

## Observing the Jal Pakhwada at KV NO.3, RRL JORHAT

(16 to 30 April 2025)

Publish Date: 19/04/2025

"Every Drop Counts for Our Future"

Today, students and staff at Vidyalaya premises began a special Water Conservation Awareness Program. On the first day, everyone came together and took an oath to save water and use it wisely. The message was clear: Every drop of water is important for our future.

During the assembly, students held signs and promised to avoid wasting water. They learned simple ways to save water, like turning off taps properly, fixing leaks, and using only what is needed.

Our principal, said, "Saving water is everyone's responsibility. Let's all do our part."

In the coming days, students will take part in fun and educational activities like poster making, quizzes, and talks about water conservation.

Together, we can make a big difference by saving water every day!
