

## **BIOLOGY LAB**

Our school's biology lab is a state-of-the-art facility that provides students with a hands-on learning experience in the biological sciences. The lab is equipped with modern equipment and technology, including microscopes, autoclaves, incubators, and centrifuges, allowing students to conduct experiments and investigations in a safe and controlled environment.

Under the guidance of our experienced biology teachers, students engage in various projects and activities that foster curiosity, creativity, and critical thinking. These include DNA extraction, chromatography, microscopy, and dissections, among others. Our students have achieved excellent results in biology competitions and Olympiads.

Safety is our top priority in the biology lab. We have strict safety protocols and procedures in place, and students are trained in emergency procedures and proper lab etiquette. Our lab is also well-organized and maintained, ensuring a clean and efficient learning environment.

We are proud of our biology lab and its achievements, and we look forward to continuing to provide our students with a world-class education in the biological sciences. Please visit our lab and see the exciting work our students are doing!
