Sir,

It is intimated that the building structure is likely to perform satisfactory during its useful life/design period. The Assistant Engineer Shri Anjani Kumar, Junior Engineer Shri Shubham Singh visited the building on 10.07.2024 and the structure of school building found satisfactory in general. Hence under normal condition, school is safe and secure for running classes. However normal repair and maintenance work is required. Water proofing treatment of roof required as seepage of roof during rainy season appears which may affect structure safety due course of time.
