PM SHRI KENDRIYA VIDYALAYA NO.2 DELHI CANTT. SHIFT-2

PHYSICS LAB

Physics lab is the place where the students explore many dimensions of their experiential learning and development of the scientific attitude. The students develop many qualities desired of an ideal student like discipline, collective learning, problem solving, observational learning, patience and many more. Our physics lab has very sound infrastructure for conduct of the experiments and it provides the conducive environment to the students for performing experiments and noting down the observations. Our physics lab is fully equipped with all the necessary apparatuses as prescribed by CBSE from branches Mechanics, Light, Electricity, Heat and electronics. In addition to this, physics lab has many equipments provided by KVS for the modernisation of physics lab to facilitate additional learning of the concepts through the experiments among the students. An interactive panel has been installed in the lab which is operated on an Android as well as window plateforms. Many concepts including Physics experiments can be explained to the students in excellent manner with the help of Note pad, PPT and videos. The teachers are the active participants during the practical periods to discuss the various issues related to experiments with the students.
