LEARNING CORNERS IN THE CLASS ROOM

Myself Manisha Bhesaniya, I am a PRT at P M Shri Kendriya Vidyalaya Sabarmati. This year I am teaching Math and EVS in class 5. To enhance the knowledge of the children I have made two corners in my classroom one is for EVS another is for Math.

EVS CORNER

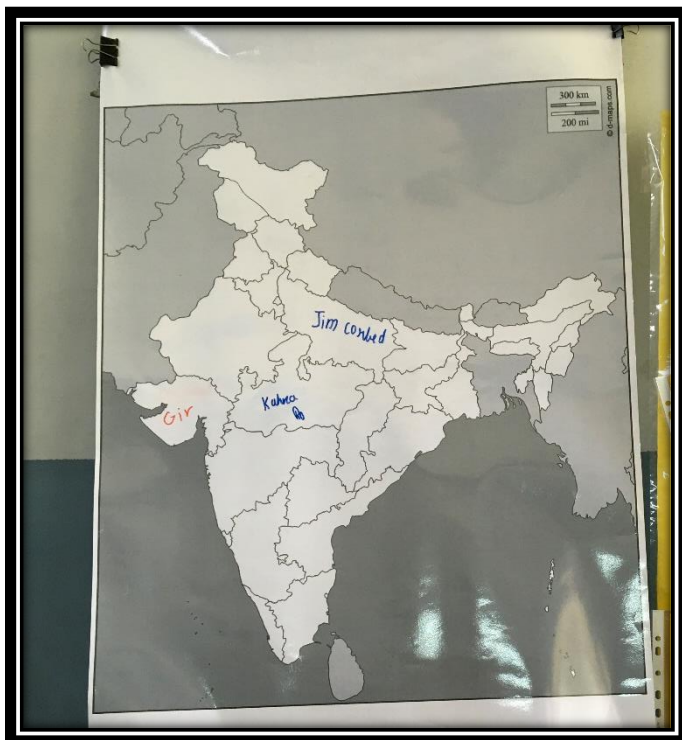

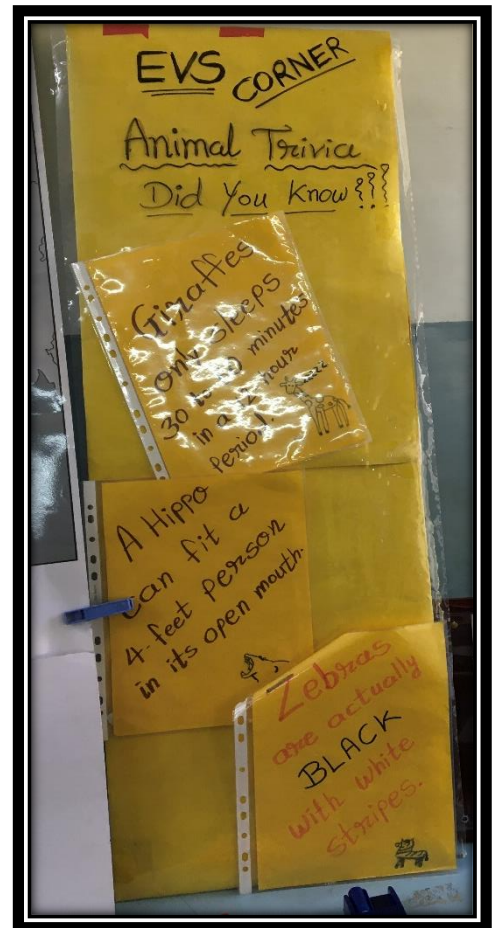

In EVS corner I have made some interesting things like crossword related to EVS chapters, flash cards holder and some trivia display. Here I kept crossword puzzle board which I made related to the chapter.

Then I have made the trivia which is according to the theme of the chapter which is running in that particular month, for example in the month of April and May we will be teaching Chapter 1 Super Senses and Chapter 2 A Snake Charmer's Story.

Both chapters are having the theme of animals so for this month I have searched some trivia (fun facts) about animals and wrote down on the charts so the children can come anytime in the corner and they can read it, by this they can urge extra knowledge about the theme.

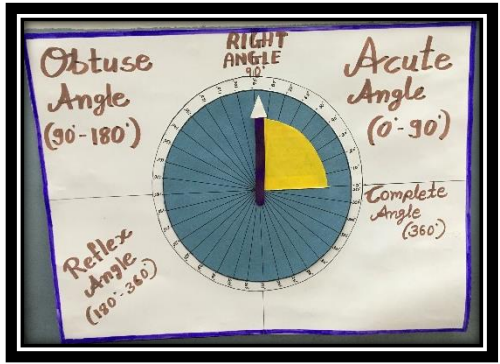

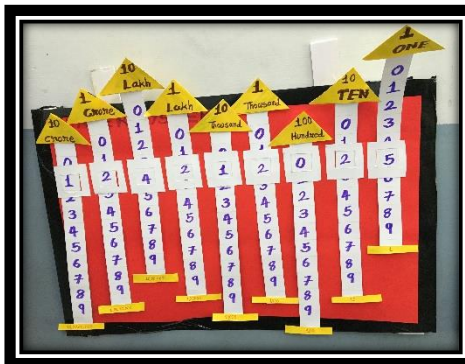

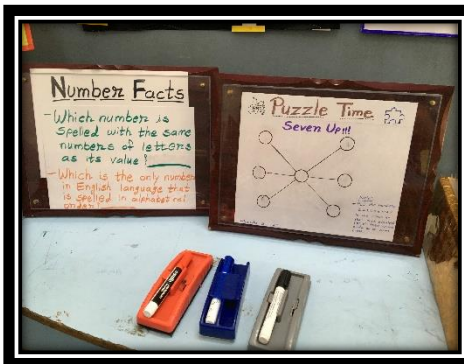

The next is the map as we all know Map Reading is very important in the subject EVS and in future in the subject Social Science so here I kept blank map which has reusable surface so the students whenever they are free they can come and practice map here. With the use of erasable markers, they can practice map as many times they like.

MATH CORNER

In the Math corner here, I kept the teaching learning materials made by me so that the students can access all the things by themselves here for Math. I have made this small effort to improve their interest in Math. According to the chapter I write some number facts and some puzzles so that they can try to solve it by themselves and at the end of the month I will give answer to them with full explanation. In this corner I put working models of place value chart, number system chart and chart for learning angles.
