जीवविज्ञान प्रयोगशाला BIOLOGY LAB

Biology lab is well equipped with all the basic facilities. There are 12 compound microscopes to meet the demands of the students of Classes XI & XII. The lab is airy and well-ventilated providing a congenial environment for the students to perform practical. All apparatus is available for demonstration and doing experiments. The lab is spacious and furniture is available for proper seating. Articulated skeletal system is in display used by students of different categories. A model of skeletal system is also available. Models are available so that students get better understanding about the topic. Display boards are available where latest things on science and technology are displayed.

Practicals are carried out regularly for the students of class XI and XII as per the timetable. Students visit the lab and carry out the experiments with great zeal. Secondary students also visit the lab as per the requirements of their class. Lower classes visit the lab and observe specimens and slides and appreciate the beauty of the different organisms.

The lab is decorated with charts so that students gain knowledge about systems, nutrition, pedigree, etc. All equipment's bought for modernisation of lab is being used efficiently. Students use the time judiciously in the lab. Changes are made in the lab as per the need of the students. The lab being well equipped is functioning well. A soil kit is purchased under PM Shri activities for experiential learning in school.
