

Write Up for the Best Pedagogical Practices adopted for experiential Learning

TOPIC :- TIME

CLASS :- IV

LO :- To be able to make a clock and read time displayed on it.

" Tell me and I forget, teach me and I may remember, involve me and I will learn."

Topic time was inter related with music , art and sports for providing children with real life experience. Handful activities were conducted in the class to make the topic clear in an interesting and child friendly way. Scientific aptitude is developed while doing activities like collecting pebbles for making clocks . Involvement of individual students was given foremost importance. Every student showed the said time on the clock made by them gave them a sense of satisfaction . Children love to sing and dance so the introduction of the topic was done by a rhyme already known to them . Clocks made by students were kept in exhibition for other students to watch and get motivated to participate in classroom activities.

Life lesson of never stop and don't consider yourself useless is also given to students by showing the time on a stop clock as it also gives the right time twice a day.

Activity :- Poem Recitation

Activity :- Making of Paper Clock :-

Activity :- Parts of Clock :-

Activity:- Making of Rock Clock :-
