MR. BABULAL

Principal

Teaching is much more than a typical career or a profession. Teaching, an onerous responsibility of molding and shaping a child into a responsible citizen for a better future of a child and society, is a matter of great pride for each one of us. The main object of education is the establishment of a twofold harmony in every individual – harmony within his own self and harmony with other living beings in the world. So, the goal of all teaching fraternity has always been the personality enrichment of a child through curricular and co-curricular activities.
