FIRST PRE-BOARD EXAMINATION 2024-25

MARKING SCHEME

प्रथम प्री बोर्ड परीक्षा -2024-25

CLASS: X

SUBJECT: ARTIFICIAL INTELLIGENCE

MAX MARKS: 50

TIME ALLOWED: 2HRS

	Section A (Objective Type Questions)				
1	Answer any 4 out of the given 6 question on Employability skill(1X4=4 Marks)				
i	Statement 1: A realistic goal is one that cannot be achieved with in limited time.				
	Statement 2: Breaking down big goal in to smaller parts helps in achieving the goal.				
	a) Both statements 1 and statement 2 are correct.				
	b) Both statements 1 and statement 2 are incorrect.				
	c) Statement 1 is correct but statement 2 is incorrect.				
	Statement 1 is incorrect but statement 2 is correct.				
	Ans (d) Statement 1 is incorrect but statement 2 is correct.				
ii	Which of these is NOT a common communication barrier?				
	(a) Linguistic barrier (b) Interpersonal barrier				
	(c) Financial barrier (d) Organisational barrier				
	Ans: (c) Financial barrier				
111	The first screen that appears on monitor after loading OS is called				
	(a) Icons (b) Desktop				
	(c) Wall paper (d) None of the above				
	Answer: (b) Desktop				
iv	When you are under for a prolonged period of time, it can cause health				
	problems and mental troubles as well.				
	a. Stress b. Discipline				
	c. Timeliness d. Goal – Setting				
	Ans: a. Stress				
v.	Qualities of entrepreneur are:				
	a) Never giving up b) Hard working				
	c)Perseverance d) All the above				
	Ans (d) All the above				
vi.	Which organisation has made the Sustainable Development Goals.				
	(a) United Nations (b) League of Nations				
	(c) UNICEF (d) World Health Organisation				
	Ans: (a) United Nations				
2	Answer any 5 out of 6 the given question (1X5=5 marks)				
i.	Companies use application of NLP, to identify opinions and feelings/emotions				
	online to help them understand what customers think about their products and services.				
	a. Sentiment Analysis b. Automatic Summarization				
	c. Text classification d. Virtual Assistants				
L	Ans: a. Sentiment Analysis				
ii	A Category of intelligence relating to the ability to process information on the				
	environment around us is				
	a. Musical Intelligence b. Naturalist Intelligence				

	c. Interpersonal Intelligence d. Kinaesthetic Intelligence Ans. b. Naturalist Intelligence				
iii	Fill in the blank: Neural Network is a mesh of multiple				
	Answer: Hidden Layers / Layers				
iv	Identify the application of Computer Vision from the following:				
	a) Voice Assistant b) Face recognition				
	c) Recommendations d) None of the above				
	Ans b) Face recognition				
v.	Which of the following is a common data source used in data science?				
	a) Social Media Posts				
	b) Weather Reports				
	c) Sensor Data				
	d) All of the Above				
	Answer:				
T 7'	d) All of the Above				
V1	Identify the domain of AI in the following image:				
	a) Data Science b) Natural Language Processing				
	c) Computer vision d) Rule Base				
	Answer: Computer Vision				
3	Answer any 5 out of 6 the given question (185–5 marks)				
:	Which of the following is an exemple of a voice based wirtual assistant?				
1.	a Alava b Siri				
a. Alexa b. Siri c. Cortana d. All of the above					
ii	is defined as the ability to perceive the visual world and the relationship of one				
	is defined as the ability to perceive the visual world and the relationship of one object with other				
	a Mathematical Logical Reasoning h Musical Intelligence				
	c Spatial Visual Intelligence d. Linguistic Intelligence				
	Ans. c. Spatial Visual Intelligence				
Iii	Which of the following tasks is typically associated with computer vision?				
	a) Predicting stock prices				
	b) Translating text from one language to another				
	c) Identifying faces in images				
	d) Classifying emails as spam or not spam				
	Answer:				
	c) Identifying faces in images				
Iv	What does 'overfitting' refer to in the context of machine learning models?				
	a) A model that performs well on both training and testing data				
	b) A model that is too simple to capture the underlying patterns in the data				
	c) A model that performs exceptionally well on training data but poorly on testing data				
	d) A model that has been successfully deployed in a production environment				
	Answer: a) A model that performs exceptionally well on training data but peerly on testing data				
	c) A model that performs exceptionarry wen on training data but poorry on testing data				
V	In the context of computer vision, what does "object detection" involve?				
••	a) Analyzing and converting text data into numerical data				
	b) Identifying and locating objects within an image				
	c) Sorting emails based on their content				
	d) Predicting weather conditions based on historical data				
	Answer:				
	b) Identifying and locating objects within an image				
Vi	It is defined as the fraction of positive cases that are correctly Identified:				
	i.F1 Score ii. Precision iii. Accuracy iv. Recall				
	Answer: Recall				
4	Answer any 5 out of the given 6 question (1X6=6 marks)				

