNICEF reports highlight the resilience of children under the age of eight during global emergencies.
- (B) UNICEF reports indicate that children under the age of eight are rarely affected by global emergencies.
- (C) UNICEF reports show that children under the age of eight represent the highest percentage of affected population in global emergencies.

(D) UNICEF reports suggest that children under the age of eight are primarily responsible for responding to global emergencies.

- (vii) What remains a problem in both rich and poor countries? What has been recognised as crucial? (Paragraph 3) 1
- (viii) What is the writer's tone in the passage? Justify your claim. 2
2. Read the following passage carefully : 10

- (i) Creativity is our most precious resource and the most inexhaustible one. As anyone who has ever spent any time with children knows, every single human being is born creative; every human being is innately endowed with the ability to combine data and perceptions, materials and ideas and devise new ways of thinking and doing. What fosters creativity? More than anything else: the presence of other creative people, contrary to that creativity is the province of great individual geniuses. In fact creativity is a social process. Our biggest creative breakthrough comes when people learn from, compete with, and collaborate with other people.
- (ii) Cities are centre of creativity. With their diverse populations, dense social networks and public spaces, people can meet spontaneously and spark or catalyse new ideas. With their infrastructure for finance, organisation and trade, they allow the idea to swiftly reach its destination.
- (iii) A study tracking the decline of unconventional thinking ability as children age, states that while 98 percent of 3 to 5 years old exhibited creative thinking, this dwindled to 10 percent among 13 to 15 years old and a mere 2 percent among 25 years old. Thus, adulthood witnesses the erosion of innate creativity. There is a variance in creative vitality across cities. Although all cities harbour creative individuals by default, some are saturated with leaders, institutions, and people that inhibit creativity.

- (iv) Creativity (or the lack of it) follows the same general contours of the great socio-economic divide – our rising inequality – that plagues us. According to estimates, roughly one-third people are able to do work which engages our creative faculties to some extent, whether as artists, musicians, writers, techies, innovators, entrepreneurs, doctors, lawyers, journalists or educators. That leaves a group termed “the other 66 percent”, in which their creativity is subjugated, ignored or wasted.
- (v) Creativity itself is not in danger. It is flourishing all around us – in science and technology, arts and culture, in our rapidly revitalising cities. But we still have a long way to go if we want to build a truly creative society that supports and rewards creativity of each one of us.

Answer the following questions, based on the passage above :

- (i) The central idea of this passage is that : 1
- (A) social interaction is necessary to nurture creativity.
- (B) creativity and ideas are gradually declining in all societies.
- (C) the creativity divide is widening in societies in line with socio-economic trends.
- (D) more people should work in jobs that engage their creative faculties.
- (ii) Select the option that is true for the assertion and reason given below: 1
- Assertion: Creativity is the province of great individual genius is not true.
Reason: Creativity is a social process.
- (A) Both the Assertion and Reason are true, and the reason is the correct explanation of the assertion.
- (B) Both the Assertion and Reason are true but the reason is not the correct explanation of the assertion.
- (C) The Assertion is true, but the Reason is false.
- (D) The Assertion is false, but the Reason is true.

- (iii) Identify the word in paragraph 1 which means something that cannot be used-up or depleted. 1
- (iv) What important trends does a study tracking the decline in creative thinking ability in children reveal? Answer in about 40 words. 2
- (v) Read the given prompt and select the correct option in the brackets to fill in the blank. 1
- Our biggest creative breakthrough comes when people learn from, compete with, and collaborate with other people. Creativity is thus a _____ (economic, industrial, social) process.
- (vi) According to the passage, where does creativity thrive apart from arts and culture? 1
- (vii) Complete the following with a suitable reason : 1
- About thirty-three percent citizens engage their creative faculties in tasks that use _____.
- (viii) In the context of the last paragraph, explain how the passage views the future of creativity in society. 2

