SKILL EDUCATION

There are various activities that are organized in our vidyalaya that enrich and give students a wide range of exposure to compete in the modern world. Some of the following activities are listed below:

1. Students are involved in various **art activities** like making posters, sketch, graffiti work, origami etc. which is helpful for them to develop their habit to imagine the world in a different colourful manner.
2. They also involved in some **science projects** to develop their experimental experience with the science in real world.
3. They are made to develop their analytical knowledge, by involving and hands on practice on the projects related to **work education** which help them to deal with the petty problems they face in the real world.
4. The overall development of the students by giving them **skill based education** is to make them self dependent and be practical in real world.
5. Along with these students are involved in various **sports** for their physical growth.