i.	work around a script which is programmed in them.				
	a. Script bots b. Smart bots				
	c. Both of the above d. None of the above				
	Ans: a. Script bots				
Ii	Assertion (A): The confusion matrix provides a summary of prediction results on a				
	classification problem.				
	Reason (R): The confusion matrix includes values for true positives, true negatives, false				
	positives, and false negatives, which help in evaluating the performance of a classification				
	model.				
	a.Both Assertion and Reason are correct, and Reason is the correct explanation for				
	Assertion.				
	b.Both Assertion and Reason are correct, but Reason is not the correct explanation for				
	Assertion.				
	c.Assertion is incorrect, but Reason is correct.				
	u.Assertion is incorrect, but Keason is correct, and Reason is the correct explanation				
	Answer :a. Both Assertion and Reason are correct, and Reason is the correct explanation				
iii	When a machine possesses the ability to mimic human traits, i.e., make decisions, predict				
	the future, learn and improve on its own, it is said to have				
	a. Artificial Intelligence b. Natural Intelligence				
	c. Machine Understanding d. Machine Intelligence				
	Ans. a. Artificial Intelligence				
iv	Which of the following is not an authentic source for data acquisition?				
	a. Sensors b. Surveys c. Web Scraping d. System Hacking				
	Answer: System Hacking				
v.	is defined as the percentage of correct predictions out of all the				
	observations.				
	1.F1 Score 11. Precision 111. Accuracy 1v. Recall				
Vi	Allswel: Accuracy Statement 1: Email filter is an application of Data Science				
V I	Statement 1. Email filter is an application of Data Science.				
	Data science				
	a) Both statements 1 and statement 2 are correct				
	b) Both statements 1 and statement 2 are incorrect.				
	c) Statement 1 is correct but statement 2 is incorrect.				
	d)Statement 1 is incorrect but statement 2 is correct.				
	Answer a) Both statements 1 and statement 2 are correct.				
5	Answer any 5 out of the given6 question (1X6=6 marks)				
i.	The possible difficulties a machine would face in processing natural language is				
	a. Arrangement of the words and meaning				
	b. Multiple Meanings of a word				
	c. Perfect Syntax, no Meaning				
	d. All of the above				
	Ans: d. All of the above				
ii.	Which is an AI based chatbot?				
	a) Script bot b) Smart bot				
	c) Both d)None				
	Answer: b)Smartbot				
111.	Smita makes a machine which is designed to learn by itself using the provided data and make accurate Predictions/ Decisions, Which of the following eaching the machine for				
	make accurate Predictions/ Decisions, Which of the following enables the machines for				
1	making Predictions/ Decisions?				