यह आंदोलन शहरों में मध्यम वर्ग की भागीदारी से शुरू हुआ। हज़ारों छात्रों ने सरकारी स्कूल और कॉलेज छोड़ दिए, प्रधानाध्यापकों और शिक्षकों ने इस्तीफ़ा दे दिया, और वकीलों ने अपनी वकालत छोड़ दी। मद्रास को छोड़कर अधिकांश प्रांतों में परिषद के चुनावों का बहिष्कार किया गया, जहाँ गैर-ब्राह्मणों की पार्टी, जस्टिस पार्टी, का मानना था कि प्रांतीय परिषद में प्रवेश करना कुछ शक्ति प्राप्त करने का एक तरीका है - ऐसा कुछ जिस तक आमतौर पर केवल ब्राह्मणों की ही पहुँच थी। आर्थिक मोर्चे पर असहयोग के प्रभाव और भी नाटकीय थे। विदेशी वस्तुओं का बहिष्कार किया गया, शराब की दुकानों पर धरना दिया गया और विदेशी कपड़ों को विशाल होलिकाओं में जलाया गया। 1921 और 1922 के बीच विदेशी कपड़े का आयात आधा हो गया, और इसका मूल्य 102 करोड़ रुपये से घटकर 57 करोड़ रुपये रह गया। कई जगहों पर, व्यापारियों और कारोबारियों ने विदेशी वस्तुओं का व्यापार करने या विदेशी व्यापार को वित्तपोषित करने से इनकार कर दिया। जैसे-जैसे बहिष्कार आंदोलन फैला, और लोगों ने आयातित कपड़े त्यागकर केवल भारतीय कपड़े पहनना शुरू किया, भारतीय कपड़ा मिलों और हथकरघों का उत्पादन बढ़ता गया।

The movement started with middle-class participation in the cities. Thousands of students left government- controlled schools and colleges, headmasters and teachers resigned, and lawyers

gave up their legal practices. The council elections were boycotted in most provinces except Madras, where the Justice Party, the party of the non-Brahmans, felt that entering the council was one way of gaining some power - something that usually only Brahmans had access to. The effects of non-cooperation on the economic front were more dramatic. Foreign goods were boycotted, liquor shops picketed, and foreign cloth burnt in huge bonfires. The import of foreign cloth halved between 1921 and 1922, its value dropping from rupees 102 crore to rupees 57 crore. In many places, merchants and traders refused to trade in foreign goods or finance foreign trade. As the boycott movement spread, and people began discarding imported clothes and wearing only Indian ones, the production of Indian textile mills and handlooms went up.

भारत के सतत विकास और ऊर्जा सुरक्षा की खोज में गैर-पारंपरिक या नवीकरणीय ऊर्जा स्रोतों ने एक महत्वपूर्ण भूमिका निभाई है। इन स्रोतों, जिनमें सौर, पवन, जल विद्युत, बायोमास और भूतापीय ऊर्जा शामिल हैं, ने हाल के वर्षों में उल्लेखनीय वृद्धि और इसको प्रयोग करते हुए देखा है। विशेष रूप से सौर ऊर्जा में तीव्र वृद्धि हुई है, और भारत दुनिया के सबसे बड़े सौर ऊर्जा उत्पादकों में से एक के रूप में उभरा है। पवन ऊर्जा भी इसमें महत्वपूर्ण योगदान देती है, तमिलनाडु, महाराष्ट्र और गुजरात जैसे राज्यों में पवन ऊर्जा फार्मों की भरमार है। जल विद्युत, बायोमास और भूतापीय स्रोत भी भारत के नवीकरणीय ऊर्जा पोर्टफोलियो में महत्वपूर्ण भूमिका निभाते हैं। गैर-पारंपरिक स्रोत भारत को अपने कार्बन उत्सर्जन को कम करने, जलवायु परिवर्तन से निपटने और ऊर्जा आत्मनिर्भरता बढ़ाने में मदद कर रहे हैं। ये स्रोत ग्रामीण विद्युतीकरण को बढ़ावा दे रहे हैं, रोजगार सृजन कर रहे हैं और आर्थिक विकास को गति प्रदान करते हुए एक स्वच्छ और हरित भविष्य को बढ़ावा दे रहे हैं।

Non-conventional or renewable energy sources have assumed a paramount role in India's quest for sustainable development and energy security. These sources, which include solar, wind, hydropower, biomass, and geothermal energy, have witnessed remarkable growth and adoption in recent years. Solar energy, in particular, has experienced a meteoric rise, with India emerging as one of the world's largest solar power producers. Wind energy is another significant contributor, with wind farms dotting the landscape in states like Tamil Nadu, Maharashtra, and Gujarat. Hydropower, biomass, and geothermal sources also play vital roles in India's renewable energy portfolio. Non-conventional sources are helping India reduce its carbon footprint, combat climate change, and enhance energy self-sufficiency. They are bolstering rural electrification, creating jobs, and catalyzing economic growth while promoting a cleaner and greener future.

