Education is really aimed at helping students get to the point where they can learn on their own." Says scientist Noam Chomsky.

I am happy to note that, Kendriya Vidyalaya Sangathan is engaged in nurturing the creative and analytical thinking of the children and enabling them to approach their future with confidence and helping them to grow beyond what they believe in they can be.

I am confident that teachers of Kendriya Vidyalaya along with the parents will create a shared vision and pathway to success for the children to achieve.

I appreciate the principal and staff of the school for their good efforts in bringing up the future citizens of this country and I extend my best wishes for the school and the students for a bright future.

“The goal of mankind is knowledge...Now this knowledge is inherent in man. No knowledge comes from outside: it is all inside... What man 'learns' is really what he discovers by taking the cover off his own soul, which is a mine of infinite knowledge.”

- Swami Vivekananda

Every child, without exception, is born with the potential to be a creative thinker. Everyone has the power, courage and talent to shine with creative venture. The education given to a child should not interfere with true learning and creativity. It is extremely important to foster creativity and originality in our school children so that they can become independent, flexible and resourceful adults of tomorrow.

Our vision of education is to focus on development of the whole person, tapping curiosity and imagination and providing opportunities for all talents to be cultivated, nurtured and valued. It aims to prepare the students who own their learning, who can remember what they learned, and who can apply it wherever and whenever needed.

The determination and commitment of students will automatically improve their competence and performance. To emerge as a successful student one should be always open minded, ready to do a bit of sacrifice, think about making a better society, strive for excellence, tolerate the failures and do anything and everything that can make him/her progress further.

The Vidyalaya Patrika helps the children dream and imagine beyond the known boundaries and come out with wonderful creations in the form of art, poem, story, thought and even fun through jokes. I am very positive that the children of the Vidyalaya use this magazine as a window to portray their best talents and derive joy of sharing their creations with others.

I extend my cordial felicitations to the Principal, teachers and the students who brought out such a splendid magazine.
