

PM SHRI KENDRIYA VIDYALAYA KANKINARA, (Building & BaLA initiatives)

At our Vidyalaya, we've embarked on transformative initiatives focusing on both infrastructure and holistic education through Building and BaLA programs.

The Building initiative aims to enhance our physical infrastructure, ensuring conducive learning environments for students and teachers alike.

BaLA, or Building as Learning Aid, integrates educational content into the physical structures of our school, turning every corner into a potential learning opportunity.

These initiatives have led to significant improvements in student engagement, creativity, and academic performance.

Students now actively participate in designing and maintaining their learning spaces, fostering a sense of ownership and pride.

BaLA activities have made learning more interactive and experiential, catering to diverse learning styles and abilities.

Our Vidyalaya has become a model for innovative educational practices, attracting attention and accolades from educational institutions nationwide.

Through these initiatives, we're not just building structures; we're building a brighter future for our students, nurturing their intellect, creativity, and character.

The success of these programs underscores our commitment to holistic education, where every aspect of a child's development is nurtured and celebrated.

As we continue to expand and refine these initiatives, we're confident that they will serve as pillars of excellence in education for years to come.
