	Read the given passage carefully and answer the question no. 15, 16 and 17. **दिए गए गद्यांश को ध्यानपूर्वक पढ़कर प्रश्न संख्या 15, 16 और 17 के उत्तर दीजिए।** People prefer living on flat plains and gentle slopes. This is because such areas are favorable for the production of crops and to build roads and industries. The mountainous and hilly areas hinder the development of transport network and hence initially do not favor agricultural and industrial development. So, these areas tend to be less populated. The Ganga plains are among the most densely populated areas of the world while the mountains zones in the Himalayas are scarcely populated. An extreme climate such as very hot or cold deserts are uncomfortable for human habitation. Areas with a comfortable	

	climate, where there is not much seasonal variation attract more people. Areas with very heavy rainfall or extreme and harsh climates have low population. Mediterranean regions were inhabited from early periods in history due to their pleasant climate. Cities offer better employment opportunities, educational and medical facilities, better means of transport and communication. Good civic amenities and the attraction of city life draw people to the cities. It leads to rural to urban migration and cities grow in size. Mega cities of the world continue to attract large number of migrants every year. लोग समतल मैदानों और हल्की ढलानों पर रहना पसंद करते हैं। ऐसा इसलिए है क्योंकि ऐसे क्षेत्र फसलों के उत्पादन, सड़कों और उद्योगों के निर्माण के लिए अनुकूल होते हैं। पर्वतीय और पहाड़ी क्षेत्र परिवहन नेटवर्क के विकास में बाधा डालते हैं और इसलिए शुरुआत में कृषि और औद्योगिक विकास के अनुकूल नहीं होते। इसलिए, इन क्षेत्रों में आबादी कम होती है। गंगा के मैदान दुनिया के सबसे घनी आबादी वाले क्षेत्रों में से हैं, जबकि हिमालय के पर्वतीय क्षेत्र विरल हैं। अत्यधिक गर्म या ठंडे रेगिस्तान जैसी चरम जलवायु मानव निवास के लिए असुविधाजनक होती है। आरामदायक जलवायु वाले क्षेत्र, जहाँ मौसमी परिवर्तन बहुत अधिक नहीं होते, अधिक लोगों को आकर्षित करते हैं। बहुत भारी वर्षा या अत्यधिक और कठोर जलवायु वाले क्षेत्रों में जनसंख्या कम होती है। भूमध्यसागरीय क्षेत्र अपनी सुखद जलवायु के कारण इतिहास के प्रारंभिक काल से ही बसे हुए थे। शहर बेहतर रोजगार के अवसर, शैक्षिक और चिकित्सा सुविधाएँ, परिवहन और संचार के बेहतर साधन प्रदान करते हैं। अच्छी नागरिक सुविधाएँ और शहरी जीवन का आकर्षण लोगों को शहरों की ओर आकर्षित करता है। इससे गाँवों से शहरों की ओर प्रवास होता है और शहरों का आकार बढ़ता है। दुनिया के बड़े शहर हर साल बड़ी संख्या में प्रवासियों को आकर्षित करते रहते हैं।

32	**CASE STUDY** Since ages, farmers in India have taken recourse to debt. In the earlier times the same was from informal sources. Since independence with the efforts of the government, formal sector has actively come into picture. Farmers borrow not only to meet their investment needs but also to satisfy their personal needs. Uncertainty of income caused by factors likes crop failure caused by irregular rainfall, Reduction in ground water label, locust/other pest attack etc. These reasons push them into the clutches of the private money Lenders, who charge exorbitant rates of interest which add to their miseries. Various governments in India, at different times for different reasons, introduced debt relief/waiver schemes. These schemes are Used by governments as a quick means to extricate farmers from their indebtedness, helping to restore their capacity to invest and produce, in short to lessen the miseries of the farmers across India. The costs and benefits of such debt relief schemes are, however, a widely debated topic among economists. Some economists argue that such schemes are extremely beneficial to the marginalized farmers while others argue that these schemes add to the fiscal burden of the government, others believe that these schemes nay develop the expectation of repeated bailouts among farmers which may spoil the credit culture among farmers. **Question:** i) Uncertainty of income for farmers in India is majorly caused by_____ **(irregular rainfall/unavailability of loans)** ii) Some economists argue that debt waiver schemes are extremely beneficial to the poor and marginalized farmers, as these Schemes reduce the burden of_____ **(indebtedness/personal expenditures)** iii)The rural banking structure in India consists of a set of multi-agency institutions. _____ **(Regional Rural Banks /Small Industries Development Bank of India)** is expected to dispense credit at cheaper rates for agricultural purposes to farmers. iv) _____ **(Regional Rural Banks/ Land Development Banks)** is the most prominent body responsible for providing loans for long term land	4

