

HANDS ON SKILL TRAINING

Hands-on skills are abilities acquired through active engagement and practical learning rather than the typical classroom lectures or books. People can enforce these skills by practicing what they're learning immediately.

A hands-on approach to learning provides you with techniques, tools and skills, which can help enhance your self-esteem. Traditional training techniques often deliver knowledge that employees may practice right away. A hands-on approach may enable you to incorporate specific skill sets into your work quicker since you've exercised them throughout your training.

Many hands on skills trainings are being conducted in our school PM SHRI Kendriya Vidyalaya No.1, Amritsar Cantt. Under which Carpentry and Electrician etc workshops are being organised by Work Experience Department. Fabric painting and Block printing etc workshops are being organised by Art Education Department.

Apart from this, some other Hands on skills training have also been given to students like Pot Painting, Clay modelling etc by inviting different experts and artists
