

## Save Every Drop: Celebrate Jal Pakhwada (April 16th - 30th)

Dear Students, Teachers, and Staff,

As we observe **Jal Pakhwada** from **April 16th to 30th**, let's come together to recognize the immense value of water and pledge to conserve this precious resource. Water is the lifeline of our planet, essential for our survival and the well-being of all living beings.

This fortnight is a special opportunity for us to learn more about water conservation and adopt sustainable practices in our daily lives, both at school and at home.

### Why is Water Conservation Important?

- **Scarcity:** Clean and accessible water is becoming increasingly scarce globally.
- **Sustainability:** Conserving water ensures its availability for future generations.
- **Environment:** Wise water usage protects our ecosystems and reduces energy consumption associated with water treatment and transportation.
- **Cost-Effective:** Using less water can lead to significant savings on bills.

### Let's Make a Difference During Jal Pakhwada and Beyond!

Here are some simple yet impactful ways we can contribute to water conservation:

- **Report Leaks:** If you see any dripping taps or leaking pipes in school or at home, report them immediately.
- **Use Water Wisely in Washrooms:** Don't leave taps running while washing hands or brushing teeth.
- **Conserve Water During Cleaning:** Use buckets instead of hoses for cleaning floors and vehicles.
- **Water Plants Efficiently:** Water plants during cooler parts of the day and consider using watering cans instead of sprinklers.
- **Learn and Share:** Educate yourself and others about the importance of water conservation. Discuss water-saving tips with your family and friends.
- **Participate in School Activities:** Look out for special events and activities organized by the school during Jal Pakhwada to raise awareness about water conservation.

Every drop we save makes a difference. Let's work together to become responsible water users and contribute to a water-secure future.

"Save Water, Secure Our Future."