सांप्रदायिक राजनीति इस विचार पर आधारित है कि धर्म सामाजिक समुदाय का प्रमुख आधार है। सांप्रदायिकता में निम्नलिखित विचारधाराएँ शामिल हैं। किसी विशेष धर्म के अनुयायी एक ही समुदाय के होने चाहिए। उनके मूलभूत हित समान हैं। उनके बीच कोई भी अंतर सामुदायिक जीवन के लिए अप्रासंगिक या तुच्छ है। इससे यह भी निष्कर्ष निकलता है कि विभिन्न धर्मों को मानने वाले लोग एक ही सामाजिक समुदाय के नहीं हो सकते। यदि विभिन्न धर्मों के अनुयायियों में कुछ समानताएँ हैं, तो वे सतही और महत्वहीन हैं। उनके हित अलग-अलग होंगे और उनमें संघर्ष होगा। अपने चरम रूप में, सांप्रदायिकता इस विश्वास को जन्म देती है कि विभिन्न धर्मों के लोग एक राष्ट्र के भीतर समान नागरिक के रूप में नहीं रह सकते। या तो उनमें से एक को बाकी पर प्रभुत्व स्थापित करना होगा, या उन्हें अलग-अलग राष्ट्र बनाने होंगे।

Communal politics is based on the idea that religion is the principal basis of social community. Communalism involves thinking along the following lines. The followers of a particular religion must belong to one community. Their fundamental interests are the same. Any difference that they may have is irrelevant or trivial for community life. It also follows that people who follow different religions cannot belong to the same social community. If the followers of different religions have some commonalities, these are superficial and immaterial. Their interests are bound to be different and involve a conflict. In its extreme form, communalism leads to the belief that people belonging to different religions cannot live as equal citizens within one nation. Either one of them has to dominate the rest, or they have to form different nations.

भारत में जल संरक्षण एक अत्यधिक महत्वपूर्ण मुद्दा बनता जा रहा है । जल संसाधनों की सीमित उपलब्धता और बढ़ती जनसंख्या के कारण पानी की मांग तेजी से बढ़ रही है । खासकर कृषि क्षेत्र में पानी की आवश्यकता अत्यधिक होती है, क्योंकि सिंचाई के लिए अधिक मात्रा में पानी की जरूरत होती है । भारतीय किसान मुख्य रूप से सिंचाई के लिए नदियों, झीलों और भूजल का उपयोग करते हैं । लेकिन जल संसाधनों का सही उपयोग न होने के कारण कई क्षेत्रों में जल संकट उत्पन्न हो गया है । इसका सबसे बड़ा प्रभाव सूखा प्रभावित क्षेत्रों और शहरी इलाकों में देखने को मिलता है, जहाँ पानी की कमी गंभीर समस्या बन गई है । इन परिस्थितियों में जल संरक्षण अत्यंत आवश्यक हो गया है , ताकि आने वाली पीढ़ियों के लिए जल की उपलब्धता सुनिश्चित की जा सके ।

सरकार ने जल संरक्षण को बढ़ावा देने के लिए 'जल जीवन मिशन' और 'जल शक्ति अभियान' जैसी योजनाएं शुरू की है । इन योजनाओं का उद्देश्य जल संचयन, जल पुनर्भरण, और जल स्रोतों के संरक्षण को प्रोत्साहित करना है । साथ ही, सूखा प्रभावित क्षेत्रों में सूक्ष्म सिंचाई पद्धति को अपनाने पर भी ज़ोर दिया जा रहा है, जिससे पानी की बर्बादी को रोका जा सके । सरकार द्वारा जागरूकता अभियानों के माध्यम से लोगों को जल संरक्षण के महत्त्व के बारे में जानकारी दी जा रही है । इन अभियानों के अंतर्गत पानी बचाने के लिए वर्षा जल संचयन, पानी का पुनः उपयोग और जल के सही प्रबंधन जैसी तकनीकों का प्रयोग करने पर ज़ोर दिया जाता है । जल संरक्षण न केवल

पर्यावरण के लिए बल्कि देश की अर्थव्यवस्था और भविष्य की पीढ़ियों के लिए भी महत्वपूर्ण है।
