Our Living Classroom – An Innovative Learning Initiative

Our Living Classroom is an interactive initiative that promotes student voice, creativity and curiosity. Through 'Hear Us', students share concept-explanation videos; 'Our Creativity' showcases student work through a QR-linked digital gallery; and 'Our Curiosity' encourages questioning and exploration through the Question of the Week. The initiative blends classroom learning with responsible use of technology and encourages students to explain, create, question and learn together.

The initiative was conceptualised and initially implemented in Class VII-A under the guidance of Ms. Pronoti Nanda, TGT (Social Science), and is being extended across classes.