Q.29	Chemical kinetics is the study of chemical reactions with respect to reaction rates, effect of various variables, rearrangement of atoms and formation of intermediates. A number of factors such as temperature, concentration of reactants, catalyst, affect the rate of a reaction. It has to be determined experimentally and cannot be predicted. Order of a reaction with respect to a reactant is the power of its concentration which appears in the rate law equation. The order of a reaction is the sum of all such powers of concentration of terms for different reactants. Rate constant and order of a reaction can be determined from rate law or its integrated rate equation. Molecularity is defined only for an elementary reaction. Temperature dependence of rate constants is described by Arrhenius equation. A. Mention the factors that affect the rate of a chemical reaction. B. 	SECTION A **READING SKILLS (22 marks)**	
1.	As the digital revolution reshapes India's classrooms, a pressing question arises: Is online education truly empowering students, or silently exhausting them? Once a topic of parenting blogs, the debate on screen time is now a mainstream concern. The pandemic pushed millions into virtual learning, ensuring continuity but also triggering a new issue: digital fatigue. When schools shut in 2020, technology was hailed as a saviour. Virtual lessons initially seemed revolutionary, but cracks soon appeared. Complaints of eye strain, declining attention, and emotional burnout became common among both students and teachers. According to psychologist Dr Radhika Mehta, "It's not just the number of hours online, but the quality of screen time that matters." Interactive sessions may energise learners, while passive video watching drains them. Digital fatigue, caused by prolonged screen exposure, shows up as headaches, blurred vision, sleep problems, anxiety, and poor focus. A 2024 survey found that nearly 68% of students between 10 and 18 experienced such symptoms after five or more hours of daily online learning. Teachers, too, report exhaustion. "Even though I love teaching," said Smita Rao, a Bengaluru math teacher, "staring at tiles on a screen for hours is draining." Yet, online education cannot be judged only by its drawbacks. For many, especially in rural areas, it has opened doors to access, flexibility, and personalised learning. Students can progress at their own pace and build crucial skills like time management and digital literacy. Experts agree that the solution lies not in reducing screen time but in improving how it is used. Approaches such as experiential learning, blended learning, mindful technology habits, and gamification can make virtual lessons healthier and more engaging. For instance, activity-based projects or screen-free tasks like journaling can extend learning beyond devices. Parents and schools share responsibility in this balance. One parent, Anita Verma from Lucknow, noted that when her family introduced breaks, outdoor play, and screen-free evenings, her son became calmer and more focused. Schools, meanwhile, must design tech-integrated curricula that prioritise creativity and well-being. As India embraces a hybrid future, the key question is no longer "How much screen time is too much?" but "How meaningful is the screen time students are getting?" The challenge ahead is to humanise technology, transforming screens from barriers into windows of curiosity, creativity, and connection.	
	Answer the following questions, based on the passage above.	
1	Which textual evidence shows that online learning led to health-related problems among students?	1

