REPORT ON BAGLESS DAYS ACTIVITIES

Bagless Day activities were organised at PM SHRI Kendriya Vidyalaya, Sector-3, Rohini, for students of Classes VI and VIII to promote experiential learning, creativity, and the development of practical skills. A variety of hands-on activities, including tie and dye, soap and candle making, embroidery painting, clay modelling, and 3D sculpting, were conducted to provide students with opportunities to explore their artistic talents and learn through practical experiences.

During the tie and dye activity, students experimented with colours and fabric-folding techniques to create attractive patterns and designs. The soap and candle-making activity introduced them to the basic processes involved in making everyday products and encouraged creativity, patience, and precision.

The embroidery painting activity helped students develop fine motor skills, concentration, and an appreciation for decorative art. Through clay modelling, students created different shapes and objects, enhancing their imagination and hand-eye coordination. The 3D sculpting activity provided an opportunity to explore three-dimensional forms, textures, and structures, fostering spatial awareness and innovative thinking.

All the activities encouraged active participation, teamwork, and learning by doing. Students enthusiastically participated in the sessions and displayed their creativity through their individual creations. These activities also helped them appreciate traditional art forms, develop vocational skills, and understand the practical applications of their learning.

The Bagless Day programme was a meaningful and enriching experience for students of Classes VI and VII. It successfully complemented classroom learning with practical exposure and contributed to the holistic development of students by nurturing creativity, confidence, self-expression, and respect for different art forms and crafts.
