

INNOVATION PROJECT - KV KASHIPUR

Project Title: Jadui Pitara (Magic Box)

Objective:

To create an interactive, fun learning tool for young students that blends education with creativity.

Materials Required:

- A medium-sized cardboard box
- Craft paper, markers, colors for decoration
- Slips of paper with questions, riddles, or challenges related to subjects like Math, Science, or General Knowledge
- A small bell or buzzer
- A timer

How it Works:

1. Decorate the box and name it Jadui Pitara.
2. Fill the box with slips of paper, each containing a question or challenge.
3. Students take turns picking a slip from the box and answering the question within the given time.
4. If the student answers correctly, they ring the bell. If not, another student gets a chance.

Learning Outcome:

- Encourages active participation.
- Builds problem-solving skills and quick thinking.
- Promotes teamwork and collaborative learning.