2	Complete the following with a suitable reason. The writer refers to technology as a "saviour" in 2020 in order to convey that _____.	1
3	The phrase *"interactive sessions may energise learners, while passive video watching drains them"* implies that A. all screen time has the same effect B. active engagement creates better learning outcomes C. online learning is always tiring D. video watching improves attention span	1
4	What type of statement is made in the words *"staring at tiles on a screen for hours is draining"*? A. fact B. opinion C. Prediction D. Caution	1
5	Based on her observation, how did Anita Verma's son benefit when breaks and outdoor play were introduced? (Any one benefit)	1
6	Which one of the following statements best explains the phrase *"hybrid future"* as used in the passage? A) A world completely dependent on digital learning B) A future combining online and offline learning C) A time when schools shut permanently D) A situation where learning depends only on parents	1
7	How can schools balance use of technology to prevent exhaustion among students?	2
8	What do the survey findings of 2024 reveal about the intensity of digital fatigue among students? (Answer in about 40 words)	2

10	Complete the following with the most suitable option. The main idea of the text is _____. A. the health hazards of screen time in students and teachers B. the role of online education in balancing benefits and drawbacks C. the complaints of teachers and parents about digital tools D. the need to reduce all online classes in schools	1
2.	India's installed renewable energy (RE) capacity has touched 250 gigawatts (GW), which is half of its targeted 500 GW capacity by 2030. This achievement marks a historic milestone in non-fossil installed capacity and reflects over a decade of consistent growth under the Prime Minister. According to the Union Minister for New and Renewable Energy, the achievement across solar, wind, hydro, bio-energy and nuclear power strengthens the country's path towards 500 GW and positions India as a global leader in clean energy. Of the total 250 GW, India has added 123.13 GW of solar power, 52.68 GW of wind, 55.22 GW of hydro, 11.6 GW of bio-energy, and 8.78 GW of nuclear power. Experts, however, stress that achieving the 2030 target will require not just capacity expansion but also improved energy storage, grid integration, and solutions for the intermittency of renewable energy. A consulting report has estimated that India will require investments of $200–250 billion by 2030 to bridge the gap between its present capacity and the target of 500 GW. Additionally, scaling up storage infrastructure by eight times will demand $250–300 billion by FY30. The report also highlights major opportunities in green fuels such as bioethanol, Sustainable Aviation Fuels (SAF), methanol, Compressed Biogas (CBG) and green hydrogen. Government initiatives like blending mandates and obligations are expected to attract $90–100 billion investment in green hydrogen alone. Another policy step supporting this transition is the reduction of GST on renewable energy devices from	

12% to 5%. This is expected to cut project costs, accelerate capacity addition, and eventually lower tariffs for consumers by reducing financing costs.

India's peak power demand touched 250 GW in 2024 and is projected to reach 334 GW by 2029–30, especially during summer months. To meet future demand, the Central Electricity Authority estimates the country will require 777 GW of installed power capacity by 2030, of which 62–64% will come from renewable sources and around 36–38% from thermal energy. Experts believe that India's energy transition must be viewed not only in terms of total power generation mix but also in the incremental addition of renewable sources to meet growing economic needs.

1	According to the passage and the chart, which renewable energy source contributes the most to India's installed capacity?	1
2	Complete the following: Achieving India's 2030 renewable energy target will require not only capacity expansion but also _____.	1
3	Based on the chart, which renewable energy source contributes the least? A. Solar B. Wind C. Bio-energy D. Nuclear	1
4	Find the word from the passage which means "the variability or irregularity in energy production".	1
5	Which of the following best reflects the main idea of the passage? A. India's peak power demand and projections B. India's renewable energy growth, targets, and related policies C. Investments required for energy storage infrastructure D. Opportunities in green fuels only	1
6	The chart highlights the distribution of installed renewable energy capacity. How can policymakers use this information to plan future investments? (Answer in about 20 words)	1
7	How will the reduction of GST on renewable energy devices from 12% to 5% impact projects and consumers? (Answer in about 40 words)	2
8	According to experts, why is incremental addition of renewable sources important? (Answer in about 40 words)	2