	a. Artificial Intelligence b. Deep Learning				
	c. Machine Learning d. None of the above				
	Ans. c. Machine Learning				
iv	In this 4W canvas block, which W, focus on the context/situation/location of the				
	problem.				
	Answer:Where				
v	A company is analysing customer reviews to understand the overall sentiment (positive, negative,				
	or neutral) towards their product. They use a tool to process the text data and categorize it into				
	these three sentiment labels. What aspect of data science is the company primarily using in this				
	scenario?				
	a) Data Visualization b) Data Cleaning				
c) Data Analysis d) Data Preprocessing					
	Answer				
	c) Data Analysis				
vi	Which one of the following scenarios would result in a high false positive cost?				
	a. A model that correctly identifies emails as spam when they are actually spam, in a				
	scenario where spam filtering is highly accurate.				
	b. A model that correctly identifies a customer as likely to purchase a product, in a				
	scenario where the product is frequently bought.				
	c. A model that incorrectly identifies a patient as having a disease when they do not				
	actually have it, in a scenario where the disease is rare but treatment is expensive				
	d. A model that fails to detect fraudulent transactions but correctly identifies legitimate				
	transactions, in a scenario with many transactions but few fraud cases.				
	Answer c. A model that incorrectly identifies a patient as having a disease when they do				
	not actually have it, in a scenario where the disease is rare but treatment is expensive				
	SECTION-B

	Customer's requirements and tastes keep on changing, therefore, production should meet the customer's requirements. Thus, innovativeness is important characteristic of an entrepreneur. He always tries to out strive others by taking initiative in doing new things, i.e. exploring new products, new markets, new raw materials, new methods of production			
	etc. 1 mark for explanation			
10	List two ways in which we can use resources sensibly and become responsible for our ov environment			
	Ans: 1. reusing paper, glass, plastic, water, etc. 2. taking cloth bags to market carrying fruits and vegetables. 3. donate things we do not use such as clothes, books, furniture, food, or any other relevant way one mark one suitable way			
	Answer any 4 out of 6 given questions in 20-30 words each.(2X4=8 marks)			
11 "A firefighter has to get to a burning building as quickly as he can. There are thr that he can take. He can take his fire engine over a large hill (5 miles) at 8 miles He can take his fire engine through a windy road (7 miles) at 9 miles per hour. C				
	Which words in the above corpus have the highest values and the ones which have the least frequency what are the called?			
	Answer: Stop words like - a, to, at, the, etc. have highest values in a corpus. 1 mark Words occur the least are called Rare or valuable words. 1 mark			
12	 a) When anyone searches about Surgeon on the internet, the picture of a Male appears. Why it happens. 			
	b) What should be done to avoid it			
	Answer: Ai or gender Bias, 1 mark			
	inclusive content, raising user awareness, and conducting regular audits. These actions			
	help to create a more balanced and representative digital environment. Any two point to			
	avoid give 1 mark			
13	3 Neeta has been working on an AI Project. She has completed the problem scoping, but s has forgotten the next stage. help her by listing all the remaining steps in the sequence as explain the objectives of these steps.			
	The remaining steps of AI project cycle are as given: • data acquisition by collecting data from various reliable and authentic sources. • data Exploration or validation: ensures data quality and accuracy also give it a visual image of different types of representations like			
	graphs, databases, flow charts, maps, etc. •Modelling: transforms raw data into a			
	structured format •Evaluation test the selected models and figure out which is the most			
	develop your algorithm around it after evaluation, the project cycle is now complete and what you get is your AI project., ¹ / ₂ for each step in correct sequence and brief given.			
14	Explain the term aspect ratio. How it is expressed.			
	Answer: An aspect ratio is the width-to-height ratio of an image. I mark			
	image has equal width and height, described as a 1:1 aspect ratio.1 mark for expression			
15	Data Sciences majorly work around analysing the data and when it comes to AI, the			
	analysis helps in making the machine intelligent enough to perform tasks by itself. There			
	exist various applications of Data Science in today's world. Give any 2 examples of data			
	sciences in our day to day life with brief information Answer: Genetics & Genomics, Fraud and Risk Detection, Internet Search, Targeted			
	Answer: Generics & Genomics, Fraud and Kisk Detection, Internet Search, Targeted Advertising or any other relevant example half mark for example and half mark for			
	explanation.			
16	Draw the confusion matrix for the following data			
	• the number of true positive = 50			
	• the number of true negative $=78$			
	• the number of false positive = 43			

