

CAP FOR BLIND PEOPLE

PROBLEM: IT IS VERY DIFFICULT FOR BLIND PEOPLE TO NAVIGATE NEW PLACES ALSO THEY DON'T HAVE ANY CONFIDENCE TO CROSS THE ROAD FEAR FREELY?

SOLUTION: "CAP FOR BLIND PEOPLE"

MATERIAL REQUIRED: MOTHER BOARD, FIRE SENSOR, ULTRASONIC SENSOR, CAP, SOME WIRES, BATTERY, BUZZERS ETC.

BENEFITS:

This cap has ultrasonic sensors that's why it will definitely sense the people, cars or any vehicle around the Blind Person.

It will also detect the fire in the range 1 or 2 meter (as we can change) and create a pip-pip sound in both condition.

CONCLUSION:

If we use this cap, it will definitely build-up the confidence of Blind Person and create an easy path to navigate different places.