	जहाँ भी दो नदियाँ आकर मिल जाती हैं, उस स्थान को अपने देश में तीर्थ कहने का रिवाज है और यह केवल रिवाज की बात नहीं है; हम सचमुच मानते हैं कि अलग-अलग नदियों में स्नान करने से जितना पुण्य होता है, उससे कहीं अधिक पुण्य संगम स्नान में है, किंतु भारत आज जिस दौर से गुजर रहा है उसमें असली संगम वे स्थान, वे सभाएँ तथा वे मंच हैं, जिन पर एक से अधिक भाषाएँ एकत्र होती हैं। नदियों की विशेषता यह है कि वे अपनी धाराओं में अनेक जनपदों का सौरभ अनेक जनपदों के आँसू और उल्लास लिए चलती हैं और उनका पारस्परिक मिलन वास्तव में नाना जनपदों के मिलन का ही प्रतीक है। यही हाल भाषाओं का भी है। उनके भीतर भी नाना जनपदों में बसने वाली जनता के आँसू और उमंग, भाव और विचार, आशाएँ और शंकाएँ समाहित होती हैं। अतः जहाँ भाषाओं का मिलन होता है वहाँ वास्तव में, विभिन्न जनपदों के हृदय ही मिलते हैं, उनके भावों और विचारों का ही मिलन होता है तथा भिन्नताओं में छिपी हुई एकता वहाँ कुछ अधिक प्रत्यक्ष हो उठती है। इस दृष्टि से भाषाओं के संगम आज सबसे बडे तीर्थ हैं और इन तीर्थों में जो भी भारतवासी श्रद्धा से स्नान करता है, वह भारतीय एकता का सबसे बड़ा सिपाही और संत है। हमारी भाषाएँ जितनी ही तेजी से जगेंगी, हमारे विभिन्न प्रदेशों का पारस्परिक ज्ञान उतना ही बढ़ता जाएगा। भारतीय लेखकों की बहुत दिनों से यह आकांक्षा रही थी कि वे केवल अपनी ही भाषा में प्रसिद्ध होकर न रह जाएँ, बल्कि भारत की अन्य भाषाओं में भी उनके नाम पहुँचें और उनकी कृतियों की चर्चा हो। भाषाओं के जागरण के आरंभ होते ही एक प्रकार का अखिल भारतीय मंच आप से आप प्रकट होने लगा है। आज प्रत्येक भाषा के भीतर यह जानने की इच्छा उत्पन्न हो गई है कि भारत की अन्य भाषाओं में क्या हो रहा है, उनमें कौन-कौन से ऐसे लेखक हैं जिनकी कृतियाँ उल्लेखनीय हैं तथा कौन-सी विचारधारा वहाँ प्रभुसत्ता प्राप्त कर रही है।	
।	अलग-अलग प्रदेशों में आपसी ज्ञान किस प्रकार बढ़ सकता है ? (क) जब भारतीय भाषाएँ जागेंगी। (ख) जब भारत की भाषा एक होगी ।	1

	यह विडंबना की ही बात है कि इस युग में भी 'जातिवाद' के पोषकों की कमी नहीं है। इसके पोषक कई आधारों पर इसका समर्थन करते हैं | समर्थन का एक आधार यह कहा जाता है कि आधुनिक सभ्य समाज 'कार्य-कुशलता' के लिए श्रम विभाजन को आवश्यक मानता है और चूँकि जाति प्रथा भी श्रम विभाजन का ही दूसरा रूप है इसलिए इसमें कोई बुराई नहीं है । इस तर्क के संबंध में पहली बात तो यही आपत्तिजनक है कि जाति प्रथा श्रम विभाजन के साथ-साथ श्रमिक-विभाजन का भी रूप लिए हुए है। श्रम विभाजन, निश्चय ही सभ्य समाज की आवश्यकता है, परंतु किसी भी सभ्य समाज में श्रम विभाजन व्यवस्था श्रमिकों का विभिन्न वर्गों में अस्वाभाविक विभाजन नहीं करती। भारत की जाति प्रथा की एक और विशेषता है कि यह श्रमिकों का अस्वाभाविक विभाजन ही नहीं करती, बल्कि विभाजित विभिन्न वर्गों को एक-दूसरे की अपेक्षा ऊँच-नीच भी करार देती है. जो कि विश्व के किसी भी समाज में नहीं पाया जाता।

