ECO CLUB (2023-24)

Eco clubs in our Vidyalaya will empower students to participate and take up meaningful environmental activities and projects. It is a forum through which students can reach out to influence, engage their parents and neighbourhood communities to promote sound environmental behavior. It will empower students to explore environmental concepts and actions beyond the confines of a syllabus or curriculum. While everyone, everywhere, asserts the importance of 'learning to live sustainably,' environment remains a peripheral issue in the formal schooling system.

Objectives of Eco-clubs in our Vidyalaya:

- Motivate the students to keep their surroundings green and clean by undertaking plantation of trees.
- Promote ethos of conservation of water by optimizing the use of water.
- Motivate students to imbibe habits and life style for minimum waste generation, source separation of waste and disposing the waste to the nearest storage point.
- To develop skills of observation, experimentation, survey, recording, analysis, reasoning needed for conserving environment through activities
- Organise rallies, marches, human chains and street theatre at public places with a view to spread environmental awareness.
- Action based activities like tree plantation, cleanliness drives both within and out side the school campus.
- Grow kitchen gardens, maintain vermin-composting pits, construct water harvesting structures in school, practice paper recycling etc.
- Prepare inventories of polluting sources and forward it to enforcement agencies.
- Maintenance of public places like parks, gardens both within and out side the school campus.
- Mobilise action against environmentally unsound practices like garbage disposal in unauthorised places, unsafe disposal of hospital wastes etc.
- Beautify selected road side area with plants and flowers and put campaign boards to generate awareness.
- Any other innovative programme on environmental issues.
 - Throw them in public places as they choke drains and sewers, cause water logging and provide breeding ground for mosquitoes.

- Organize tree plantation programmes, awareness programmes such as quiz, essay, painting competitions, rallies, nukkadnatak etc. regarding various environmental issues and educate children about re-use of waste material & preparation of products out of waste
- Campaign against use of loud speakers, motivate students not to use crackers and fire works, recycling of glass and metals, use of unnecessary horns.
- Field visit to environmentally important sites including polluted and degraded sites, wildlife parks, etc.
- Organise rallies, marches, human chains and street theatre at public places with a view to spread environmental awareness.
- Action based activities like tree plantation, cleanliness drives both within and out side the school campus.
- Grow kitchen gardens, maintain vermin-composting pits, construct water harvesting structures in school, practice paper recycling etc.
- Prepare inventories of polluting sources and forward it to enforcement agencies.
- Maintenance of public places like parks, gardens both within and out side the school campus.
- Mobilise action against environmentally unsound practices like garbage disposal in unauthorised places, unsafe disposal of hospital wastes etc.
- Beautify selected road side area with plants and flowers and put campaign boards to generate awareness.
- Any other innovative programme on environmental issues.
- On one side, the Youth club will provide a platform for individual student to translate knowledge, attitude and values into action/ behaviors and develop healthy life styles and emerge as confident and responsible citizens. The Eco Clubs in schools will play an important role in creating environmental awareness amongst the future generation. Together these two activities will fulfill students desire to have joyful learning and be productive while meeting with friends and to make a positive impact on their local environment and the country.

SLOGANS BY STUDENTS

OUR ECO CODE

Please be seen to be green. Keep our environment clean.
 Look after your health to look after your self.
 Always turn off the light; you don't need it so bright.
 Instead of throwing away, use it another way.
 Stop the plastic, it's not fantastic.
 Turn off the tap, we'll give you a clap.
 Open the bin put your rubbish in.
 Walk to school, catch a bus or join a car pool.

Eco Club

The Earth needs you
 To change your ways.
 Month by Month
 And day by day.

The changes are easy.
 Just look and you'll see
 The differences that can be made
 By you and by me.

single-use plastic
 last almost forever.
 It might be cheap
 But it's not very clever.

It can end up in oceans, rivers and seas
 The wind sometimes carries it
 And it tangles in trees.

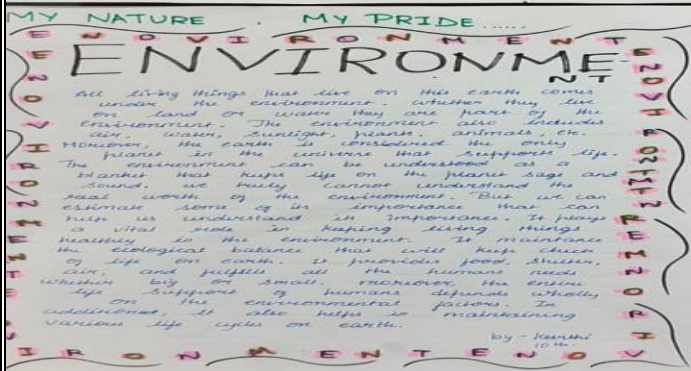

If people used less,
 The better place the world would
 be. The future's in our hands;
 Cut-down and you'll see.
