Dated 21 Nov,2022

**To Whom It May Concern**

Having been engaged for issuing the certificate for the Safety & Security of School buildings, I have visited the school premises of Kendriya vidyalaya Sec 29 Chandigarh alongwith the Principal on 12 Nov , 2022. I am of the opinion that the Single / Double storeyed School buildings and Staff Quarters are structurally sound , Stable and are safe . These have been designed as framed Structure and constructed with permanent Specifications taking into consideration Seismic & Earthquake measures as per IS Code.

Secondly the School premises of the School have been provided with Steel Gate and boundary wall all around for Safety & Security and is of six feet high. It is recommended that the height of the boundary wall should be raised to 10' or 4' high barbed wire fencing with Y shaped Angle Iron with concertina coils on top be provided for safety and security of School Children and Staff.

Thirdly, The height of Tall trees be reduced to suitable heights so that these may not damage the buildings in case of strong winds / storms. In this connection horticulture Deptt of UT Admn please be approached.

Place : Chandigarh/ Mohali
