

PM SHRI KV SECTOR-5 DWARKA

EXHIBITION – NCSC/SCIENCE

Our school organized a science exhibition in the school laboratory. The exhibition was inaugurated by the Vice Principal in the presence of teachers, students, and parents.

Students from different classes displayed various working models and projects based on science and technology. The main exhibits included water conservation, solar energy, rainwater harvesting, pollution control, robotics, and renewable energy. Some students also demonstrated experiments related to electricity, magnetism, and chemical reactions.

The exhibition provided students with an opportunity to develop their creativity, scientific thinking, and presentation skills. Visitors appreciated the innovative models and asked questions about their working principles. The teachers guided the students and explained the importance of science in everyday life.

The exhibition concluded with a prize-distribution ceremony. The best projects were awarded prizes and certificates. The event was highly informative and successful, and it encouraged students to take greater interest in science.
