

# B a L A - Building as Learning Aid

BaLA (Building as Learning Aid) is an innovative concept towards qualitative improvement in education, through developing child-friendly, learning and fun based physical environment building in school infrastructure.

This concept was originally developed by Vinyas, Centre for Architectural Research & Design with support from UNICEF.

## What is BaLA ?

BaLA is a way to holistically plan and use the school infrastructure. It incorporates the ideas of activity based learning, child friendliness and inclusive education for children with special needs (CWSN). At the core, it assumes that the architecture of school can be a resource for the teaching-learning processes.
