

## National Disaster Management

Recently, our school hosted a national disaster management activity aimed at educating students about emergency preparedness and response. The event brought together experts in disaster management, including firefighters, paramedics, and local authorities, who conducted informative sessions and practical demonstrations. Students participated enthusiastically, learning essential skills such as first aid, fire safety, and evacuation procedures. On 27.01.2024 the mock drill was conducted in school. The students teachers and other staffs were present on the drill and they showed an enthusiastic approach to learn about how to manage the situation if something happens. approximately 800 students and other stake holders are present there .
