

Short-Duration Courses and Workshops

Apart from the In-service courses, KVS conducts Short Term Courses for all categories of employees to empower them in various fields. Short Duration Courses (SDC) are an important component of professional development in KVS (Kendriya Vidyalaya Sangathan) as they offer numerous benefits for both teachers and the organization as a whole. SDCs provide teachers with opportunities to upgrade their skills and knowledge on specific topics or areas of their teaching. The skills and knowledge gained through short duration workshops can help teachers to improve the quality of their teaching, resulting in enhanced student learning outcomes. Short duration workshops keep teachers up to date with new trends, techniques, and technologies in education. They provide opportunities for teachers to network and collaborate with peers from other schools or educational institutions. This enables teachers to share best practices, ideas, and resources, and fosters a sense of community and collaboration.
