

BIOLOGY LABORATORY

The biology lab is a modern, well-equipped space designed to support hands-on learning and scientific discovery. It features multiple workstations, each with microscopes, safety equipment, and essential tools for conducting experiments. The lab includes high-quality microscopes and various modern equipment. Safety is a top priority, with proper ventilation, eyewash stations, and personal protective gear readily available whenever required. This dynamic environment encourages students to engage deeply with biological concepts and techniques, fostering a robust understanding of the subject.
