

KENDRIYA VIDYALAYA LUMDING

SKILL EDUCATION

India will have the largest working-age population in the world by 2030, but gainful employment remains a major challenge for students of the general stream. A new approach with curricular support is needed to improve employability of students. NEP-2020 has advocated integrating vocational education/skill education programmes into mainstream education in a phased manner across all educational institutions.

CBSE is committed to the development of skills in school students and aims to develop good human beings capable of rational thought and action, with compassion, empathy, courage, resilience, scientific temper and creative imagination, with solid morals and values. It aims to create engaged, productive and contributing citizens to build an equitable, inclusive and plural society as envisaged by our Constitution.

Kendriya Vidyalaya Lumding has started skill education in compliance with the provisions of NEP-2020 and Kendriya Vidyalaya Sangathan.

1. The school has introduced the subject Artificial Intelligence as a skill module for students from class VI to X.
2. From time to time, an attempt is made to give practical knowledge of skill education to the students by inviting a guest skilled in some specific skill.
3. Students get hands-on experience to develop projects in Atal Tinkering Lab to brush up their skills.
