As one amongst you, I understand and appreciate the most difficult and challenging task ahead of us. Shaping the destiny of a child is a matter of grea pride for each one of us. The main Objective of education is the establishment of twofold harmony in every individual – harmony within his own self and harmony with other living beings in the world. So our goal has always been th personality enrichment through curricular and co-curricular activities. Teaching is much more than a career or a profession. It (teaching) is the mos onerous responsibility of moulding and shaping a child into a responsible citizen. I am certain my students will become productive, Intelligent and honest citizen of society.The active participation and co-operation of parent would be extremely essential to achieve the desired results.

We strive with in-dominate zeal to seek fresh vistas of excellence so as to enable our students to become self-restrained and come out with flying colo in the present age of competition.
