

RAJYASTARIYA BAL VAIGYANIK PRADARSHANI-2024

I, **DEVIKA ASHWIN DESAI**, studying at **PM SHRI KENDRIYA VIDYALAYA NO.2 JALAHALLI BANGALORE** began my journey to **RSVBP** at the school level, when our school's science and other faculty members evaluated our projects, chose us, and offered advice on how to improve them. Later, I was sent to the regional level of the **RSVBP**, where there were more than fifty participants in my health category. The judges from **IISC Bangalore** examined our technical opinions and skills related to the project, since my project involved millet-based ice cream, which is recyclable, low-cost, zero-waste, and contains the maximum amount of macro- and micronutrients. I obtained the top spot {**First position**} in the regional competition and was subsequently chosen for the **KVS National Level RSVBP**, which was hosted at **KIIT University in Bhubaneswar Odisha** . I improvised my project to be the best in the nationals as my aim is to provide each citizens of this country and world a healthy ,sustainable, low cost,

pocket friendly and no side effect ice-cream so that people are healthy and don't have to spend lakhs together in the hospitals.

The journey from Bangalore to Odisha wasn't easy; it was a total roller coaster ride where our train was postponed and then the train was delayed for 14+hours, there was no AC, and I was carrying the ice-cream from Bangalore to Bhubaneshwar in an insulated ice box, the temperature there was too hot, and the judges there were from CSIR and renowned organizations the judged us and were questioning us very high order questions, which I could answer because I was prepared for the worst ,best came to my path;

I won first place again at the national level among 600+ participants and was chosen to compete in the upcoming Open RSVBP national, which will be conducted by the government of India and NCERT.I will be representing KVS at the open nationals. I thank each one who has directly or indirectly helped and contributed towards this project .
