NIPUN NEWSLETTER

PRIMARY WING

Session - 2026-27

FROM THE DESK OF PRINCIPAL SIR

Success comes to those who work hard and stays with those, who don't rest on the laurels of the past." It is indeed a great honour and it gives me immense pleasure to launch this first issue of primary CMP newsletter for the session 2026- 2027. The primary newsletter is truly representative of all the activities that are conducted in the primary section. Each issue of our newsletter is a milestone that marks our growth and showcases a wide spectrum of creative skills. I would like to convey my gratitude to all the members for their everlasting support throughout the creation of this edition. I would like to especially thank the students and parents whose efforts have made us extremely proud of all our accomplishments at the school and I look forward to the new heights that await this school. I congratulate the headmistress and the entire staff for their hard work and dedication by working round the clock to keep our school at the zenith of success"

FROM THE DESK OF HEADMISTRESS

Dear teachers, students, parents and well-wishers. this newsletter reflects the efforts, dedication and enthusiasm of the teachers and students of KV Rajokri. My heartiest congratulations and gratitude to them. Our dedicated teachers and hardworking students carried out all creative activities very well and this newsletter speaks volumes about the initiatives undertaken during these hard times. It reflects the world of art, innovation, creativity and words by our little blooming stars. Thanks to one and all who contributed for this.

OVERVIEW

Foundational Literacy and Numeracy (FLN) refer to a child's ability to read simple sentences with meaning and solve basic math problems by the end of Class 3. Children learn by doing and actively use their sensory capacities to understand the world around them. They discover and construct knowledge through the activities they are involved in. To enable children to understand concepts and develop their abilities, adults need to provide them opportunities to explore their environment, manipulate objects, engage in experimentation and ask questions and search for answers. These hands-on experiences help them understand how things work and in this way each child re-constructs his/her own understanding of the world.

The vision of the Mission is to create an enabling environment to ensure universal acquisition of foundational literacy and numeracy, so that by 2026-27 every child achieves the desired learning competencies in reading, writing and numeracy at the end of Grade III. The aim of FLN is to ensure that children learn in a joyful manner through play, stories, rhymes, activities, local art, craft and music and develop strong foundations for lifelong learning. The mission outlines learning outcomes which have been designed in a spiral and progressive manner from Preschool to grade III aiming at holistic development and learning. Strong foundations in the early years have lasting impact on children's development and are considered to be critical inputs in improving the enrolment and participation of children in formal schooling. Children must have readiness required for reading and writing. They are lagging behind in foundational literacy skills due to lack of proper reading and writing.

The goal of foundational literacy is to enable children to orally communicate with ease, make a meaningful connection with reading and writing in familiar context and develop interest in books and in learning.

Students being able to read with comprehension:

