

Swachta Pakhwada Campaign

September 1 to September 15 (2026)

During the Swachhta Pakhwada campaign, students actively participated in a series of cleanliness drives across the school campus. They undertook sweeping, dusting, and proper disposal of waste materials, ensuring that classrooms, corridors, and playgrounds were kept neat and hygienic. The initiative helped instill a sense of responsibility and discipline among the students toward maintaining a clean environment.

In addition to physical cleaning activities, awareness programs were organized to highlight the importance of hygiene and sanitation. Students prepared posters, slogans, and conducted short skits in the morning assembly to spread the message of cleanliness. Teachers guided discussions on waste segregation, water conservation, and the harmful effects of plastic use, encouraging eco-friendly practices in daily life.

The campaign also included community outreach activities where students interacted with support staff and nearby residents to promote cleanliness habits. Tree plantation drives and distribution of pamphlets further strengthened the message of sustainable living. The collective efforts during the fortnight not only beautified the surroundings but also reinforced the values of civic responsibility and environmental stewardship among the young learners.
