

STANDARD OPERATING PROCEDURES (SOP) / NATIONAL DISASTER MANAGEMENT AUTHORITY (NDMA)

School safety has been defined as the creation of safe environments for children starting from their homes to their schools and back. This includes safety from natural hazards of geological/ climate origin, human made risks, transportation and other related emergencies.

Preparation at School level:

- School has a dedicated team for transport safety and rescue team.
- School has sensitized the school management committee.

School Disaster Management Plan:

- A centralized PA system.
- Identification of Evacuation routes
- Access by emergency vehicles.
- Care of children with special needs.
- Emergency equipments and their maintenance.
- Sitemap indicating evacuation routes and assembly areas.

Preventive Measures taken by Vidyalaya:

- Fenced boundary wall around the building.
- Emergency Numbers displayed.
- CCTV cameras
- Centralised PA system
- Mock drills for students.
