

**PM SHRI KENDRIYA VIDYALAYA KANKINARA,
(SKILL EDUCATION)**

Our Vidyalaya prioritizes skill education, aiming to equip students with practical abilities that enhance their employability and personal development. By integrating vocational training into the curriculum, we ensure that learners gain hands-on experience in various trades and technologies. This approach fosters critical thinking, problem-solving, and creativity. Partnerships with industry leaders provide students with real-world insights and internships, bridging the gap between education and employment. Regular workshops and guest lectures from professionals further enrich the learning experience. Our Vidyalaya's focus on skill education not only prepares students for the job market but also encourages entrepreneurial ventures. This holistic education model ensures that our graduates are well-rounded, skilled, and ready to contribute meaningfully to society.