असाधारण समय में साधारण जीवन

विद्रोह के महीनों में शहरों में क्या हुआ? उन उथल-पुथल भरे महीनों में लोगों ने कैसे जीवन जिया? सामान्य जीवन पर इसका क्या असर पड़ा? विभिन्न शहरों से प्राप्त रिपोर्टें हमें दिनचर्या के अस्त-व्यस्त होने के बारे में बताती हैं। दिल्ली उर्दू अख़बार, 14 जून 1857 की ये रिपोर्टें पढ़ें:
सब्ज़ियों और साग (पालक) के लिए भी यही बात सच है। लोगों की शिकायत है कि बाज़ारों में कद्दू और बैंगन तक नहीं मिलते। आलू और अरवी (रतालू) अगर मिलते भी हैं तो बासी और सड़े हुए, दूरदर्शी कुंजड़ों (सब्ज़ी उगाने वालों) द्वारा पहले से जमा करके रखे हुए। शहर के बाग़ों से, कुछ उपज कुछ जगहों तक पहुँचती भी है, लेकिन ग़रीब और मध्यम वर्ग बस मुँह बाए देखता रह जाता है (क्योंकि वे चुनिंदा लोगों के लिए ही होते हैं)।
एक और बात जिस पर ध्यान देने की ज़रूरत है, जिससे लोगों को बहुत नुक़सान हो रहा है, वह यह कि पानी ढोने वालों ने पानी भरना बंद कर दिया है। बेचारे सरफेस (सज्जन) कंधों पर बाल्टी में पानी ढोते नज़र आते हैं, तब जाकर घर के ज़रूरी काम, जैसे खाना बनाना वगैरह, हो पाते हैं। हलालखोर हरामखोर हो गए हैं , कई मोहल्लों में कई-कई दिनों से कमाई नहीं हो पा रही है और अगर यही हाल रहा तो सड़ांध, मौत और बीमारी मिलकर शहर की हवा खराब कर देंगे और पूरे शहर में, यहाँ तक कि आस-पास के इलाकों में भी महामारी फैल जाएगी।

31.1 यह रिपोर्ट कहां से ली गई है?

31.2 शहरों का सामान्य जीवन किस प्रकार प्रभावित हुआ?

Ordinary Life in Extraordinary Times

What happened in the cities during the months of the revolt? How did people live through those months of tumult? How was normal life affected? Reports from different cities tell us about the breakdown in routine activities. Read these reports from the Delhi Urdu Akhbar, 14 June 1857:

The same thing is true for vegetables and saag (spinach). People have been found to complain that even kaddu (pumpkin) and baingan (brinjal) cannot be found in the bazaars. Potatoes and arvi (yam) when available is of stale and rotten variety, stored from before by farsighted kunjras (vegetable growers). From the insides of the garden the city, some produce does reach a few places but the poor and the middle class can only lick their lips and watch them (as they are earmarked for the select).

There is something else that needs attention which is causing a lot of damage to the people which is that the water-carriers have stopped filling water. Poor Surface (gentility) are seen carrying water in pails on their shoulders and only then the necessary household tasks such as cooking, etc. can take place. The halalkhors (righteous) have become haramkhors (corrupt), many mohallas have not been able to earn for several days and if this situation continues then decay, death and disease will combine together to spoil the city's air and an epidemic will spread all over the city and even to areas adjacent and around.

What I saw from thence seemed to me as large as Rome, and very beautiful to the sight, there are many groves of trees within it, in the gardens of the houses, and many conduits of water which flow into the midst of it, and in places there are lakes, and the king has close to his palace a palm-grove and other rich fruit-bearing trees.
