

In alignment with the transformative National Education Policy (NEP) of India, PM SHRI Kendriya Vidyalaya Keshavpuram has embraced innovative pedagogical approaches to enhance the learning experience for students. One noteworthy initiative is the implementation of Toy-Based Pedagogy and Experiential Learning.

**What is Experiential Learning:** - Experiential Learning is the process of learning by doing. By engaging students in hands-on experiences and reflection, they are better able to connect theories and knowledge learned in the classroom to real-world situations.

**Benefits of Experiential Learning:** - When students participate in experiential education opportunities, they gain:

- A better understanding of course material
- A broader view of the world and an appreciation of community
- Insight into their own skills, interests, passions, and values
- Opportunities to collaborate with diverse organizations and people
- Positive professional practices and skill sets

**What is Toy Based Pedagogy:** - A playful and interactive method designed to foster holistic development among students.

#### **Understanding Toy-Based Pedagogy:**

Toy-Based Pedagogy is a teaching methodology that incorporates educational toys and games into the learning process. It focuses on leveraging play as a tool for cognitive, social, emotional, and physical development in children. This approach not only makes learning enjoyable but also ensures active engagement, creativity, and critical thinking skills.

#### **NEP Integration:**

The National Education Policy 2020 emphasizes a learner-centric and multidisciplinary approach to education. The introduction of Toy-Based Pedagogy aligns seamlessly with these objectives, providing a platform for students to explore and understand concepts through hands-on experiences.

#### **Benefits of Toy-Based Pedagogy:**

- 1. Enhanced Engagement:** The use of toys captures the attention of students, making the learning process more enjoyable and engaging.
- 2. Concept Retention:** Research indicates that hands-on learning enhances concept retention. Through play, students are more likely to remember and understand complex concepts.
- 3. Social and Emotional Development:** Educational toys promote social interactions and emotional intelligence, helping students develop essential life skills.
- 4. Innovation and Creativity:** Toy-Based Pedagogy stimulates creative thinking, encouraging students to approach problems with innovative solutions.
