REPORT OF UTILISATION OF SCIENCE KITS FOR UPPER PRIMARY CLASSES VI TO VIII

4 Science kits for upper primary classes were purchased under PM SHRI scheme in the month of April 2024. All the science teachers were given a demonstration of these scientific kits. These kits are quite useful for the secondary section students. These kits are being used by the teachers as per the need of the lessons to achieve the TLO.

These Science kits contain many scientific apparatuses useful for teaching the students of classes VI to VIII. Activity based teaching and learning by doing makes science teaching and learning a joyful experience for both teacher and the students.

A proper record of utilisation of science kits is being maintained by all the science teachers of the secondary section.