Identify letters

Read familiar

words

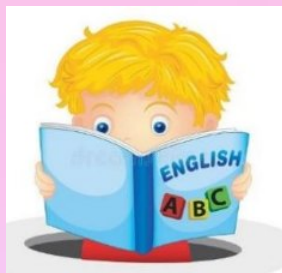

Listen with comprehension

Read with fluency and

comprehension

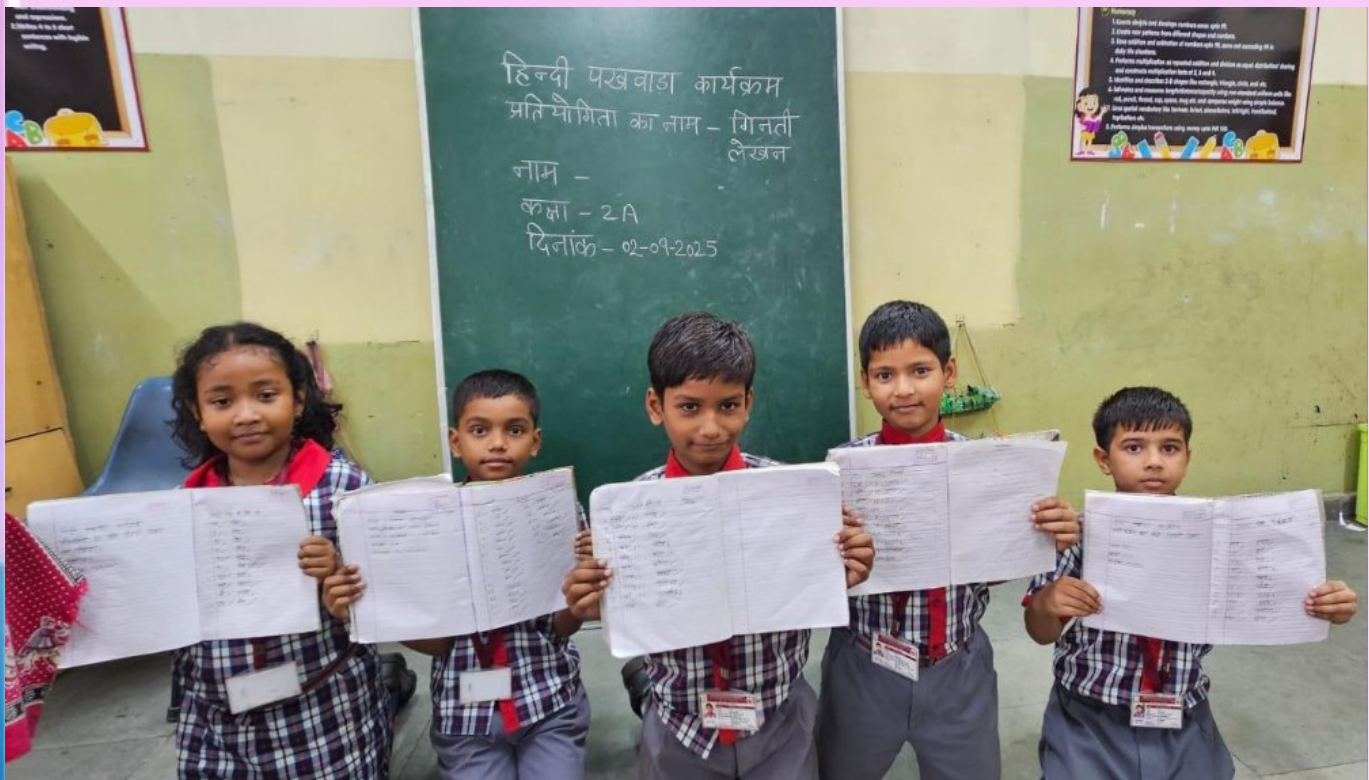

Write 3-4

sentences independently

Writing is an important skill for students to develop for several reasons. First, it helps them communicate their thoughts and ideas effectively. This is important for academic. Second, writing helps students develop critical thinking and problem-solving skills, as they must organize their thoughts and present them in a logical and cohesive manner. Third, writing is an effective way for students to express themselves creatively. Finally, writing skill is an essential skill that improve their language and communication skill and develop their fine motor skill.

SPEAKING

Speaking skill is a vital aspect of communication that encompasses not only the ability to articulate thoughts and ideas clearly but also the capacity to engage and connect with an audience effectively. Whether it's delivering a speech, participating in a conversation, or presenting ideas in a professional setting, strong speaking skills can significantly impact one's success and influence.

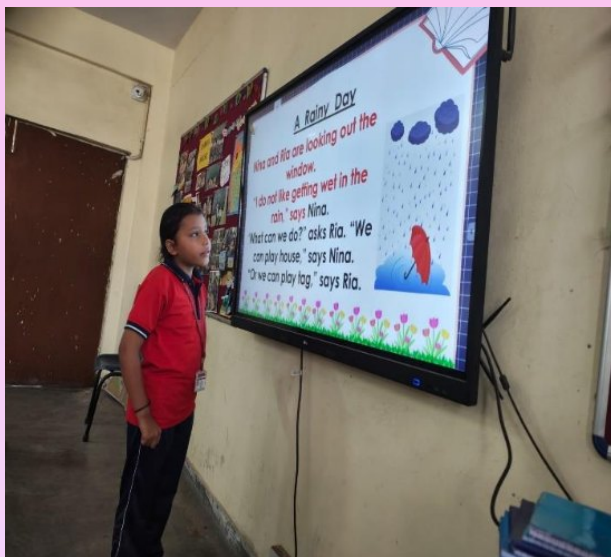

LISTENING

Listening skill is often underrated but is, in fact, a cornerstone of effective communication. It involves not just hearing what someone else is saying but actively processing and understanding their message. Whether in personal relationships, professional settings, or everyday interactions, honing listening skills can lead to deeper connections, improved relationships, and better outcomes.

Reading is important for students as it helps to develop their vocabulary, comprehension, and critical thinking skills. It also improves their writing and communication skills, and can increase their knowledge and understanding of various subjects. Additionally, reading can help to improve focus and concentration, and can be a valuable tool for stress reduction. Overall, reading is a key component of a well-rounded education and can have a positive impact on a student's academic and personal growth.

Numeracy is the ability to understand and work with numbers. It is an important skill for students to have as it is essential for success in math and in many other areas of life, such as personal finance, business, and everyday problem-solving. For class 3 students, numeracy skills include being able to count, understand basic arithmetic operations, and understand and use numbers in real-world contexts. Developing strong numeracy skills in early childhood can also help lay a foundation for future success in mathematics and other subjects.

CLA HOUSE MEETING

BUILDING BONDS AND SHARING STRENGTH

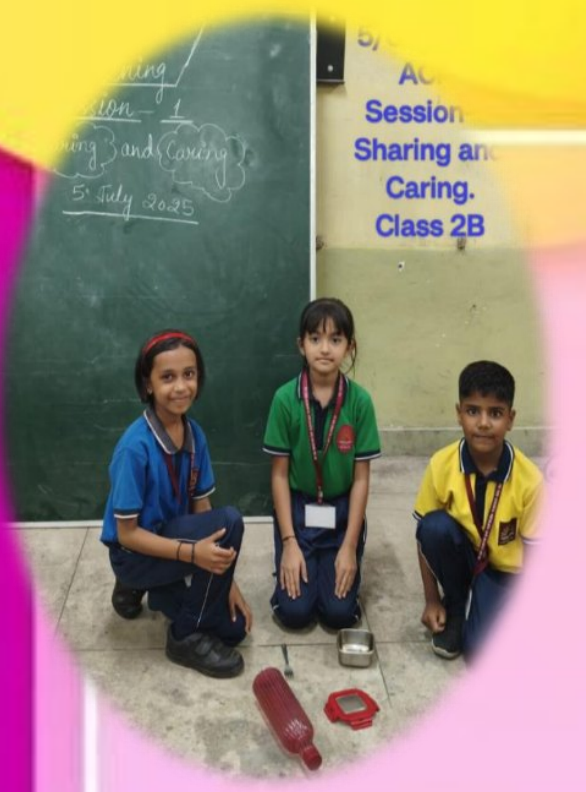

EARTH DAY

LET'S NURTURE OUR PLANET

YOGA DAY CELEBRATION

Vidya Pravesh is like opening the first page of a magical book — where each rhyme is a melody, every game is a lesson, and every smile is the beginning of wisdom. It is the gentle hand that leads a child from the world of play into the joyful garden of learning, sowing seeds of curiosity, values, and imagination that bloom for a lifetime.
