# From the desk of Principal

## School Principal Message

Children are the most beautiful creations of the world and moulding their thoughts and actions in the right directions is among the noblest

of causes. Parents, society and teachers are together responsible for directing children on the appropriate path where they move towards a direction that will lead towards the realization of their potential, which in turn will shape the future of a nation. All stakeholders should work together in this direction, so that the children get the required environment to bloom in life, especially teachers, who are trained and competent, will have to shoulder greater responsibilities in this regard. With a concerted effort from all corners, the future of our children will be brighter, which in turn will dispel all gloom from the millions of lives.

**SANDEEP KUMAR**
