

The ZIET Mysuru Training Calendar for 2026–27 outlines a highly comprehensive and structured framework for professional development. It bridges pedagogical refinement with crucial administrative modernization. The schedule exhibits a deliberate emphasis on experiential and competency-based education. Programs range from integrating art and music to specialized teaching in physics. Notably, the calendar prioritizes mental health and well-being. This focus supports school leadership and enhances effective teaching practices. Technological advancement is also highly prominent. Dedicated sessions address artificial intelligence, e-Granthalaya, and ICT tools.

The calendar also showcases an inclusive professional development approach. It targets every operational tier within the educational ecosystem. Training programs directly engage principals, primary teachers, and foundational balvatika instructors. Essential non-teaching support groups also receive structured learning. These include administrative staff, secretarial personnel, and sub-staff members. Most training modules utilize intensive offline delivery formats. This strategy ensures collaborative, immersive, and hands-on skill acquisition. The total projected reach exceeds 2,700 participants. This extensive turnout drives systemic capacity building across the region.