	• the number of false negative $= 48$					
	Answer:					
	The Confusion Matrix	Reality: Yes	Reality: No			
	Prediction: Yes	50	43			
	Prediction: No	48	78			
	(¹ / ₂ marks each for mapping th	e values in the correct section,	$\frac{1}{2} * 4 = 2 \text{ marks}$			
	Answer any 3 out of 5 given	questions in 50-80 words eac	ch.(4X3=12 marks)			
17	7 Sumit is amused when his friend explains him how AI technologies can be integrated					
	with non-AI technologies. Help him understand this integration with 2 examples. Answer:					
	AI in Smart Home Systems					
	Non-AI Technology: Home Automation Systems					
	AI in Healthcare with Medical Devices Non-AI Technology: Medical Diagnostic Equipment (e.g., X-ray machines, MRI					
	scanners)					
	• In smart home systems, AI enhances non-AI technologies by making them					
	adaptive and intelligent.					
	• In medical diagnostic equipment, AI improves the analysis of images, aiding					
	doctors in making accu	urate diagnoses.				
	Integrating AI with non-AI technologies leverages the strengths of both to create more					
	advanced and efficient solutions.					
10	1 marks for each integration and 1 mark for each explanation					
18	Identify the type of learning b	ased approach in the figure and	a also explain various learning			
	approaches.					
	Input Raw Data Outputs					
	interpretation Processing					
		Algorithms				
	Answer Unsupervised learning 1 mark explaination of all three supervised unsupervised					
	Answer :Unsupervised learning 1 mark, explaination of all three supervised, unsupervised					
19	Differentiate between rule-bas	sed and learning-based AI mod	lelling approaches			
17	Answer:	sed and rearming based in moe	tening upprovenes.			
	Rule Based Approach: It refer	rs to the AI modelling where th	e relationship or patterns in			
	data are defined by the develo	per. The machine follows the	rules or instructions			
	mentioned by the developer, and perform its task accordingly. Learning Based Approach: In this approach, the machine learns by itself. It refers to the					
	AI modelling where the relationship or patterns in data are not defined by the developer.					
	In this approach, random data is fed to the machine and it is left on the machine to figure out patterns and trends out of it. Generally, this approach is followed when the data is un labelled and too random for a human to make sense out of it.					
•	2 marks each					
20	Consider the following text data and perform a step by step process for text normalization		process for text normalization			
	Provide the normalized versio	n of the text:				
	"The quick, brown fox jumps over the lazy dog. THE QUICK, BROWN FOX JUMPS OVER THE LAZY DOG!!!"					
	Answer: Raw Text: "The quic	k, brown fox jumps over the la	azy dog. THE OUICK			
	BROWN FOX IUMPS OVER THE LAZY DOG!!!"					
	Steps for Normalization:					
	1. Convert to Lowercase:					

ſ		"the quick, brown fox jumps over the lazy dog. the quick, brown fox jumps over the lazy				
		dog!!!"				
		2. Remove Punctuation:				
		"the quick brown fox jumps over the lazy dog the quick brown fox jumps over the lazy				
		dog"				
		3. Remove Extra Spaces:(There are no extra spaces to remove in this case.)				
		Normalized Text:				
		"the quick brown fox jumps over the lazy dog the quick brown fox jumps over the lazy				
		dog"				
	21	An AI model made for the prediction of Water Shortage in Schools in a state				
			(Water Shortage in School)			
		The Confusion Matrix	Reality: 1	Reality: 0		
		Prediction: 1	75	5		
		Prediction: 0	5	15		
		i. Calculate Precision, Rec	call and F1 Score			
		ii.Identify the total number of predictions made by the model correctly.				
		Answer				
		i. Calculation: Precision=T	TP/(TP+FP) = 75 / (75+5) = 75	/80 = 0.9375		
		Recall=TP/	(TP+FN) = 75 / (75+5) = 75	5 /80 = 0.9375		
		F1 Score =	2*Precision*Recall/(Precision	+ Recall)		
		=	2 * ((0.9375 *0.9375) / (0.937	75+0.9375)		
		= 2 * (0.8789 / 1.875) = 2 * 0.46875 = 0.9375				
		Precision=0.9375% Recall=0.9375% F1 Score=0.9				
		ii. the total number of predictions made by the model correctly:(TP+TN)=75+15=90				
		note:(1/2 mark for each formula and 1/2 mark each for substitution of values in part(i))				
		Please note: the mathematical calculations can be ignored and 1 marks for part (ii)
