Carbon Absorber ....
A carbon absorber works by absorption, where contaminants sticks to activated carbon. It is commonly used in air purifiers, water filters, and industries for pollution control
Note:- A carbon absorber are uses activated carbon to trap and remove
CLEAN AIR
CARBON ABSORBER
FACTORY
Step 3
Finally the Purified Air Gets out from the Pipe then we get Purified air in Atmosphere
Step - 1
From Here the smoke/air Travels into Carbon Absorber
