

PM Shri Kendriya Vidyalaya Sector 2 R K Puram New

Art and Craft Report (2023-2024) Learning art and craft enhances creativity and imagination in

children. It encourages cognition and develops critical

thinking skills. Students are given the opportunity to express their knowledge, ideas,

and feelings in ways that do not necessarily involve words. Art education for all classes involves easy drawing and simple techniques of freehand

drawing. For upper primary students, apart

from drawing, different tones of coloring are

included, which improve

the students' creativity and observational skills. At the high school level, tones of coloring, life study, and light and shade methods are included improve

imagination and observational skills. The various craft activities, such as origami and metal embossing, nurture the creativity and imaginative power of the students.
